How to get the keyboard sync with iPad

1. Power on the keyboard by sliding the On/Off to On position. Then press 'fn' and 'c' button together, the blue led light flash, the B-tooth of the keyboard is opened.

2.Turn on the B-tooth of your iPad.

3.Open the iPad B-tooth Search when the B-tooth pair lights twinkling.

4.Then there will be "B-tooth Keyboard" comes up in the searching page. Just select it.

If still can not connect, please contact us by e-mail, we will try our best to solve it.

fn + C

WARNING:

180°

MORE THAN 180°

Do not unfold the case more than 180 degrees

LED indicator

• Blue LED, will flash when searching paring device, will be extinguished after successful pairing.

• Red LED will always be on when charging, and will be off when full of charge.

• Green LED will flash when it is powered off, and it will always be on when it is fully charged.

• When you turn on the keyboard, the green and blue LED will shine about 3 seconds.

Charging

1. Please charge the keyboard with your iPad's charging cable.

2.Fully charge your keyboard, or charge it for more than 3 hours, before you use it for the first time.

The keyboard charging port is TYPE C, the input voltage can not exceed DC-5V, the keyboard will be broken if the voltage exceed the limit.

Installation and removal

1) Removing back protective piece: hold iPad on both sides and use thumbs to gently push off the back cover (see photo.) Cover is held in place by two tabs.

2) Proceed to "peel" cover away from iPad.

3) Take iPad out.

4) Take iPad out upwards.

or

Find out an expired card

Insert the card into the gap and push the card to the cover side a little bit

Slid the card from one side to another

Separate the iPad from the cover easily

60 hours continuous using time when the backlit is off	
8 hours continuous using time when the backlit is on	

Trouble shooting

Any question please email us at once.

Email: greenlawsupport@163.com

Why is the Wireless connection unstable?

When the battery is below 20%, the connection will be unstable. And the wireless function will turn to sleep if you don't press the keyboard beyond 10 minutes, at this situation, you just need to press any key on the keyboard to wake up the wireless get it to work again. (Don't need to re-connect the iPad)

• I can see the keyboard listed after searching wireless devices, but it says connection failed.

Please try to turn OFF the keyboard; delete the Wireless keyboard from search result list on your smart phone/ tablet. Then follow the pairing instructions and try to connect again.

• Can't charge.

red LED does not light after connecting the charging cable: Replace the charging cable and replace the USB power adapter red LED is always on but can't turn on the keyboard/ the red LED of the charging indicator is always on, it can be used normally. After the charging cable is unplugged, it cannot be used: Charge the keyboard for at least 60 minutes, then try again.

What does the LED indicator mean?

• Blue LED, will flash when searching paring device, will be extinguished after successful pairing.

• Red LED will always be on when charging, and will be off when full of charge.

• Green LED shining when it is powered off, and it will always be on when it is fully charged.

My keyboard is too sensitive and always mistype.

In your iPad, there are some smart settings and it impacts to the typing experience and sensitivity of the typing, it sometimes cause the keyboard too sensitive and easily to mistype, you could toggle off the settings in Keyboard(Auto-Correction, Enable Caps Lock, Shortcuts, Smart Punctuation, Split, Key repeat...)

Settings

General

Keyboards

Keyboards

Hardware Keyboard

Text Replacement

Shortcuts

Smart Punctuation

Split Keyboard

Auto-Correction

Enable Caps Lock

Enable Key Flicks

Space Confirmation

Shortcut

The keys types lagging and need press hard to have the letters, sometimes get doubleletters and double spaces.

There are several reasons that can cause this problem:

1. there's a 'KEY REPEAT' in the ipad settings (settings- general-key repeat-off)

2. didn't choose the right language

3. Wireless connection is unstable (maybe caused by lack of power)

4. If you do not press any key for a long time, the keyboard will enter sleep mode and the first key you press will wake up it.

Step 1: Make sure your iPad is fully charged

Step 2: Delete the keyboard connection on iPad (suggest to update iPad system to latest version) Charging light (Red LED on: Charging); Battery light (Green LED on: Full battery charge, RED LED blinking: Low battery)

Step 3: Reboot your iPad and keyboard

Step 4: Reconnect it again
