

## SpaRoom® Aromafier® Instructions

- To get started, push in and down on the back tab of the Aromafier® Base to remove it from the unit.
- Lift out the Vented Plastic Insert to reveal the absorbing pad. Add drops of your choice of essential oil to achieve desired strength directly onto the absorbing pad. Then, replace the Vented Insert.
- Reattach the base to the rest of the unit, making sure the front tab is secured before snapping in the back of the base.
- To use battery power, push in and up on the back tab of the battery cover. Insert two AA batteries into the slots. Replace the battery cover making sure the front tab is secured before snapping the back of the cover into place.
- The included USB cord can also power the unit. Simply plug the cord into any USB port.
- Once powered, press the button on the top front of the Aromafier® to turn the unit on.
- When you want to turn the unit off, simply push the front button a second time.
- Do not oversaturate the refill pad with oil. Replace the refill pad when changing fragrances or after extended use. To store used pads, place in an airtight container or re-sealable plastic bag.
