## Definitions of Notes

We use the following symbols and conventions throughout this User's Guide:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![WARNING]</td>
<td>WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.</td>
</tr>
<tr>
<td>![CAUTION]</td>
<td>CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.</td>
</tr>
<tr>
<td>![IMPORTANT]</td>
<td>IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.</td>
</tr>
<tr>
<td>![NOTE]</td>
<td>NOTE specifies the operating environment, conditions for installation, or special conditions of use.</td>
</tr>
<tr>
<td>![Tips]</td>
<td>Tips icons indicate helpful hints and supplementary information.</td>
</tr>
<tr>
<td>![Electrical Hazard]</td>
<td>Electrical Hazard icons alert you to possible electrical shock.</td>
</tr>
<tr>
<td>![Bold]</td>
<td>Bold style identifies buttons on the machine's control panel or computer screen.</td>
</tr>
<tr>
<td>![Italics]</td>
<td>Italicized style emphasizes an important point or refers you to a related topic.</td>
</tr>
<tr>
<td>![Courier New]</td>
<td>Courier New font identifies messages shown on the machine's LCD.</td>
</tr>

Introduction to Your Brother Machine

- Before Using Your Machine
- Control Panel Overview
- Touchscreen LCD Overview
- Settings Screen Overview
- Navigate the Touchscreen
- Set the Default Screen of the Feature Mode
- Access Brother Utilities (Windows®)
- USB / Ethernet Port Locations on Your Brother Machine
Before Using Your Machine

Before attempting any printing operation, confirm the following:

- Make sure you have installed the Brother software and drivers.
- For USB or network cable users: Make sure the interface cable is physically secure.

Selecting the correct type of paper

For high quality printing, it is important to select the correct type of paper. Be sure to read the information about acceptable paper before buying paper, and to determine the printable area depending on the settings in the printer driver.

Simultaneous printing, scanning and faxing

Your machine can print from your computer while sending or receiving a fax into memory or while scanning a document into the computer. Fax sending will not be stopped during printing from your computer. However, when the machine is copying or receiving a fax on paper, it pauses the printing operation, and then continues printing when copying or fax receiving has finished.

Firewall (Windows®)

If your computer is protected by a firewall and you are unable to network print, network scan, or PC-FAX, you may need to configure the firewall settings. If you are using the Windows® Firewall and you installed the drivers using the steps in the installer, the necessary firewall settings have been already set. If you are using any other personal firewall software, see the User’s Guide for your software or contact the software manufacturer.

Related Information

- Introduction to Your Brother Machine
Control Panel Overview

1. **NFC (Near Field Communication) symbol**
   If your Android™ device supports the NFC feature, you can print from your device or scan documents to your device by touching it to the NFC logo on the control panel.

2. **Touchscreen Liquid Crystal Display (LCD)**
   Access menus and options by pressing them on the touchscreen.

3. **Menu buttons**
   - **Back**
     Press to go back to the previous menu.
   - **Home**
     Press to return to the Home screen.
   - **Cancel**
     Press to cancel an operation.

4. **LED Power Indicator**
   The LED lights up depending on the machine’s power status.
   When the machine is in Sleep Mode, the LED blinks.

5. **Power On/Off**
   Press \(\text{\textbf{on}}\) to turn on the machine.
   Press and hold down \(\text{\textbf{on}}\) to turn off the machine. The touchscreen displays \(\text{[Shutting Down]}\) and stays on for a few seconds before turning itself off. If you have connected an external telephone or TAD, it is always available.
   If you turn off the machine using \(\text{\textbf{on}}\), it will still clean the print head periodically to maintain print quality. To prolong print head life, provide better ink efficiency, and maintain print quality, keep your machine connected to a power source at all times.

**Related Information**

- Introduction to Your Brother Machine
• Near-Field Communication (NFC)
Touchscreen LCD Overview

You can switch Home screens by pressing ◀ or ▶.

From the Home screens, you can access the Wi-Fi setup, Shortcuts, Ink levels, and Settings screens.

**Home Screen**

This screen shows the machine’s status when the machine is idle. When displayed, it indicates that your machine is ready for the next command.

1. **Date & Time**
   
   Displays the date and time set on the machine.

2. **Quiet Mode**
   
   This icon appears when the [Quiet Mode] setting is set to [On].
   
   The Quiet Mode setting can reduce printing noise. When Quiet Mode is turned on, the print speed becomes slower.

   **US only:** While [Demo] appears, (Quiet Mode) is not displayed.

3. **[Shortcuts]**

   Create Shortcuts for frequently-used operations, such as sending a fax, copying, scanning, Web Connect and Apps services.

   - There are three Shortcuts screens. You can program four shortcuts on each screen.

4. **Wireless Status**

   Each icon in the following table shows the wireless network status:
Your machine is not connected to the wireless access point/router.
Press this button to configure wireless settings. For more detailed information, see the Quick Setup Guide.

The wireless network is connected.
A three-level indicator in each of the Home screens displays the current wireless signal strength.

The wireless access point/router cannot be detected.

The wireless setting is disabled.

---

You can configure wireless settings by pressing the Wireless Status button.

5. **[Settings]**
Press to access the [Settings] menu.

