

Welcome Guide

Vobot Clock

CI-05 / 201743

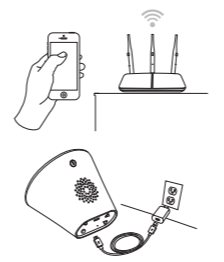

Getting to know Vobot

- Power button**
Press and hold this button for 4 seconds to turn it ON or OFF.
- Touch sensor**
Touch it to activate Alexa.
- Mute / Wi-Fi button**
Adjust Mute & Unmute mode by pressing this button. Press and hold this button for 5 seconds, Vobot will enter Wi-Fi setup mode.

Set up Vobot

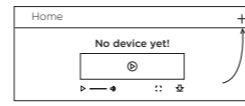

- Internet Condition**
Make sure Wi-Fi is available and start your wonderful experience with Vobot.
- Charge Vobot**
Charge your Vobot with a power adapter (5V/1.5A-2A) and then it will show the display. If not, just press the (▲) power button for 4 seconds to turn it on.
- Vobot Wi-Fi Setup**
You can use either Vobot App or website to set up the device.

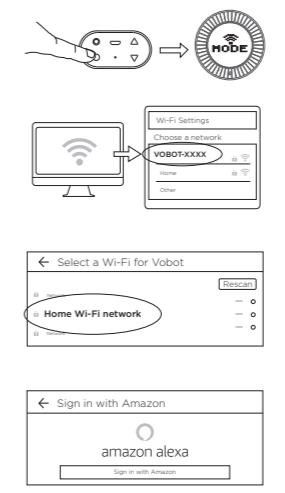

Download the Vobot App on Google Play or App Store.

Open this link in a web browser (Chrome/Safari/Firefox): <https://myvobot.com/>

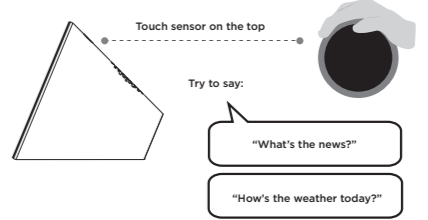

A. In the Home page, click on the [+] sign at the top right.

- If you see "SETUP MODE" on the screen of the Vobot, please go to the next step C. If not, please press and hold the Wi-Fi button at the back of the Vobot for 5 seconds.
- Go to Wi-Fi settings; Connect your computer/phone to your Vobot's hotspot; Return to the Vobot app or myvobot.com, and it will show you a Wi-Fi list.
- Select your in-home Wi-Fi network in the Wi-Fi list and enter your Wi-Fi password. You will hear that "Wi-Fi connected. Ok, now your Vobot is online", if it successfully connects to the Wi-Fi and Internet.
- Athorize the Vobot with Amazon Alexa. Choose [settings]> [authorized with amazon alexa]. Sign in with your Amazon account.
- You may see a reminder which asks you to correct your time zone.

Start your journey with Vobot

Try to say:

- "What's the news?"
- "How's the weather today?"

If Vobot responds correctly, the setup process is completed and Vobot is under your control. If not, please refer to FAQs part.

1. Things to Try

You can set alarm & timer, play music and sleep sounds, check news and weather reports, manage your schedules, add stuffs to your shopping lists and so on with your voice commands.

Alarm & Timer

"Set an alarm for every weekend at 9:00 a.m."
"Set a pizza timer for 10 minutes".

News & Weather

"Play the ABC News".
"What's the weather in Las Vegas?"

Sleep Sounds

"Open Sleep Sounds", "Play rain".
"Set a sleep timer for 30 minutes".

2. Touch & Motion Control

Touch-initiated: Just tap the top and talk.

Timer:

- Set : Tap and say "set a 10 minutes timer".
- Stop : Hold the screen to stop, or tap and say "stop".
- Cancel : Tap and say "cancel my timer".

Alarm:

- Set : Tap and say "set an alarm".
- Snooze: Flip it over for a few seconds, and you will hear "snoozing" if successful.
- Stop : Tap and say "stop", press the "Mute" button, or hold the screen to stop (avoid touching the top of the Vobot which will activate the microphone).
- Cancel : Tap and say "cancel the alarm".
- Stop snoozed alarm : Press the "Mute" button.

3. FAQs

- Fail to connect to Internet**
 - Check your Wi-Fi network available or not.
 - Check your Wi-Fi password correct or not. Then set up Wi-Fi on Vobot again.
 - Try reboot your Vobot and network hardware.
 - Check your procedure of setup by referring to this video via this link: <https://getvobot.com/qa/69> or <https://getvobot.com/qa/224>
- Cannot get voice response**
 - Try to speak more clearly and loudly.
 - Turn up the volume and try again.
 - Unplug the power cord and talk to Vobot.
 - Open this link: <https://alexa.amazon.com> and check the [Settings] > [History] to see whether the voice history exists.
- Cannot get voice activated**
 - Make sure you touch the right place where the touch sensor is embedded. If yes, there will be a sign on the LED screen showing Vobot is under voice control. If not, try it again.
 - Open the App and check the device status. Click on "Settings" in the navigation bar, if it shows "No" at the right side of the "authorize with your Amazon Account", it means you failed to authorize the Vobot with Amazon account and you should try it again.
 - You might be in mute mode (🔇). Under this mode, Vobot cannot get your voice information. Please press the mute button to unmute.
 - Reboot your Vobot.
- Will the alarm go off when the Vobot is not charging at night?**
When the Vobot is in low battery, it will go deep sleeping and wake up before next alarm.
