Important Safety Information

Please follow the safety precautions and read these instructions carefully before using it for the first time.

**Prohibition**

- Do not insert fingers or any objects into the air inlet or air outlet. Otherwise, internal parts may be touched and cause electric shock or damage.

- Check if the voltage indicated on the back of the product matches the local voltage. Use of universal sockets or devices that exceed the specified voltage may cause overheating and fire accidents.

- Before connecting the appliance to the mains supply, please check the plug, power cord, and the product itself. Do not use bundled wires when using this unit. Damaged wires may cause electric shock and short circuit or a fire accident. Prohibit cutting, rethreading, excessively twisting, twisting, screwing and wiring wires, or installing on electrical outlets put heavy things.

- Do not modify or repair the product and accessories on your own. If there are faults in the product, disconnect the power plug and contact customer service for repair.

- This appliance is not a substitute for proper ventilation, regular vacuum cleaning or use of an extractor hood or fan while cooking.

- Do not use indoor smoke-type insect repellents or in places with oily residues, burning incense or chemical fumes.

- Always unplug the appliance before you clean it. Otherwise, the air purifier may suddenly operate, resulting in electric shock and overheating, and even cause a fire accident.

**Caution**

- When connecting the appliance to the mains supply, make sure to use dry hands to hold the end of the plug. Otherwise, electric shock may occur.

- Periodically remove dust from the power plug. If dust accumulates on the power plug, its moisture may damage the insulation of the plug, resulting in fire accidents. Unplug the power plug and wipe it with a dry cloth. Do not use a damp cloth!

- Do not use near flammable gases and material such as insecticides, fragrances, and candles. Fire may occur.

- When connecting the appliance to the mains supply, make sure to use dry hands to hold the end of the plug. Do not pull the power cord to cut off the power supply. Otherwise, electric shock, short circuit, or fire may occur.

- If the air purifier is used with a heater, the room must be ventilated. Otherwise carbon monoxide poisoning may occur. The appliance does not remove carbon monoxide (CO).

- If the appliance is not used for a long time, it should be unplugged...

- Before the air purifier is started, please plug the plug fully into a power outlet. Failure to fully insert the plug into the socket may result in electric shock and overheating and even cause a fire accident.

- If this air purifier causes interference to radio or television, unplug the air purifier. If the interference persists, please contact the nearest service center. If the interference increases, contact the nearest service center.

- Always lift or move the appliance by the handgrips at two sides of appliance.

**Important Safety Information**

- Do not use corrosive cleaners, volatile fluids and/or detergents when cleaning the product. Otherwise, the air purifier may be damaged or even cause a short circuit, resulting in an electric shock or fire accident.

- Do not use this appliance when you have used indoor smoke-type insect repellents or in places with oily residues, burning incense or chemical fumes.

- Do not modify or repair the product and accessories on your own. If there are faults in the product, disconnect the power plug and contact customer service for repair.

- Always unplug the appliance before you clean it. Otherwise, the air purifier may suddenly operate, resulting in electric shock and overheating, and even cause a fire accident.

- The warranty will be invalid if the product is not used properly. Our company will not be responsible for damages caused by improper use.

- For the best result, leave at least 35cm free space each side of the appliance.

- This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

The warranty will be invalid if the product is not used properly. Our company will not be responsible for damages caused by improper use.

Product Features

Integrating multiple functions

- High-efficiency Purification of PM 2.5, Smog, Pollen and Other Particulate Pollutants.
- Removal of HCHO, Toluene, Dimethylbenzene, C6H6, VOC, etc.
- 5 - Gear Wind Speed Design
- Timer Setting
- Replacement of Filter Remind
- Availability of Multiple Operation Modes, e.g. Manual, Auto and Sleep Mode
- Sensor Detection of Indoor Temperature and Humidity
- Childproof Lock Function
- Real-time Display of PM2.5 Value

Unique 3 Purification Technologies

Pre–filter  →  High Efficiency Particulate Air Filter  →  Modified activated carbon

Pre–filter
- Block the hairs, fibers, big particulate matters, scurf, etc. It can be washed regularly.

HEPA layer
- Efficiently filter out the particles as small as 0.01microns, e.g. PM2.5, smog, pollen, acarid and other pollutants.

Improved Activated Carbon
- High-quality modified activated carbon and catalyst are adopted, and they are modified with special proprietary technology, and can efficiently purify methanol, benzene series, VOC and other odorous pollutants.