6. **[Ink]**
Displays the approximate available ink volume. Press to access the [Ink] menu.
When an ink cartridge is near the end of its life or having a problem, an error icon is displayed on the ink color.

7. **Modes:**
Press to switch to each mode.

8. **Information icon**

New information from Brother appears in the information bar when the notification settings such as [Message from Brother] and [Firmware Auto Check] are set to [On].

(Internet connection is needed, and data rates may apply.)
Press  to view the details.

9. **Warning icon**

The warning icon  appears when there is an error or maintenance message; press  to view the details, and then press  to return to the Home screen.

Settings Screen Overview

The touchscreen shows the machine’s status when you press [Settings]. Use the Settings menu to access all of your Brother machine’s settings.

1. [Maintenance]  
   Press to access the following menus:
   - [Improve Print Quality]
   - [Print Head Cleaning]
   - [Ink Volume]
   - [Ink Cartridge Model]
   - [Print Setting Options]

2. [Quiet Mode]  
   Displays the Quiet Mode setting. Press to access the [Quiet Mode] menu.
   When this menu is set to [On], 📡 is displayed on the Home screen. (US only: when 📡 is not displayed.)

3. [Fax Preview]  
   Displays the Fax Preview setting. Press to access the [Fax Preview] menu.

4. Receive Mode  
   Displays the current Receive Mode.

5. [Date & Time]  
   Displays the date and time. Press to access the [Date & Time] menu.

6. [Wi-Fi]  
   Press to set up a wireless network connection.
   If you are using a wireless connection, a three-level indicator 📡 on the screen displays the current wireless signal strength.

7. [Tray Setting]  
   Press to access the [Tray Setting] menu.
   Use options in the Tray setting menu to change the paper size and type.

8. [All Settings]  
   Press to access a menu of all of your machine’s settings.

Access Brother Utilities (Windows®)

**Brother Utilities** is an application launcher that offers convenient access to all Brother applications installed on your computer.

1. Do one of the following:
   - **Windows® 7**
     Click (Start) > All Programs > Brother > Brother Utilities.
   - **Windows® 8**
     Tap or click (Brother Utilities) either on the Start screen or the desktop.
   - **Windows® 8.1**
     Move your mouse to the lower left corner of the Start screen and click (if using a touch-based device, swipe up from the bottom of the Start screen to bring up the Apps screen).
       When the Apps screen appears, tap or click (Brother Utilities).
   - **Windows® 10**
     Click > Brother > Brother Utilities.

2. Select your machine.

3. Select the operation you want to use.

- Uninstall the Brother Software and Drivers (Windows®)
Uninstall the Brother Software and Drivers (Windows®)

1. Do one of the following:
   - Windows® 7
     Click (Start) > All Programs > Brother > Brother Utilities.
   - Windows® 8
     Tap or click (Brother Utilities) either on the Start screen or the desktop.
   - Windows® 8.1
     Move your mouse to the lower left corner of the Start screen and click (if using a touch-based device, swipe up from the bottom of the Start screen to bring up the Apps screen).
     When the Apps screen appears, tap or click (Brother Utilities).
   - Windows® 10
     Click > Brother > Brother Utilities.

2. Click the drop-down list, and then select your model name (if not already selected). Click Tools in the left navigation bar, and then click Uninstall.
   Follow the instructions in the dialog box to uninstall the software and drivers.

Related Information

- Access Brother Utilities (Windows®)
USB / Ethernet Port Locations on Your Brother Machine

The USB and Ethernet ports are located inside the machine.

- When connecting the USB or Ethernet cable, follow the instructions in the installation process.
- To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model’s Downloads page on the Brother Solutions Center at support.brother.com.

1. Place both hands under the plastic tabs on both sides of the machine to lift the scanner cover (1) into the open position.

2. Locate the correct port (based on the cable you are using) inside the machine as shown.

3. Gently close the scanner cover using both hands.

   Carefully guide the cable through the cable channel and out the back of the machine.

- Load Legal Size Paper in the Paper Tray
- Load Photo Paper in the Paper Tray
- Load Envelopes in the Paper Tray
Load Cut-Sheet Paper or Photo 2L Paper in the Paper Tray

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD asking if you want to change the paper type and paper size.
- Load only one size and type of paper in the paper tray at a time.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine.

3. Open the output paper tray cover (1).

4. Gently press and slide the paper width guides (1) and then the paper length guide (2) to fit the paper size.
5. Fan the stack of paper well to avoid paper jams and misfeeds.

Always make sure the paper is not curled or wrinkled.

6. Gently load paper in the paper tray with the printing surface **face down**.

Make sure the paper is flat in the tray and the paper length guide (1) touches the edges of the paper.
IMPORTANT

- Be careful not to push the paper in too far; it may lift at the back of the tray and cause paper feed problems.
- Loading more than 20 sheets of Photo 2L (5" x 7")/(13 x 18 cm) paper may cause paper jams.

To add paper before the tray is empty, remove the paper from the tray and combine it with the paper you are adding. Always fan the stack of paper well to prevent the machine from feeding multiple pages.

