butler motorcycle maps

Butler Motorcycle Maps identify the most dramatic and thrilling rides in each state. The experts at Butler have ridden and researched each and every road segment detailed on these maps. No matter what you ride, from sport bike enthusiast to dual sport adventurer, chopper rider to two up tourers, the Butler team has you covered.

The best segments of road in the state are rated from G1 to G3, providing focused information about the riding experience. The rating system is based on features such as high mountain passes, deep canyons, sweepers, switchbacks, twisties, and remarkable scenery.

The rides designated as Lost Highways are stretches of road that seem lost in time. Traveling through untouched landscapes void of population, the roads' faded centerlines and crumbling shoulders are the only remnants of a purposeful past.

The Paved Mountain Trails are paths of pavement through remote forests and mountain ranges. All exceptionally tight, twisty, and remote, these stunning routes have even the most seasoned riders coming back for more.

State Motorcycle Touring Roads

historic mining camps & cliff dwellings

The Mining Camps Speak

This book is for people who have visited ghost town sites and were disappointed because there was "nothing left." It takes up where other ghost town guidebooks end. Readers are guided around a site in Sherlock Holmes fashion and use techniques of historical sleuths to identify forgotten pieces of the past—even if all that's left is rubble. It truly is a whole new way to explore ghost towns. Anyone who has purchased ghost town books in the past might well want to add this book to their collection. Its techniques are valid in any western state, including Alaska. Nearly 400 black-and-white photographs and antique engravings. 304 pages.

The Cliff Dwellings Speak

The long awaited sister book to *The Mining Camps Speak* is now available. Like its bestselling sibling, *The Cliff Dwellings Speak* empowers backcountry travelers to decipher remnants from the past, but the focus is the ancient cliff dwellings of the Greater American Southwest instead of ghost towns. This book helps visitors understand the ancient southwestern ruins by including clues for interpreting cliff dwellings in Colorado, Utah, Arizona, New Mexico, and even into northern Mexico. Thoroughly checked by twelve southwestern archaeologists and eight of the modern Pueblos. Includes more than 400 black-and-white photographs and antique engravings. 360 pages.
