Normally you do not need to pair the camera and monitor, what you need to do are as follows:

1. Find out the installation place of the camera and the power of reversing light (or ACC).
2. Install the monitor at a suitable place and connect it to the cigarette lighter.

**Feature:**

1. 2.4G Digital wireless technology, no interference and easy installation.
2. High brightness LCD display with built-in wireless receiver.
3. Wireless transmitter can work with any analog backup camera or CCTV surveillance camera.
4. 120 ms time delay only, quick response time like wired backup camera system.
5. Working Frequency: 2400~2483MHz.
6. Image up/down, normal/mirror flip function.
7. IP68 Waterproof HD Color CMOS sensor backup camera
8. Monitor working voltage: DC12V-30V, camera working voltage: DC12V-30V

**Monitor Specifications:**

- Screen Size: 5 inch
- Display Screen: TFT LCD
- Resolution: 480*(RGB)*272
- Brightness: 400cd/m2
- Contrast: 300:1
- Consumption: ≤2W
- Power Supply: DC12V-30V
- Operation Frequency: 2400 ~ 2483MHz
- Line of Sight Range: >150m

**Camera Specifications:**

1. Image Sensor: HD 1/3 Color CMOS
2. Horizontal Resolution: 800 TVL
3. Pixels: 960*576
4. View Angle: 120°
5. Working Voltage: DC12V-30V
6. Waterproof Rate: IP68
7. Operation Frequency: 2400 ~ 2483MHz
8. Line of Sight Range: >150m

**Brief Introduction:**

- Set contrast, brightness, color saturation
- Set horizontal flip and vertical flip

**Pairing**

(The camera and monitor were paired already, you just need to power them.)

Press the "M" button to enter menu. Press "-" or "+", scroll to "PAIR", long press the "M" button.

System Paired

After successful pairing, the system will restart.
**LCD SETTING**

Press the "M" button to enter menu, Press "-" or "+" to scroll to "LCD SETTING", long press "M" button.

**Brightness**
