In order to continue serving our customers and providing the best products, our product information including our user manuals may receive updates from time to time. Please check our website for the latest user manuals and product materials.
Section 1  
Information & Safety Warnings

1.1 Introduction
This user manual will guide you through the functions and usage of your TurboLock TL-100 Smartlock. It is important that you follow all instructions and regard all notes that appear throughout this manual. Consult this manual before you attempt to use your lock. If you have questions not answered by this manual or are in need of repair or non-routine service, contact customer service at 855-850-8031. Before contacting customer service, please have your purchase information ready as this may be needed during the call. This information may be recorded below.

Date of Purchase:
Place of Purchase:

1.2 Safety Warnings
When reading this manual, note these icons:

⚠️ Notes with this icon MUST be read, understood, and obeyed to prevent injury or damage etc.

_notes_ Notes with this icon include relevant information.

⚠️ Overall Usage
- Never insert objects into the lock other than batteries as described in this manual.
- The lock is not a toy. Do not leave children unsupervised around the lock.
- Verify that all parts of the lock are accounted for. If any part is missing, contact customer service.
- The lock is best suited for standard doors made for buildings within the US.
- Use only the parts included in the original packaging or received from TurboLock.
• Replace the batteries after receiving the lock’s low battery notification.
• Only use clean water, mild cleaner, and soft, non-abrasive cloth when cleaning.
• Never submerge the lock or any of the lock’s components.
• Never apply any cleaner directly to any part of the lock.
• Do not let water and liquids get into the lock’s electric parts or battery compartment.
• Objects should not be hung from the lock’s handles at any time.
• Installation surfaces must be level. Do not install on doors or surfaces with any type of deformity as gaps or warping may cause the lock to malfunction or fail to operate entirely.
• Old and new batteries as well as batteries from different brands may not be mixed.
• Use only four alkaline AA batteries.
• Use the lock only as described in this user manual.
• If the battery compartment or surrounding parts are damaged, do not use the lock.

1.3 Disposal at End-of-Life
This product must not be disposed of by incineration, landfilling, or mixing with household trash. Improper disposal of the battery contained within this product may result in the battery heating up, rupturing, or igniting which may cause serious injury. The substances contained inside the battery present chemical risks to the environment. The recommended disposal for any TurboLock TL-100 Smartlock at its end-of-life is to dispose of the entire unit at or through an e-waste recycling center, program, or facility. Local regulations and laws pertaining to the recycling and disposal of lithium ion batteries and/or products containing them will vary according to country, state, and local governments. You must check laws and regulations corresponding to where you live in order to properly dispose of the battery and/or unit. It is the user’s responsibility to dispose of their waste equipment properly with accordance with local regulations and laws.

For additional information about where you should drop off your batteries and electrical or electronic waste, please contact your local or regional waste-management office, your household waste disposal service, or your point-of-sale.

Package Contents & Overview

2.1 Contents

- Inside Section 1x
- Outside Section 1x
- BMHA Latch 1x
- Adjustable Latch 1x
- MIFI Cards 2x
- Latch Screws 2x
- Strike Screws 2x
- Inside Screws 4x
- Pegs 4x
- Back Screws 3x
- Spring 1x
- Latch Pin 2x

To purchase additional keycards, visit www.turbolock.com.
2.2 Overview

See the next section for installation information.
3.1 Step by Step

- The following installation instructions were made in reference to a door which did not already have a handle opening. If switching out an existing handle, it may be possible to skip some steps.
- For ease of installation, it is recommended to perform installation with the assistance of another person.
- After finishing installation, be sure to use the door at least once to make sure all parts of the lock function correctly.

**KEEP DOOR AJAR.** At all times during, before, and shortly after installation, keep the door open. If the lock is incomplete or improperly installed, and the door is then closed, the lock and/or door may become stuck.

### Pre-Installation

If installing the TL-100 on a new door without a hole cut for the door handle, follow the instructions below. If retrofitting the TL-100 to an existing hole, measure the diameter and continue to Part 2.

#### Part 1

**Step 1. Marking the Door**

Using the template, mark a hole on both sides of the door at required backset, then mark the latch hole on door edge.