7. Gently adjust the paper width guides (1) to fit the paper.
   Make sure the paper width guides touch the edges of the paper.

8. Close the output paper tray cover.

9. Slowly push the paper tray completely into the machine.

10. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

Load Envelopes in the Paper Tray

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD asking if you want to change the paper type and paper size.
- You can load envelopes in a variety of sizes. See Related Information: Paper Type and Paper Size for Each Operation.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.
- Before loading envelopes in the tray, press the corners and sides of the envelopes to make them as flat as possible.

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine.

3. Open the output paper tray cover (1).

4. Load up to 10 envelopes in the paper tray with the printing surface face down. Loading more than 10 envelopes may cause paper jams.
5. Gently press and slide the paper width guides (1) and paper length guide (2) to fit the size of the envelopes. Make sure the envelopes are flat in the tray.

**IMPORTANT**

If envelopes are "double-feeding," load one envelope in the paper tray at a time.

6. Close the output paper tray cover.

7. Slowly push the paper tray completely into the machine.
8. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

- Paper Type and Paper Size for Each Operation
Load Paper in the Manual Feed Slot

Load special print media in this slot, **one sheet of paper** at a time.

The machine automatically turns on Manual Feed mode when you put paper in the manual feed slot.

1. Open the manual feed slot cover.

2. Lift up the paper support.

3. Slide the manual feed slot paper guides to fit the width of the paper you are using.

4. Load only **one sheet of paper** in the manual feed slot with the printing surface **face up**.
When using envelopes, load the envelopes with the printing surface **face up** and the flap on the left as shown in the illustration.

**IMPORTANT**

- **DO NOT** load more than **one sheet of paper** in the manual feed slot at any time. Doing this may cause a paper jam. When printing multiple pages, do not feed the next sheet of paper until the LCD displays a message instructing you to feed the next sheet.

- **DO NOT** load paper in the manual feed slot when you are printing from the paper tray. Doing this may cause a paper jam.
5. Using both hands, push one sheet of paper into the manual feed slot until the front edge touches the paper feed rollers. Let go of the paper when you hear the machine pull it. The LCD displays [Manual Feed Slot ready]. Read the instruction displayed on the LCD, and then press [OK].

![Image showing how to load paper](image)

When loading an envelope, or a sheet of thick paper, push the envelope into the manual feed slot until you feel the paper feed rollers pull it.

6. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

![Image showing the paper support and flap](image)

- If the document does not fit on one sheet, the machine will prompt you to load another sheet of paper. Place another sheet of paper in the manual feed slot, and then press [OK] on the machine’s control panel.
- Make sure printing has finished before you close the manual feed slot cover.
- When paper is placed in the manual feed slot, the machine always prints from the manual feed slot.
- The machine will eject paper loaded in the manual feed slot while a test page, fax, or report is being printed.
- The machine will eject paper loaded in the manual feed slot during the machine’s cleaning process. Wait until the machine finishes its cleaning, and then load paper in the manual feed slot.

Change the Paper Size and Paper Type

Set the Paper Size and Paper Type settings for the paper tray.

- To get the best print quality, set the machine for the type of paper you are using.
- When you change the size of the paper you load in the tray, you must change the Paper Size setting on the LCD at the same time.

1. Press [Settings] > [All Settings] > [General Setup].
2. Press [Paper Type].
3. Press ▲ or ▼ to display the paper type options, and then press the option you want.
4. Press [Paper Size].
5. Press ▲ or ▼ to display the paper size options, and then press the option you want.
6. Press .

The machine ejects paper with the printed surface face up onto the paper tray at the front of the machine. When you use glossy paper, remove each sheet at once to prevent smudging or paper jams.

Change the Check Paper Size Setting

If this setting is set to [On] and you pull the paper tray out of the machine, the LCD displays a message asking if you want to change the Paper Size and Paper Type settings.

The default setting is [On].

1. Press [Settings] > [All Settings] > [General Setup].
2. Press ▲ or ▼ to display the [Check Paper] option, and then press it.
4. Press .

Related Information

- Paper Settings
- Load Cut-Sheet Paper or Photo 2L Paper in the Paper Tray
- Load Photo Paper in the Paper Tray
- Load Envelopes in the Paper Tray
- Error and Maintenance Messages
Acceptable Paper and Other Print Media

The print quality can be affected by the type of paper you use in the machine. To get the best print quality for the settings you have selected, always set the Paper Type to match the type of paper you load.

You can use plain paper, inkjet paper (coated paper), glossy paper, recycled paper and envelopes. We recommend testing various paper types before buying large quantities.

For best results, use Brother paper.

- When you print on inkjet paper (coated paper) and glossy paper, be sure to select the proper print media in the Basic tab of the printer driver or in the Paper Type setting on the machine.
- When you print on Brother Photo paper, load one extra sheet of the same photo paper in the paper tray.
- When using photo paper, remove each sheet at once to prevent smudging or paper jams.
- Avoid touching the printed surface of the paper immediately after printing; the surface may not be completely dry and may stain your fingers.

</tr>
</tbody>
</table>

Related Information

- Acceptable Paper and Other Print Media
Handle and Use Print Media

- Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.
- Avoid touching the shiny (coated) side of photo paper.
- Some envelope sizes require that you set margins in the application. Make sure you do a test print first before printing many envelopes.

