Part 5: Keystone Correction and Focus ......................... 7
Part1: Projection Methods

4 Projection methods: Depending on how you place the projector, you may need to change the projection mode so your images will be projected correctly.

1.1 Factory defaults: The projector is mounted on the same side of the screen as the viewer.

1.2 Rear: The installation position of the projector and the audience are located on the two sides of the screen.

You can change the projection mode to Rear with the remote control by clicking MENU ➔ SETTING ➔ PICTURE ➔ Projection Mode (Rear on Desk) as the following pictures show:
Part 2: HDMI Connection

How to use the HDMI cable to connect the projector with a computer/PS4/xbox/DVD to display images?

2.1 Identifying available connections

The first step of connecting your computer to the projector is to find the matching ports on both devices. Then use the HDMI cable to connect them and make sure they are matched well and tightly.

2.2 Please find the following pictures for your reference:
Use HDMI connect to laptop:

1. Connect the laptop.
2. Check the volume control settings.
3. Adjust the settings as needed.

Use HDMI connect to PS4/XBOX:

1. Connect the PS4/XBOX.

Please note that you should choose PCM on your device.
Part 3: USB SD TF Card Connection
Connecting a USB device or TF card to the projector

3.1 You can connect your USB device or TF SD card to the USB port on the side of the projector and use it to project images and other content.

3.2 Connect the USB cable (or USB flash drive or USB memory card reader) to the USB port on the side of the projector.

3.3 Connect the other end of the cable (if applicable) to your device.

3.4 Please find the following pictures for your reference:
Part 4: AV YPbPr Connection

Connecting TV box, DVD etc. to the projector

4.1 You can connect your TV box, DVD to the AV or YPbPr port on the side of the projector.
4.2 Note that the color of the plug should correspond to the color of the interface.
4.3 Click source button and choose AV or YPbPr.
4.4 Please find the following pictures for your reference:
Part 5: Keystone Correction and Focus

5.1 You can use the keystone button on the projector to correct the image shape to a rectangular.
5.2 Please find the following pictures for your reference:
