How to prepare pour over coffee cup

1. Place your filter inside the carafe and boil water in your kettle.

2. Pour a bit of hot water over the filter and carafe. Swirl the water inside the carafe to heat the glass and pour the water out.

3. Place your Neoprene cover on the pot and close the Velcro to tight the cover to fit the pot.

4. Place your filter inside the carafe and boil water in your kettle.

5. Put medium ground coffee in the filter.

6. Slowly pour over the coffee ground hot water

7. Your coffee will drip through the filter

8. Remove filter and rinse it with warm water.

9. Pour your coffee, and enjoy