**IMPORTANT**

DO NOT use the following kinds of paper:
- Damaged, curled, wrinkled, or irregularly shaped

![](image)

1. 0.08 in. (2 mm) or greater curl may cause jams to occur.
- Extremely shiny or highly textured
- Paper that cannot be arranged uniformly when stacked
- Paper made with a short grain

DO NOT use envelopes that:
- Are loosely constructed
- Have windows
- Are embossed (have raised writing on them)
- Have clasps or staples
- Are pre-printed on the inside
- Are self-adhesive
- Have double flaps

![Self-adhesive Double flaps](image)

You may experience paper feed problems caused by the thickness, size and flap shape of the envelopes you are using.

<tr>
<td>Paper Weight</td>
<td>17 to 24 lb (64 to 90 g/m²)</td>
</tr>
</tbody>
</table>

1 Documents that are longer than 11.7 in. (297 mm) must be fed one page at a time.

**IMPORTANT**

- DO NOT pull on the document while it is feeding.
- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper clipped, pasted or taped.
- DO NOT use cardboard, newspaper or fabric.
- Make sure documents with correction fluid or written in ink are completely dry.

1. Lift up and unfold the ADF document support (1).

2. Fan the stack of paper well to avoid paper jams and misfeeds.

3. Adjust the paper guides (1) to fit the document size.

4. Place your document, **face down, top edge first** in the ADF underneath the paper guides until you feel the document touch the feed rollers and the LCD displays **[ADF Ready]**.

**IMPORTANT**

DO NOT leave any documents on the scanner glass. If you do this, the ADF may jam.

   To get the best print quality for the settings you have selected, always set the Media Type option to match the type of paper you load.

6. Click the Paper Size drop-down list, and then select your paper size.
7. Select the Borderless check box, if needed.
8. For Color Mode, select the Natural or Vivid option.
9. In the Orientation field, select the Portrait or Landscape option to set the orientation of your printout.

   If your application contains a similar setting, we recommend that you set the orientation using the application.

10. Type the number of copies (1-999) you want in the Copies field.
11. Change other printer settings if needed.
12. Click OK.
13. Complete your print operation.

Print on Both Sides of the Paper Automatically (Automatic 2-sided Printing) (Windows®)

1. Select the print command in your application.
2. Select Brother MFC-XXXX Printer (where XXXX is the name of your model), and then click the printing properties or preferences button. The printer driver window appears.
3. Click the Basic tab.
4. In the Orientation field, select the Portrait or Landscape option to set the orientation of your printout.

   If your application contains a similar setting, we recommend that you set the orientation using the application.
5. Click the 2-sided / Booklet drop-down list, and then select 2-sided.
6. Click the 2-sided Settings button.
7. Select one of the options from the 2-sided Type menu.

   When 2-sided is selected, four types of 2-sided binding are available for each orientation:

<table>
<thead>
<tr>
<th>Option for Portrait</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long Edge (Left)</td>
<td><img src="https://via.placeholder.com/150" alt="Diagram" /></td>
</tr>
<tr>
<td>Long Edge (Right)</td>
<td><img src="https://via.placeholder.com/150" alt="Diagram" /></td>
</tr>
</tbody>
</table>
8. Select the **Binding Offset** check box if you want to specify the offset for binding in inches or millimeters.

9. Click **OK** to return to the printer driver window.

10. Change other printer settings if needed.

> The Borderless feature is not available when using this option.

11. Click **OK** again, and then complete your print operation.
Related Information

- Print as a Booklet Automatically (Windows®)
Print as a Booklet Automatically (Windows®)

Use this option to print a document in booklet format using 2-sided printing. The document's pages will be arranged according to the correct page number and will allow you to fold at the center of the print output without having to change the order of the printed pages.

- Make sure the jam clear cover is closed.
- If paper is curled, straighten it and put it back in the paper tray.
- Use regular paper. DO NOT use bond paper.
- If the paper is thin, it may wrinkle.

1. Select the print command in your application.
2. Select Brother MFC-XXXX Printer (where XXXX is the name of your model), and then click the printing properties or preferences button.
   The printer driver window appears.
3. Click the Basic tab.
4. In the Orientation field, select the Portrait or Landscape option to set the orientation of your printout.
   If your application contains a similar setting, we recommend that you set the orientation using the application.
5. Click the 2-sided / Booklet drop-down list, and then select the Booklet option.
6. Click the 2-sided Settings button.
7. Select one of the options from the 2-sided Type menu.
   There are two types of 2-sided binding directions available for each orientation:

<table>
<thead>
<tr>
<th>Option for Portrait</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Left Binding</td>
<td></td>
</tr>
<tr>
<td>Right Binding</td>
<td></td>
</tr>
</tbody>
</table>
8. Select one of the options from the **Booklet Printing Method** menu.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Pages at Once</td>
<td>Every page will be printed in booklet format (four pages to every piece of paper, two pages per side). Fold your printout in the middle to create the booklet.</td>
</tr>
<tr>
<td>Divide into Sets</td>
<td>This option prints the whole booklet in smaller individual booklet sets, allowing you to fold at the center of the smaller individual booklet sets without having to change the order of the printed pages. You can specify the number of sheets in each smaller booklet set (from 1-15). This option can be helpful when folding a printed booklet that has a large number of pages.</td>
</tr>
</tbody>
</table>

9. Select the **Binding Offset** check box if you want to specify the offset for binding in inches or millimeters.

10. Click **OK** to return to the printer driver window.

11. Change other printer settings if needed.

   - The Borderless feature is not available when using this option.