**Step 2. Drilling Holes**

Bore a 54mm hole on door face, then drill a 25mm hole in the door edge to intersect with center of 54mm hole.

Drill a 54mm hole from both sides of door to stop wood splintering.
Step 3. Installing the Latch

• Insert the latch into the hole, mark a line around edge of latch plate to use as a guide, and remove latch. (Fig. 3a)
• Chisel approx. 3mm deep or until latch plate sits flush with door edge. (Fig. 3b)
• Insert the latch ensuring the rounded side faces out towards the front of door, drill 2x 3mm holes for and fasten the latch with the 2x latch screws. (Fig. 3c)

Step 4. Installing the Strike

• Push the door until nearly closed and mark the horizontal center of the latch on the door frame. Mark the vertical line where the door edge meets the frame and measure in half of the door’s thickness to find the vertical center. (Fig. 4a)
• Extend both lines until they intersect and drill a 25mm hole to 15mm depth.
• Position the strike plate and mark around the edge.
• Chisel the frame to approx. 1.5mm depth or until the strike sits flush.
• Drill 2x 3mm screw holes and fix the strike to the frame with the 2x strike screws. (Fig. 4b)
Part 2

Step 5. Installing the Pegs (Fig. 5a)
- Retrieve the outside section of the lock and look at the back.
- Locate the four holes around the interior of the lock and screw in the 4x pegs.

Step 6. Outside Handle Positioning
- Retrieve the outside section of the lock and look for the arrow engraving on the back. (Fig. 6a)
- Push the button on the bottom and turn the handle to the desired orientation. (Fig. 6b)
- Use the square latch pin to turn the center so that the arrow is pointing up. (Fig. 6c)
- Remove the latch pin.
Step 7. Inside Handle Positioning

• Retrieve the inside section of the lock and look at the back.
• Push the button on the bottom and turn the handle to the desired orientation. (Fig. 7a)

Step 8. Installing the Latch

• Select a latch assembly and its coordinating pin according to the diameter of the door hole. Adjust as needed. (Fig. 8a)
• Insert the latch ensuring the rounded side faces out towards the front of door and fasten it with the 2x latch screws. (Fig. 8b)

Step 9. Installing the Strike

• Attach the strike to the frame with the 2x strike screws. (Fig. 9a)
Step 10. Adding the Outside Section

• Feed the power cable around the latch and guide the pegs through until the outside section sits flush against the front of the door. (Fig. 10a)
• Have someone hold the section against the door.

Step 11. Installing the Plate (Fig. 11a)

• Make sure the bolts in the plate face outwards, away from the door, and place the silicone backing on the other side.
• Align the silicone and plate on the back of the door.
• Fasten the outside section, silicone backing, and plate to each side of the door using 1x inside screw.
• Use a level on the outside section of the lock to ensure it’s balanced. Have someone hold the section against the door.
• Add the 3x remaining inside screws. Make sure all 4x screws are tightened.
Step 12. Adding the Latch Pin

• Insert the spring into the back of the lock. (Fig. 12a)
• Insert the square latch pin. (Fig. 12b)

Step 13. Adding the Inside Section

• Attach the lock back using the 3x back screws. (Fig. 13a)
• Make sure all screws are tightened.

Step 14. Adding Batteries (Fig 14a)

• Add batteries to the battery compartment in the back of the lock.
• Add the cover.
3.2 Battery Information
The lock requires four standard or rechargeable alkaline ‘AA’ batteries which will be stored inside the back of the lock. New batteries should be installed as soon as possible after receiving any low battery indication. When the notification begins, the lock will only have enough power for approximately 50 times before the batteries are fully depleted. This indication can be received from the app or the lock itself; the lock will beep after being unlocked. Expected battery life is approximately 365 days. If needed, use a power bank and a micro USB cable with the lock’s micro USB port. See the following section for more information.

⚠️ Micro USB cable and power bank are not included.

