Toyota Tacoma Double Cab | 2016 | 75162-01A
Toyota Tacoma Access Cab* | 2016 | 75162-01A

* Modification required to running board assembly. See Item 1 on page 3.

INSTALLATION TIME
3-5 Hours
Professional installation recommended

SKILL LEVEL
1 2 3 4
3= Experienced

TOOLS REQUIRED
- Safety goggles
- Measuring tape
- 9 mm socket
- 0 mm socket
- 2 mm socket
- Ratchet wrench and extension
- Pliers
- Wire strippers/cutter
- 3/16" hex key wrench (allen wrench)
- 4 mm hex key wrench (allen wrench)
- Electrical tape
- Weather proof caulking (silicone sealer)
- 1/8", 9/32" & 9/16" drill bit
- Drill

WARRANTY
5-Year Limited Warranty

AMP RESEARCH TECH SUPPORT 1-888-983-2204 (Press 2) Monday - Friday, 6:00 AM - 5:00 PM PST

Invented, engineered and manufactured exclusively by AMP Research in the USA. May be covered by one of the following patents: 6,641,158; 6,830,257; 6,834,875; 6,938,909; 7,055,839; 7,380,807; 7,398,985; 7,584,975 ©2012 AMP Research. All rights reserved. Printed in USA.
Purpose: Due to vehicle-build variations the Power Step may not correctly align with vehicle cladding. Using supplied shims, please follow the instructions below to correct the alignment.

<table>
<thead>
<tr>
<th>Misalignment:</th>
<th>Shim Correction:</th>
</tr>
</thead>
<tbody>
<tr>
<td>The gap between board and vehicle cladding is too large toward rear of running board.</td>
<td>Shim rear mount at lower bolt. (diagram below)</td>
</tr>
<tr>
<td>The gap between board and vehicle cladding is too small toward rear of running board.</td>
<td>Shim rear mount at upper bolt. (diagram below)</td>
</tr>
<tr>
<td>The gap between board and vehicle cladding is too large toward front end of running board.</td>
<td>Shim front mount at lower bolt. (diagram below)</td>
</tr>
<tr>
<td>The gap between board and vehicle cladding is too small toward front end of running board.</td>
<td>Shim front mount at upper bolt. (diagram below)</td>

4/11
Remove brake line retainer bolt from driver side front inside frame rail to provide access inside frame.

Install driver side rear motor linkage through this hole in frame.

Secure Linkage Assembly to frame. FINGER TIGHTEN ONLY.

Through-bolt linkage to frame as shown in next step.

Use supplied template to mark a hole for front idler installation as shown below. Use tape to hold template in place.

Note: Harness clip will need to be removed to allow harness to be moved out of the way.
Center Punch hole and pilot drill with an 1/8” drill bit. Then drill final hole size to 9/16”. Repeat steps for passenger side of vehicle.

Install brake line stand-off inside driver rear frame rail as shown.

Replace all brake line fasteners.

**Install linkages on passenger side**

**MOTOR LINKAGE IN FRONT.**

Torque 3/16” Allen bolts to 10ft-lbs. (13.5Nm)

Center running board to doors and mount onto linkages by sliding T-nuts into position. Measure 18 inches from end of board to side of linkage, as shown below.

Attach motor onto Motor Linkage Assembly using two M6x16 flat head screws on both drive and passenger sides

Torque linkage to frame through bolts from step 4 to 40 ft-lbs(54Nm)
Remove fuse.

Secure controller to factory wire loom using supplied 11” wire ties. Connect Red fused wire to stud on battery positive terminal. Connect Black wire to ground on inner fender panel.

Run wire harness as shown outside the frame rails on both sides. Avoid hot, sharp or moving parts! Secure with 7” wire ties.

Note: Run loom with Green/Yellow and Pink/Black Trigger wires down drivers side of vehicle.

Pry left foot rest loose at driver side kick panel.

Pry up front door sill plates and remove kick panel fasteners and panels on driver and passenger side.

