The IC wired around the column of the mounting plate as picture.

Install "J" .

2.6 Connect the IC wired and Install the Back Panel

Connect the IC wired, and Install the Back Panel, install "L" and "M" .

2.7 Insert Battery and Install Back Battery Cover

Tips:

1. Alkaline batteries are recommend in order to stabilize the power supply,if you don't use alkaline, battery performance will be reduced greatly.
2. All setting will be retain in the memory even if the batteries are complete dead. If batteries are complete dead, using 9v backup battery to unlock the door.

Insert 4pc (AA) 1.5V Alkaline batteries and slide the battery cover back onto the receiver module.

Low Battery Alarm:

You can open your front door with a 9v battery on the instant charging if you forget to replace the low batteries.

3. APP Operation Guide

3.1 Download the APP "TTLock"

Android Mobile Phone--Search "TTLock" from Google Play.
Apple Mobile Phone--please search "TTLock" from App Store.

3.2 Register a new account (phone number or email)

The image shows three sequential screenshots of the registration process in the TTLock app. The first screenshot shows the 'Login' screen with a 'Register' button highlighted in a red box. The second screenshot shows the 'Register' screen with 'Phone' selected, 'United States+1' as the country, and fields for phone number, password, and verification code. The 'Register' button is highlighted in a red box. The third screenshot shows the 'Login' screen with the 'Login' button highlighted in a red box.

3.3 Match the Smart Lock with APP

When matching, please follow the prompt steps of the program, you need to touch the screen, match the blue icon lock , and set the name for the lock. Such as the front door.

The image shows three sequential screenshots of the Smart Lock matching process in the TTLock app. The first screenshot shows the 'TTLock' screen with a large circular icon containing a plus sign. Below it, a message reads: 'The Phone needs to be within 2 meters of the Smart Lock during the Pairing process.' The second screenshot shows the 'Nearby Locks' screen with a list of three locks: 'M203T_4878ca', 'S210_465039', and 'S200BL_46a647'. The third screenshot shows the 'Edit Name' screen with the name 'The front door' entered.

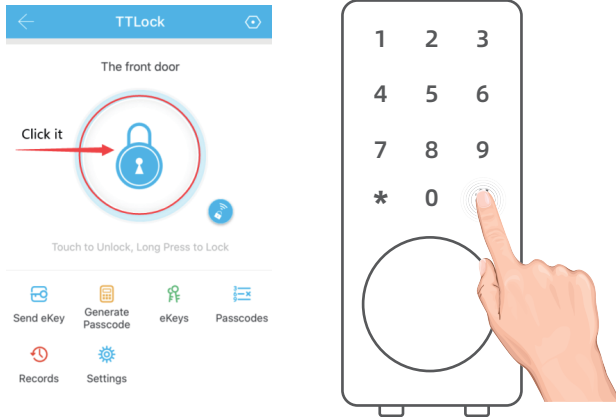

3.4 APP function introduction

3.4.1 Lock/Unlock (APP/Keypad)

Via APP: Touch to unlock, long press to lock.

Note: Please keep your phone near the door lock within 5 meters.

Via Keypad: Enter the passcode then press “#” to unlock. Long press “#” and hold 2s to lock.

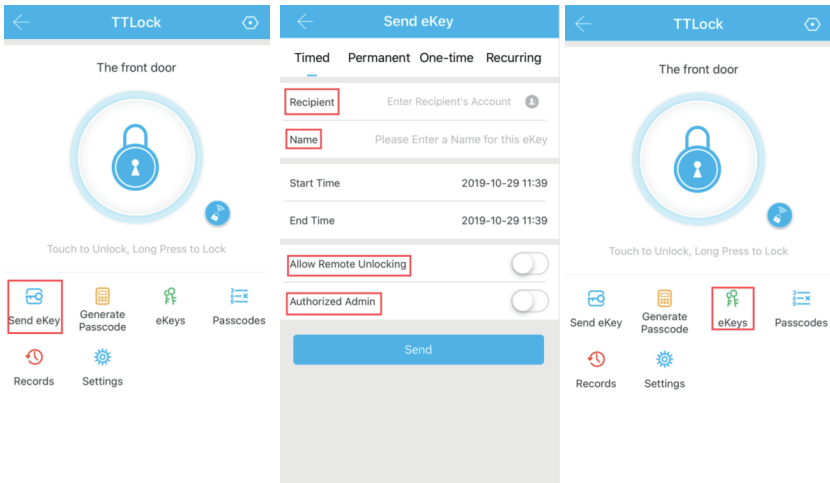

3.4.2 Sent Ekey

You can add multiple accounts on the app. Such as your family member.

You can authorize the Recipient to unlock/lock via the APP. The recipient needs to download the APP.

Note: This operation need to be connected to Bluetooth and network, the shared eKey will be stored in “eKeys” .

3.4.3 Generate Passcode

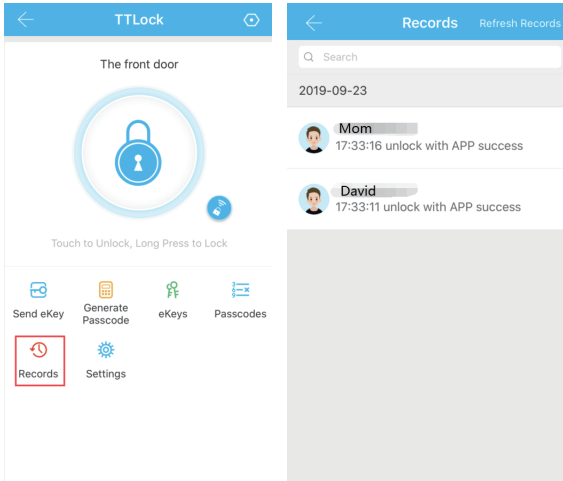

You can set a variety mode of password to unlock, or share them with others. Yourself or the recipient of passcode to unlock by entering the passcode on the keypad.