[Note] High-efficiency activated carbon and High-efficiency HEPA are incorporated in the same filter.
Operation Instructions

Start

1. Power on the appliance, and there will have a “tinkle” sound.
2. Press the power switch button to start up the appliance.

Installation of Filters

1. Place your fingers on the hand clasp position of filter cover, and pull it outwards gently.
2. Move upward to remove the filter cover.
3. Take out the new filters with plastic film from the appliance.
4. Remove all packaging films on the filters.

Precautions for use

- All filters have been installed in this air purifier.
- Check filters are installed properly.
- Check filter handle is toward you.

Installation of Filters

1. Install the filters.
2. Install the filter covers.

Start

1. The screen will light up and the appliance start running.
2. The power on the appliance, and there will have a “tinkle” sound.
3. Press the power switch button to start up the appliance.

<td>Standby status, press “Speed” Button once, the wind speed gear plus +1 gear. Gear 1~5 is a cycle. When the wind speed is settled, and displayed for 3s, display switches to PM2.5 display status. In Auto mode, press the “Velocity” button to switch to manual mode.</td>
</tr>
</tbody>
</table>

Cleaning and Maintenance

The power plug must be unplugged before maintenance of the machine.

1. Cleaning of appliance body
   1) Wipe off the stain with soft cloth.
   2) The stubborn stain that cannot be wiped off easily can be wiped off with soft cloth dipped with an appropriate amount of mild detergent.

Note: Do not scratch the appliance shell with a hard object; Please read carefully and follow the Instruction Manual to clean the appliance parts.

2. Cleaning and replacement of filter
   1) The user will be reminded of replacement of filter by built-in program; however, the service cycle of filter may be different according to the pollution degree of actual application environment, and the filter can be replaced in time according to the volume of sound and odor given off by the appliance.

Suggestions: Clean the filter at an interval of 1 month; if the operating environment is poor, increase the cleaning frequency.

2) When there is dust on the surface of composite filter, remove it with dust collector, so as to extend the usage period of filter. (It is advised to clean the filter at an interval of 1 month)

<table>
<thead>
<tr>
<th>Composite Filter</th>
<th>Replacement Period</th>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The filter shall be replaced at an interval of about 6 months.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Absorb the emission amount of 3 cigarettes every day.</td>
<td></td>
</tr>
</tbody>
</table>

According to the application place and use method (e.g. the family where there are many cigarette smokers), the replacement period of filter may be shortened; in a word, please replace the filter when the filtration effect is poor.

The used filter shall be disposed of as non–combustible refuse.

Replacement of Filters

Replacement of Filter

1. Put your hand on the hand clasp position of filter mesh cover, and pull it outwards gently.
2. Move upward to remove the filter mesh cover.
3. Remove all packaging films on filter meshes.
4. Take out the new filter meshes with plastic film in the machine.
5. Assemble the new filter meshes.
6. Assemble the filter mesh cover and reset the service life of filter mesh (details can be seen on Page 10 for operation of filter mesh service life reset key).
Cleaning of Primary Filter

1. Put your hand on the hand clasp position of filter mesh cover, pull it outwards gently, and then move upward to remove the filter mesh cover.

2. Take out the primary filter mesh in the machine.

3. Clean the primary filter mesh.

4. Reassemble the primary filter mesh and filter mesh cover into the machine.

Replacement of Sensor

1. Pry up the sensor cover with a straight screwdriver.

2. Take down the sensor cover.

3. Pull the metal handle to pull out the sensor module.

4. Pull out the connecting terminal from the old sensor module and replace it with a new sensor module.

5. Put back the sensor module into the machine cavity and cover it.

Replacement of Sensor (sensor should be replaced by professionals)

1. This product has passed strict quality inspection.
2. In case of performance and function fault under the condition of normal use within warranty period of the product, our company will be responsible for repairing it for free and for replacing it if the machine cannot be repaired. In the event of failure for the following reasons, our company will provide paid repair service:
   1) Poor performance and machine fault which occurs after the warranty period expires.
   2) Machine fault caused by consumer intentionally or due to negligence.
   3) Fault that occurs when the machine is repaired in the sales service center or agent not designated by our company.
   4) Fault that is caused by power supply nonconformity or poor quality of power socket (irrelevant to warranty period).
   5) Product fault or defect caused by natural disaster.