Section 4
How to Use the TurboLock
The TL-100 provides a variety of ways to open your door. Each time the lock engages and unlocks the door, regardless of entry method, the door can only be opened while the backlight is still on. This light remains on for approximately 10 seconds. After it turns off, the lock will automatically engage again and lock the door.

Using the Admin Password
Touch any key so that the keypad lights up, enter the Admin Password, and then press ‘#’ to unlock the door. Note, the Admin Password must be changed from the manufacturer’s default. See Section 5.

Using the Micro USB Port
Use a micro USB cable to connect a power bank via the port on the bottom of the lock. The backlight will turn on indicating the lock is receiving power. Enter a password and then press ‘#’ to unlock the door as usual.

⚠️ Micro USB cable and power bank are not included.
Using a MIFI Card

Touch any key so that the keypad lights up then move the card in front of the keypad to unlock the door. See Section 6.

The remaining unlock methods in this section are available through the TurboLock app. Note, the TurboLock Smartlock can be used without the app. However, the app is needed to use the lock’s full range of features.

Using a User Password

Touch any key so that the keypad lights up, enter the password received from the app’s admin, and then press ‘#’ to unlock the door. Note, User Passwords may have restricted access according to the app admin’s discretion.

Passive Function

After turning the function on, touch any key so that the keypad lights up then open the door. No password is needed.

• The TL-100 features a Mute Function. See Section 8.
  • If a password has been entered wrong 3x in a row, regardless of the entry method, the lock will go into a 15-minute period of inactivity where it cannot be used. This is a security feature designed to prevent unwanted parties from using the lock.

Section 5

Using the Admin Password

5.1 Information

• The Admin Password must always be at least 6 digits long.
• The default Admin Password is ‘123456’.
• Remember, the door should always be ajar when adding and/or changing passwords.

5.2 Changing the Admin Password

⚠️ For security, it is highly recommended that you change the Admin Password from the manufacturer default.
Step 1. Use the keypad to enter the default (‘123456’) or the current Admin Password then enter ‘#’.

Step 2. Enter ‘1’ then enter ‘#’.

Step 3. Enter the new Admin Password then press ‘#’.

Step 4. Re-enter the new Admin Password then press ‘#’.

Step 5. Wait for the backlight to go out so that the new password successfully saves.

Step 6. If desired, test the new password to confirm the modification was successful.

N

• The password must be entered while the blue backlight is on. If it goes out, begin again at Step 1.

• The Admin Password can also be changed via the app. For app information, see the Section 9.

• If the Admin Password is lost or forgotten, it may be reset via a reset. Refer to Section 10.

Section 6

Using the MIFI Cards

Adding a Card

Step 1. Use the keypad to enter the Admin Password then enter ‘#’.

Step 2. Enter ‘7’ then enter ‘#’.

Step 3. Move the card in front of the keypad. The lock will emit sound when it detects the card. More cards (up to 20 at a time) can be added as desired.

Step 4. Wait for the backlight to go out so that the new card successfully saves.

Step 5. If desired, test the card to confirm it was added.
Step 6. Repeat the above steps to add additional cards if needed.

Deleting a Card

Step 1. Use the keypad to enter the Admin Password then enter ‘#’.
Step 2. Enter ‘8’ then enter ‘#’.
Step 3. Move the card in front of the keypad. The lock will emit sound when it detects the card. Additional cards (up to 20 at a time) can be deleted as desired.
Step 4. Wait for the backlight to go out so that the new card is successfully deleted.
Step 5. If desired, test the card to confirm it was deleted.
Step 6. Repeat the above steps to add additional cards if needed.

⚠️ A single card cannot be deleted if it has been lost or misplaced. If lost or misplaced cards need to be deleted, they may only be deleted by deleting all cards.

Deleting all Cards

Step 1. Use the keypad to enter the Admin Password then enter ‘#’.
Step 2. Enter ‘9’ then enter ‘#’.
Step 3. Wait for the backlight to go out to confirm all cards were successfully deleted.
Step 4. If desired, test a card to confirm it was deleted.
Step 5. Repeat the above steps to add additional cards if needed.