Note: This operation need to connect Bluetooth or gateway. The passcode will be stored in “Passcodes” .

3.4.4 Records

It records who comes and goes, and when. For 24/7 access logs, get all records about the door unlock/ lock anytime and anywhere.

3.4.5 Settings

For the Bluetooth lock function setting:

1. Basics

- Battery Percentage.
- Lock name.
- Admin Passcode (You reset your admin passcode on the APP)

2. Unlock Remotely

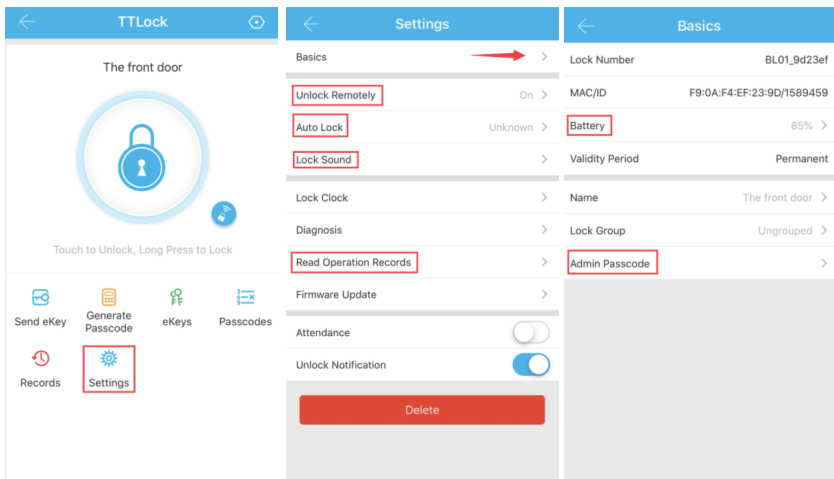

(Need to buy a gateway, you can remotely control your lock after pairing.)

3. Auto Lock (5s,10s,15s,30s,60s,Custom)

4. Lock Sound

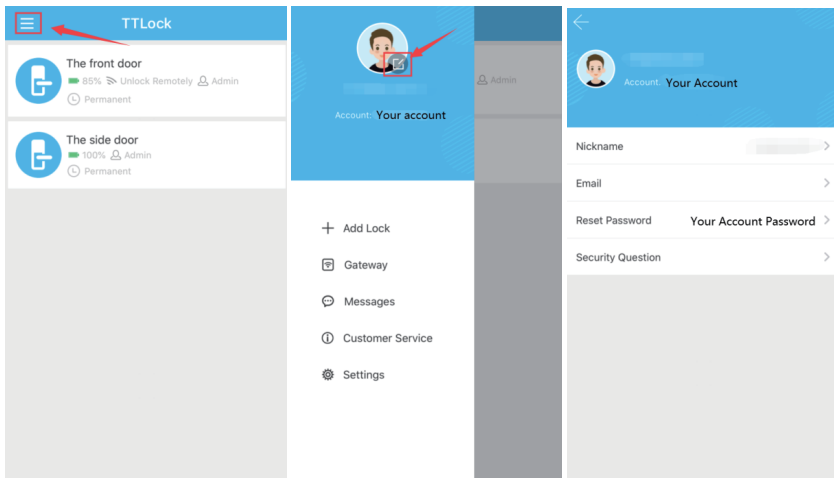

5. Read Operation Record, etc.

Note: These operations require Bluetooth to be turned on and a smart lock is connected.

3.5 APP Account Management or Other Operation

3.5.1 How do I reset or change my APP account login password?

3.5.2 How to match a Wi-Fi gateway to APP? (If you have already purchased a gateway.)

4. How to unlock/lock my door lock with the SMART WATCH?

Apple watch
Android watch

Support Smart Watch (iwatch or Android watch) to lock/unlock.

If the watch is connected to the phone, but it cannot search the "TTLock" App. Try to log in to the home page at your phone app and refresh, then check in the watch. If all settings are normal but can't lock/unlock. Opening the "TTLock" App in your phone to check if the key is in a normal state.

Note: All the operations, your watch and mobile phone require a certain range, the mobile phone network and Bluetooth need to remain connected.

5. Under what situations will the smart lock sound an alarm?

5.1 The smart lock sounds an alarm when the battery is low.

Solution: Please replace the battery or temporarily use the 9V backup battery.

5.2 The Anti-theft Alarm Prompt button is not tightly pressed.

Solution: Always press and hold the alarm button on the front panel during installation, otherwise it will always beeping when the battery is inserted.

5.3 When someone breaks into your home or the lock is loose.

Solution: You will find a record of illegal operation in the record. Then you can check if the lock is illegal operation or Loose state.

5.4 If you want the smart lock to never sound an alarm.

Solution:

Turn off the anti-theft alarm: Enter "*32# (admin password) #0#" on the keypad.

Turn on the anti-theft alarm: Enter "*32# (admin password) #1#" on the keypad.

Note: Keep the alarm button on the front panel always pressed when install, otherwise it will always beeping when put in the battery.

Anti-theft Alarm Prompt

6. If the smart lock is in a non-addable state (the lock name is gray on the APP or cannot be find)

Solution: Please press and hold the reset button 3s-5s until you hear the sound "DiDi" and try to connect again.

Note: This operation IC wired and battery need to be installed. This button is in the front Keypad panel.

7. FQA

The solution for details of FQA, please refer to the Instructions Guide. If necessary, please connect with our customer service.