12. Click **OK**.

13. Complete your print operation.

Prevent Smudged Printouts and Paper Jams (Windows®)

Some types of print media may need more drying time. Change the Reduce Smudge option if you have problems with smudged printouts or paper jams.

1. Select the print command in your application.
2. Select Brother MFC-XXXX Printer (where XXXX is the name of your model), and then click the printing properties or preferences button.
   The printer driver window appears.
3. Click the Advanced tab.
4. Click the Other Print Options button.
5. Select the Reduce Smudge option on the left side of the screen.
6. Select one of the following options:

<table>
<thead>
<tr>
<th>Media Type</th>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plain Paper</td>
<td>2-sided Printing or Simplex Printing</td>
<td>Off: Select this mode to print at normal speed, using a normal amount of ink.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Low: Select this mode to print at a slower speed, using a normal amount of ink.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>High: Select this mode to print at the same speed as Low, but using less ink.</td>
</tr>
</tbody>
</table>

7. Click OK to return to the printer driver window.
8. Click OK.
9. Complete your print operation.

Related Information

- Print from Your Computer (Windows®)
- Paper Handling and Printing Problems
- Change the Print Setting Options When Having Printing Problems
Print Profiles are presets designed to give you quick access to frequently-used printing configurations.

1. Select the print command in your application.

2. Select **Brother MFC-XXXX Printer** (where XXXX is the name of your model), and then click the printing properties or preferences button.
   
   The printer driver window appears.

3. Click the **Print Profiles** tab.

4. Select your profile from the print profile list.
   
   The profile settings are shown on the left side of the printer driver window.

5. Do one of the following:
   
   - If the settings are correct for your print job, click **OK**.
   
   - To change the settings, go back to the **Basic** or **Advanced** tab, change settings, and then click **OK**.

   To display the **Print Profiles** tab at the front of the window the next time you print, select the **Always show Print Profiles tab first** check box.

Create or Delete Your Print Profile (Windows®)

Add up to 20 new print profiles with customized settings.
1. Select the print command in your application.
2. Select Brother MFC-XXXX Printer (where XXXX is the name of your model), and then click the printing properties or preferences button.
   The printer driver window appears.
3. Click the Basic tab and the Advanced tab, and configure the print settings you want for the new Print Profile.
4. Click the Print Profiles tab.
5. Do one of the following:
   To create a new print profile:
   a. Click Add Profile.
      The Add Profile dialog box appears.
   b. Type the new profile name in the Name field.
   c. Click the icon you want to use to represent this profile from the icon list.
   d. Click OK.
      The new Print Profile name is added to the list in the Print Profiles tab.
   To delete a print profile that you created:
   a. Click Delete Profile.
      The Delete Profile dialog box appears.
   b. Select the profile you want to delete.
   c. Click Delete.
   d. Click Yes.
   e. Click Close.

Related Information

- Use a Preset Print Profile (Windows®)
When you change an application's print settings, the changes only apply to documents printed with that application. To change print settings for all Windows® applications, you must configure the printer driver properties.

1. Do one of the following:
   - For Windows Server® 2008
     Click (Start) > Control Panel > Hardware and Sound > Printers.
   - For Windows® 7 and Windows Server® 2008 R2
     Click (Start) > Devices and Printers.
   - For Windows® 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware and Sound group, click View devices and printers.
   - For Windows® 10 and Windows Server® 2016
     Click > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers.
   - For Windows Server® 2012
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware group, click View devices and printers.
   - For Windows Server® 2012 R2
     Click Control Panel on the Start screen. In the Hardware group, click View devices and printers.

2. Right-click the Brother MFC-XXXX Printer icon (where XXXX is your model name), and then select Printer properties. If printer driver options appear, select your printer driver.
   The printer driver dialog box appears.
3. Click the General tab, and then click the Printing Preferences... or Preferences... button.
   The printer driver dialog box appears.
4. Select the print settings you want to use as defaults for all of your Windows® programs.
5. Click OK.
6. Close the printer properties dialog box.
Print Settings (Windows®)

Basic Tab

1. **Media Type**
   Select the type of media you want to use. To achieve the best print results, the machine automatically adjusts its print settings according to the selected media type.

   **Slow Drying Paper**
   Select this option if you use a type of plain paper on which ink dries slowly. This option may cause slight blurring of the text.

2. **Print Quality**
   Select the print resolution you want. Because print quality and speed are related, the higher the quality, the longer it will take to print the document.

3. **Paper Size**
   Select the size of the paper you want to use. You can either choose from standard paper sizes or create a custom paper size.
Borderless
Select this option to print photos without borders. Because the image data is created slightly larger than the paper size you are using, this will cause some cropping of the photo edges.
You may not be able to select the Borderless option for some combinations of media type and quality, or from some applications.