⚠️ The card must be added while the blue backlight is on. If it goes out, begin again at Step 1.
Section 7

Using Passive Function

With this function active, the TL-100 can be used to open the door without requiring a password or card etc.

⚠️ USE WITH CAUTION. Remember to turn off the function when it is no longer needed. Do not leave this function on for extended periods of time.

Turning On the Passive Function

Step 1. Use the keypad to enter the current Admin Password, then ‘#’. The lock will engage.

Step 2. Press ‘6’ and then ‘#’.

Turning Off the Passive Function

Use a standard password or method to unlock the door. When the lock engages, the Passive Function will turn off automatically.

Section 8

Using the Mute Function

The TL-100’s sounds can be used or muted according to preference.

⚠️ USE WITH CAUTION. Remember to turn off the function when it is no longer needed. Do not leave this function on for extended periods of time.

Muting

Step 1. Use the keypad to enter the current Admin Password, then ‘#’. The lock will engage.

Step 1. Press ‘5’ then ‘#’. The lock will stop emitting sound.
Un-muting

**Step 1.** Use the keypad to enter the current Admin Password, then ‘#’. The lock will engage.

**Step 2.** Press ‘5’ then ‘#’. The lock will then begin to emit sound.

Section 9

**The Turbolock App**

For your convenience, there is a TurboLock app that uses Bluetooth technology to interact with the lock. The TurboLock app is compatible with most Android and iOS smartphones and grants full access to all of the lock’s features. The app offers features such as additional ways to unlock your door, decide who and when passwords can be used, keep record of times when the lock is used, set preferences for real-time unlock notifications, and more. To get the app, follow the instructions below.

**9.1 Installation**

**Step 1.** Use your smartphone to search the Play or App Store for the “TurboLock” application.

**Step 2.** Download and install the app according to your operating system.

**Step 3.** Turn on Bluetooth and open the app.

**Step 4.** Register for an account and return to the app.

- For instructions and/or information on how to use the app, register for an account and refer to the in-app instructions or contact customer service.

- In order to use the app with the TL-100, the two must be paired.

- When using the app to unlock the door via Bluetooth, delays may be caused due to signal interference. Signals from other including but not limited to wireless devices, Bluetooth devices, and some household appliances including microwaves etc. can interfere with the lock’s signals. To minimize interference possibility, do not keep these devices in close proximity to the lock.
9.2 Pairing

In order to connect the app and the lock, Pairing Mode must be turned on.

**Step 1.** Use the keypad to enter the current Admin Password, then ‘#’. The lock will engage.

**Step 2.** Press ‘2’ then ‘#’. The lock will emit sound and the light will flash to indicate the lock is ready to pair.

- Images for illustrative purposes only. Actual images may vary.
- App content subject to change without notification.

```
Main Interface (Admin View)  j.  Main Interface (User View)
```

- a. Send keys to others via email
- b. Touch to reset/erase temporary keypad codes
- c. Touch to view and manage user(s) lock access
- d. Touch to manage admin password or generate temporary access codes
- e. Touch to view unlock records and details
- f. Touch to view temporary access records and details
- g. Toggle the in-app unlock sound on/off
- h. Toggle to turn notifications on/off
- i. Touch to view information about the lock
- j. Toggle the in-app unlock sound on/off
- k. Touch to view information about the lock

*Due to the wide variety of Android devices and Bluetooth® technology on the market, the TL-100 may experience some delays when used with older Android smartphones.*
Section 10

Resetting the Lock

⚠️Reset cannot be reversed.
• Performing a reset will delete all passwords including the Admin Password will be deleted.
• Once all passwords are erased, only the Admin Password can open the lock via the default password.
• After a reset:
  ○ Admin Password will return to its default ‘123456’.
  ○ Choose a new Admin Password immediately. See Section 5.
  ○ All digital keys and codes issued via the app will be erased. In order to restore app functionality, it must be paired with the lock again.
• A reset should only be used when the Admin Password is lost or forgotten.

Option 1

Step 1. Remove the cover from the battery compartment at the back of the lock.
Step 2. Press and hold the reset button for at least five seconds.

