

Get started guide Mouse

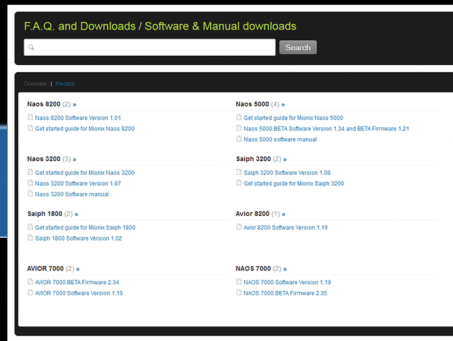

INSTALLATION

The Mionix Mouse is a full-speed USB gaming mouse. The mouse is plug and play, all you need to do is connect the mouse into a free USB port, the LED-lights on the mouse will light up and the mouse is ready to use. Your operating system should automatically recognize the mouse without restarts or further actions required.

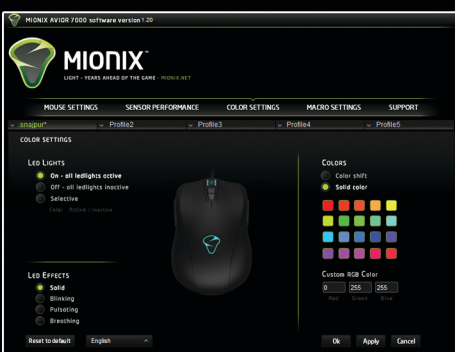

DOWNLOAD

Go to <http://support.mionix.net/> and download the Mouse software, you will now have access to setup and customize your mouse. To install the software, execute the setup.exe file and the installation will start. When the installation is complete, a small Mionix symbol will appear in your taskbar in the right corner of the screen. Click on the symbol to open the software window.

CUSTOMIZATION

In the Mionix software you can customize your Mionix mouse, with customizable lightning system, DPI adjustment, lift off distance, save your different profiles and much much more. Good luck and happy fragging.

SUPPORT