4. Color Mode
Select the color mode to suit your preference.

5. Orientation
Select the orientation (portrait or landscape) of your printout.
If your application contains a similar setting, we recommend that you set the orientation using the application.

6. Copies
Type the number of copies (1-999) that you want to print in this field.

Collate
Select this option to print sets of multi-page documents in the original page order. When this option is selected, one complete copy of your document will print, and then reprint according to the number of copies you choose. If this option is not selected, then each page will print according to the number of copies chosen before the next page of the document is printed.

Reverse Order
Select this option to print your document in reverse order. The last page of your document will be printed first.

7. Multiple Page
Select this option to print multiple pages on a single sheet of paper or print one page of your document on multiple sheets.

Page Order
Select the page order when printing multiple pages on a single sheet of paper.

Border Line
Select the type of border to use when printing multiple pages on a single sheet of paper.

8. 2-sided / Booklet
Select this option to print on both sides of the paper or print a document in booklet format using 2-sided printing.

2-sided Settings button
Click this button to select the type of 2-sided binding. Four types of 2-sided bindings are available for each orientation.
1. **Color / Grayscale**
   Select color or grayscale printing. The print speed is faster in grayscale mode than it is in color mode. If your document contains color and you select grayscale mode, your document will be printed using 256 levels of grayscale.

2. **Color Enhancement (True2Life)**
   Select this option to use the Color Enhancement feature. This feature analyzes your image to improve its sharpness, white balance and color density. This process may take several minutes depending on the image size and your computer's specifications.

3. **Ink Save Mode**
   Select this option to print using lighter colors and emphasize image outlines. The amount of ink that is saved varies, depending on the type of documents printed. Ink Save Mode may make your printouts look different than they appear on your screen.

   The Ink Save Mode feature is supported by technology from Reallusion, Inc.

4. **Scaling**
   Select these options to enlarge or reduce the size of the pages in your document.

   **Fit to Paper Size**
   Select this option to enlarge or reduce the document pages to fit a specified paper size. When you select this option, select the paper size you want from the drop-down list.
Free
Select this option to enlarge or reduce the document pages manually. When you select this option, type a value into the field.

5. Mirror Print
Select this option to reverse the printed image on the page horizontally from left to right.

6. Reverse Print
Select this option to rotate the printed image 180 degrees.

7. Use Watermark
Select this option to print a logo or text on your document as a watermark. Select one of the preset watermarks, add a new watermark, or use an image file you have created.

8. Header-Footer Print
Select this option to print the date, time and PC login user name on the document.

9. User Authentication
This feature allows you to confirm the restrictions for each user.

10. Other Print Options button
Change Data Transfer Mode
Select the print data transfer mode to improve print quality or print speed.

Advanced Color Settings
Select the method that the machine uses to arrange dots to express halftones.
The printout color can be adjusted to achieve the closest match to what appears on your computer screen.

Reduce Smudge
Some types of print media may need more drying time. Change this option if you have problems with smudged printouts or paper jams.

Retrieve Printer's Color Data
Select this option to optimize the print quality using the machine's factory settings, which are set specifically for your Brother machine. Use this option when you have replaced the machine or changed the machine's network address.

Print Archive
Select this option to save the print data as a PDF file to your computer.

- Change the Print Setting Options When Having Printing Problems
1. **Paper Size**
   Select the size of the paper you want to use. You can either choose from standard paper sizes or create a custom paper size.

2. **Orientation**
   Select the orientation (portrait or landscape) of your printout.
   If your application contains a similar setting, we recommend that you set the orientation using the application.

3. **Scale**
   Type a value into the field to enlarge or reduce the pages in your document to fit the selected paper size.
1. **Pages per Sheet**
   Select the number of pages to print on a single sheet of paper.

2. **Layout Direction**
   Select the page order when printing multiple pages on a single sheet of paper.

3. **Border**
   Select the type of border to use when printing multiple pages on a single sheet of paper.

4. **Two-Sided**
   Select whether to print on both sides of the paper.

5. **Reverse page orientation**
   Select this option to rotate the printed image 180 degrees.

6. **Flip horizontally**
   Select this option to reverse the printed image on the page horizontally from left to right.
1. **Collate pages**  
   Select this option to print sets of multi-page documents in the original page order. When this option is selected, one complete copy of your document will print, and then reprint according to the number of copies you choose. If this option is not selected, then each page will print according to the number of copies chosen before the next page of the document is printed.

2. **Pages to Print**  
   Select which pages you want to print (even pages or odd pages).

3. **Page Order**  
   Select the page order.

4. **Scale to fit paper size**  
   Select this option to enlarge or reduce the pages in your document to fit the selected paper size.

5. **Destination Paper Size**  
   Select the paper size to print on.

6. **Scale down only**  
   Select this option if you want to reduce the pages in your document when they are too large for the selected paper size. If this option is selected and the document is formatted for a paper size that is smaller than the paper size you are using, the document will be printed at its original size.
Print Settings

1. **Media Type**
   Select the type of media you want to use. To achieve the best print results, the machine automatically adjusts its print settings according to the selected media type.