Option 2

Step 1. Use the keypad to enter the Admin Password then enter ‘#’.
Step 2. Enter ‘3’ then enter ‘#’.

⚠️If the lock is removed, it will be reset as a reset will occur if the internal cables are disconnected and reconnected.
• A reset can also be performed via the app if needed.
Proper cleaning and maintenance of your lock ensures it will continue to work as it should.

• The keypad is made of acrylic. Use purified water and soft, non-abrasive cloth when cleaning.
• If a mess cannot be cleaned with water, apply a gentle cleaner to the cloth and clean.
• Do not apply any cleaner or detergent directly to any part of the lock.
• After cleaning with any cleaner, rinse with clean water and dry so as not to leave residue on the lock.
• The TL-100 meets IP65 water-resistance, meaning it can withstand splashes and contact with water once properly installed. However, do not submerge the lock.
• Do not let water and liquids get into the lock's electric parts or battery compartment.
## Troubleshooting

If none of the above information resolves your issue, please visit our website at www.turbolock.com or contact customer service at 855-850-8031.

Section 13

Warranty

13.1 Violation

The lock cannot be repaired or serviced within its warranty period if any of the following has occurred:
• The warranty has expired
• Damage occurred during or in relation to non-routine and/or unauthorized disassembly
• Failure to provide a valid proof of purchase when requesting service or repair
• Damage occurred as a result of natural disaster etc.
• Damage occurred due to unexpected factors or man-made reasons (including mis-operation, fluid found in any openings, improper insertion or pulling, hauling, bumping, improper voltage input and others)
13.2 Information

One Year Limited Hardware Warranty

Your TurboLock Smartlock (“Product”) includes a One Year Limited Hardware Warranty (“Warranty”). The Warranty covers product defects in materials and workmanship under normal use. This Warranty is limited to residents of the United States and Canada only and is available only to original purchasers. This Warranty gives you specific legal rights and you may also have other rights which vary from state to state.

This Warranty starts on the date of your purchase and lasts for one year (the “Warranty Period”). The Warranty Period is not extended if the Product is repaired or replaced. We may change the availability of this limited warranty at our discretion, but any changes will not be retroactive.

Warranty services are provided by Warranty Pro (“WP”). If a hardware defect arises and a valid claim is received within the Warranty Period, at its option and to the extent permitted by law, WP will: (1) repair the hardware defect by using new or refurbished parts that are equivalent to new in performance and reliability; or (2) exchange the Product with a product that is new or refurbished which is substantially equivalent to the original product. This Warranty is for one replacement only of like-items and does not cover items out of production if the product is no longer made or stocked. This Warranty is not assignable or transferable. The original purchaser may call WP’s toll-free number at 855-850-8031 for service requests.

When a product or part is exchanged, any replacement item becomes your property and the replaced item becomes WP’s property. This warranty only covers technical hardware defectiveness during the warranty period and under normal use conditions. WP does not warrant uninterrupted or error-free operation of this Product.

This Warranty does not cover any damage due to: (a) transportation; (b) storage; (c) improper use; (d) failure to follow the product instructions or to perform any preventive maintenance; (e) modifications; (f) unauthorized repair; (g) normal wear and tear; or (h) external causes such as accidents, abuse, or other actions or events beyond our reasonable control.
**Important:** Do not disassemble the Product. Disassembling the Product will void this Warranty. Only WP or a party expressly authorized by WP should perform service on this Product.

DISCLAIMER OF WARRANTY: THE REMEDIES DESCRIBED ABOVE ARE YOUR SOLE AND EXCLUSIVE REMEDIES AND OUR ENTIRE LIABILITY FOR ANY BREACH OF THIS LIMITED WARRANTY. OUR LIABILITY SHALL UNDER NO CIRCUMSTANCES EXCEED THE ACTUAL AMOUNT PAID BY YOU FOR THE DEFECTIVE PRODUCT, NOR SHALL WE UNDER ANY CIRCUMSTANCES BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, SPECIAL OR PUNITIVE DAMAGES OR LOSSES, WHETHER DIRECT OR INDIRECT.

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

THE DURATION AND REMEDIES OF ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY.