Pull up carpet and locate rubber grommet. Slice the grommet and pass trigger wires from under the vehicle and into the cab.
Posi-Tap Instructions

- **Insert**
- **Strip 3/8”**
- **Insert and Tighten**
- **Tighten**

**Driver side:** Locate door ajar signal wires on driver side. Front: Solid Yellow, Rear: Solid Red or Solid Pink. **On access cab models tape off extra wire not used.**

**Passenger side:** Locate door ajar signal wires on Passenger side. Front: Solid Green, Rear: Solid Purple. **Note:** Three green wires are located in the loom. Look for the lighter shaded wire. **On access cab models tape off extra wire not used.**
Drill a pilot hole followed by a 9/32" hole through the pinch weld at marked locations. Debur all holes.

On each side of the vehicle measure from the front edge of door line on the pinch weld to the specified lengths below. Measure at 20" for front LED Light and 57" for rear LED Light.

Affix lamp to rocker panel surface. Make sure lamp is affixed to a flat, clean surface.

Using supplied butt connectors, connect the lamp wires. Red to Red, Black to Black. Once Crimped use heat gun to shrink tube.
Check that all doors activate the Power Step and the LED Lights work when doors open and close. Reinstall any remaining trim panels.

**FINAL SYSTEM CHECK**
Check that all doors activate the PowerStep and the LED lights work when doors open and close. **NORMAL OPERATION:** When the doors open, PowerStep automatically deploys from under the vehicle. When the doors are closed, PowerStep will automatically return to the stowed/retracted position. **Note that there is a 2-second delay before the PowerStep returns to the stowed/retracted position.**

**CORRECT OPERATION OF LIGHTS:** All four lamps will illuminate upon opening any door of vehicle. Lamps will stay on until restowing of both Power Steps or until 5 minutes has expired with the doors open. When the lights timeout after 5 minutes, they can be reillumintated by closing and opening any door of vehicle.
POWER-DEPLOYABLE RUNNING BOARDS OPERATION: AMP Research PowerStep running boards automatically move when the doors are opened to assist entering and exiting the vehicle.

**Automatic power deploy:**
The running boards will extend down and out when the doors are opened.

**Automatic power stow:**
The running boards will return to the stowed position when the doors are closed. There will be a 2-second delay before the running boards move to the stowed position.

**Automatic stop:**
If an object is in the way of the moving running board, the running board will automatically stop. To reset, clear any obstruction, then simply open and close the door to resume normal operation.

**Manually set in the deployed (OUT) position for access to the roof:**
The running boards can be manually set in the deployed position by firmly holding the step down with your foot while at the same time closing the door. To resume normal operation, open and close the door.

**Maintenance:**
In adverse conditions, debris such as mud, dirt, and salt may become trapped in the running board mechanism, possibly leading to unwanted noise. If this occurs, manually set the running boards to the deployed position and flush the front and rear hinge arms with a high-pressure car wash wand. Avoid spraying the motors directly. After washing, apply silicone spray lubricant to the hinge pivot pins. Do not apply silicone, wax or protectants like Armor All® to the running board stepping surface.

**Caution!** Keep hands away when the running board is in motion.

### 5-YEAR LIMITED WARRANTY

AMP RESEARCH warrants this product to be free from defects in material and workmanship for FIVE (5) YEARS FROM DATE OF PURCHASE, provided there has been normal use and proper maintenance. This warranty applies to the original purchaser only. All remedies under this warranty are limited to the repair replacement of the product itself, or the repair or replacement of any component part thereof, found by the factory to be defective within the time period specified. The decision to repair or replace is wholly within the discretion of the manufacturer.

This warranty specifically excludes labor. If you have a warranty claim, first you must call our factory at the number below for instructions. You must retain proof of purchase and submit a copy with any items returned for warranty work. Upon completion of warranty work, if any, we will return the repaired or replaced item or items to you freight prepaid. Damage to our products caused by accidents, fire, vandalism, negligence, misinstallation, misuse, Acts of God, or by defective parts not manufactured by us, is not covered under this warranty.

ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE CREATED HEREBY ARE LIMITED IN DURATION TO THE SAME DURATION AND SCOPE AS THE EXPRESS WRITTEN WARRANTY. OUR COMPANY SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

**FOR WARRANTY ISSUES WITH THIS PRODUCT PLEASE CALL AMP RESEARCH CUSTOMER SERVICE 1-888-983-2204**

### WARNING

Be sure to read and precisely follow the provided instructions when installing this product. Failure to do so could place the vehicle occupants in a potentially dangerous situation. After installing or reinstalling, re-check to insure that the product is properly installed.