2. **Slow Drying Paper**
   Select this option if you use a type of plain paper on which ink dries slowly. This option may cause slight blurring of the text.

3. **Print Quality**
   Select the print resolution you want. Because print quality and speed are related, the higher the quality, the longer it will take to print the document.

4. **Color / Grayscale**
   Select color or grayscale printing. The print speed is faster in grayscale mode than it is in color mode. If your document contains color and you select grayscale mode, your document will be printed using 256 levels of grayscale.

5. **Advanced**

   **Change Data Transfer Mode**
   Select the print data transfer mode to improve print quality or print speed.

   **Reduce Smudge**
   Some types of print media may need more drying time. Change this option if you have problems with smudged printouts or paper jams.

**Other Print Options**

   **Paper Thickness**
   Select the appropriate paper thickness.

   **Bi-Directional Printing**
   Select this option to increase the print speed. When this option is selected, the print head prints in both directions. When this option is cleared, the print head prints in only one direction, resulting in higher quality printouts but causing slower print speeds.
Sometimes, the movement of the print head may vary due to environmental conditions. This may be seen when you print vertical lines and they do not align. If you encounter this problem, turn off the Bi-Directional Printing feature.

### Color Settings

1. **Color Mode**
   
   Select the color mode to suit your preference.

2. **Advanced Color Settings**
   
   Click the disclosure triangle to view the Advanced Color Settings. Select the Color Enhancement check box, and then set the options using the sliders. This process may take several minutes depending on the size of the image and the specifications of your computer.

Scan Photos and Graphics

Send scanned photos or graphics directly to your computer.

Use the Scan button on the machine to make temporary changes to the scan settings. To make permanent changes, use either ControlCenter4 (Windows®) or Brother iPrint&Scan (Mac) software.

1. Load your document.
2. Press [Scan] > [to PC] > [to Image].
3. If the machine is connected over the network, press ▲ or ▼ to display the computer where you want to send data, and then press the computer name.

   If the LCD prompts you to enter a PIN, use the LCD to enter the four-digit PIN for the computer, and then press [OK].

4. Do one of the following:
   - To change the settings, press [Options] or [Set at Device].
   - Press [Start] to start scanning without changing additional settings.

      The machine starts scanning. If using the machine's scanner glass, follow the LCD instructions to complete the scanning job.

   To use the [Options] or [Set at Device] setting, a computer with either ControlCenter4 (Windows®) or Brother iPrint&Scan (Mac) software installed must be connected to the machine.

5. Select the scan settings you want to change, and then press [OK].

Scan Multiple Business Cards and Photos (Auto Crop)

You can scan multiple documents placed on the scanner glass. The machine will scan each document and use the Auto Crop feature to create separate files or a single multi-page file.

Guidelines for Auto Crop

1. 0.4 in. (10 mm) or greater
2. 0.8 in. (20 mm) or greater (bottom)
   • This setting is available only for documents that are rectangular or square.
   • If your document is too long or wide, this feature will not work as described here.
   • You must place the documents away from the edges of the scanner glass as shown in the illustration.
   • You must place the documents at least 0.4 in. (10 mm) away from each other.
   • Auto Crop adjusts the skew of the document on the scanner glass; however, if your document is skewed more than 45 degrees at less than 300 x 300 dpi or 10 degrees at 600 x 600 dpi, this feature will not work.
   • The ADF must be empty to use Auto Crop.
   • The Auto Crop feature is available for a maximum of 16 documents, depending on the size of the documents.

1. Load documents on the scanner glass.

   • To scan documents using the Auto Crop feature, you must put the documents on the scanner glass.
   • The Auto Crop feature is supported by technology from Reallusion, Inc.

2. Insert a memory card or USB flash drive into your machine.
   The LCD screen automatically changes.
3. Press [Scan to Media] > [Options] > [Auto Crop].
4. Press [On].
5. Press [OK].
6. Press [Start].
   The machine starts scanning. Follow the LCD instructions to complete the scanning job.

Related Information

• Scan Using the Scan Button on Your Brother Machine
Your machine can convert characters in a scanned document to text using optical character recognition (OCR) technology. You can edit this text using your preferred text-editing application.

- The Scan to OCR feature is available for certain languages.
- Use the Scan button on the machine to make temporary changes to the scan settings. To make permanent changes, use either ControlCenter4 (Windows®) or Brother iPrint&Scan (Mac) software.

1. Load your document.
2. Press [Scan] > [to PC] > [to OCR].
3. If the machine is connected over the network, press ▲ or ▼ to display the computer where you want to send data, and then press the computer name.

   If the LCD prompts you to enter a PIN, use the LCD to enter the four-digit PIN for the computer, and then press [OK].

4. Do one of the following:
   - To change the settings, press [Options] or [Set at Device].
   - Press [Start] to start scanning without changing additional settings.

   The machine starts scanning. If using the machine's scanner glass, follow the LCD instructions to complete the scanning job.

   To use the [Options] or [Set at Device] setting, a computer with either ControlCenter4 (Windows®) or Brother iPrint&Scan (Mac) software installed must be connected to the machine.

