- Do not use the appliance if it has been dropped or damaged.

This appliance contains components that are hazardous if not used correctly. It should also be 
operated by a person who has read the instructions and is familiar with the product.
- The product should never be used by children and the elderly.

Thank you for your purchase of this spin dryer.
INSTRUCTIONS FOR USE AND MAINTENANCE

- With the spin dryer unplugged, pull the cover latch. After opening, load the clothes evenly, pressing them lightly with your hand against the background. Always try to put heavy clothing underneath lighter items, as this will reduce vibration.
- The amount of laundry in the basket should never exceed the weight of the inner drum's top edge, because some small piece of clothing can get stuck between the inner and outer drum.
- Fit the round safety cover on top of the clothes, inside the inner drum. It must be placed inside the inner drum.
- Make sure the spin dryer is placed on level ground.
- Close the lid, you will hear a click when it's fully closed. Connect the power cord to the outlet. The spin dryer process will automatically start.
- If the inner tub does not spin or does so in a slow, unbalanced manner, stop the machine and balance the load.
- When water stops coming out of the drain spout, you can turn the spin dryer off (see drying time table).
- Pull the cover latch. The lid automatically opens and stops the machine. Wait for the basket to come to a complete stop before removing the clothes.

WARRANTY CONTRACT

1. The Spin Dryer is warranted for 36 consecutive months against manufacturing defects, from the date of issue of invoice.
2. The warranty will include free replacement of parts, if applicable, or a replacement unit.
This warranty is automatically void if:
4.1 The use of the product is not exclusively domestic;
4.2 The user does not follow the instructions in the instruction manual.
4.3 The product is misused, shows signs of neglect or has been altered in some other way.

Important: The spin dryer is a compact, lightweight, high RPM machine. Therefore it is extremely important that users carefully follow instructions, for safety reasons and to increase the product's lifespan.