5. Select the scan settings you want to change, and then press [OK].

- **Scan to SSH FTP (SFTP)**
Create a Client Key Pair Using Web Based Management

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. If the machine prompts you for a password, type it, and then click ➡️
4. Click the Network tab.
5. Click the Security tab.
6. Click Client Key Pair in the left navigation bar.
7. Click Create New Client Key Pair.
8. In the Client Key Pair Name field, type the name (up to 20 characters) you want.
9. Click the Public Key Algorithm drop-down list, and then select the algorithm you want.
10. Click Submit.
    The client key pair is created and saved in your machine's memory. The client key pair name and public key algorithm will be displayed in the Client Key Pair List.

7. Click Export Public Key shown with Client Key Pair List.
8. Click Submit.
9. Specify the location where you want to save the file.

The client key pair is exported to your computer.

Related Information

- Scan to SSH FTP (SFTP)
Import a Server Public Key Using Web Based Management

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

- If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
  - For example:
    https://SharedPrinter
  If you enable a NetBIOS name, you can also use the node name.
  - For example:
    https://brnxxxxxxxxx
  The NetBIOS name can be found in the Network Configuration Report.
- For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. If the machine prompts you for a password, type it, and then click →
4. Click the Network tab.
5. Click the Security tab.
6. Click Server Public Key in the left navigation bar.
7. Click Import Server Public Key.
8. Specify the file that you want to import.
9. Click Submit.

The server public key is imported to your machine.

Scan to Network (Windows®)

Scan documents directly to a CIFS server on your local network. For added convenience, you can configure different profiles to save your favorite Scan to Network destinations.

- Set up a Scan to Network Profile
- Upload Scanned Data to a CIFS Server
Home > Scan > Scan Using the Scan Button on Your Brother Machine > Scan to Network (Windows®) > Set up a Scan to Network Profile

Set up a Scan to Network Profile

Set up a Scan to Network Profile to scan and upload scanned data directly to a folder on a CIFS server.

We recommend Microsoft® Internet Explorer® 11/Microsoft Edge™ for Windows®, and Safari 10/11 for Mac. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.

1. Start your web browser.
   Type "https://machine’s IP address" in your browser’s address bar (where "machine’s IP address" is the IP address of the machine or the print server name). For example: https://192.168.1.2
   If the machine prompts you for a password, type it, and then click .

2. Click the Scan tab.

3. Click the Scan to FTP/SFTP/Network/SharePoint menu in the left navigation bar.

4. Select the Network option, and then click Submit.

If you want to send the data to your designated folder on the CIFS server, select On for the Send to My Folder option.

5. Click the Scan to FTP/SFTP/Network/SharePoint Profile menu in the left navigation bar.

6. Select the profile you want to set up or change.

   Using the following characters: ?, /, \, " , :, <, >, | or * may cause a sending error.

</tbody>
</table>
| Username                    | Type a user name (up to 96 characters) that has permission to write data to the folder specified in the **Network Folder Path** field. If the user name is part of a domain, type the user name in one of the following styles:  
  **user@domain**  
  **domain\user** |
| Password                    | Type the password (up to 32 characters) associated with the user name you entered in the **Username** field. Type the password again in the **Retype password** field. |
| Kerberos Server Address     | Type the Kerberos Server Address (for example: kerberos.example.com; up to 64 characters).                                                   |

7. Click **Submit**.

8. You must configure the SNTP (network time server) or you must set the date, time and time zone correctly on the control panel. The time must match the time used by the Kerberos Server and CIFS Server.

- **Related Information**
  - Scan to Network (Windows®)
  - Set the Date and Time Using Web Based Management
Set the Date and Time Using Web Based Management

Make sure the date and time and the time zone settings are set correctly using Web Based Management or the control panel, so the machine's time matches the time being used by the server providing authentication.

Start with Step 2 if you already have a Web Based Management window open.

1. Start your web browser.
   Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the IP address of the machine or the print server name). For example: https://192.168.1.2
   If the machine prompts you for a password, type it, and then click ➤.

2. Click the Administrator tab.

3. Click the Date&Time menu in the left navigation bar.

4. In the Date fields, enter the date.

5. Select either 12h Clock or 24h Clock as your Clock Type (available only for certain countries).

6. In the Time fields, enter the time.

7. Select the time difference between your location and UTC from the Time Zone drop-down list, for example, the time zone for Eastern time in the USA and Canada is UTC-05:00.

8. Click the On option for Auto Daylight to set the machine to change automatically for daylight saving time. It will reset itself forward one hour in the spring, and back one hour in the fall/autumn (available only for certain countries).

9. Click Submit.

Related Information

- Scan to SharePoint®
The Web Services protocol enables Windows® 7, Windows® 8 and Windows® 10 users to scan using a Brother machine on the network. You must install the driver via Web Services.

- **Use Web Services to Install Drivers Used for Scanning (Windows® 7, Windows® 8 and Windows® 10)**

- **Scan Using Web Services from the Brother Machine (Windows® 7, Windows® 8 and Windows® 10)**

- **Configure Scan Settings for Web Services**
Use Web Services to Install Drivers Used for Scanning (Windows® 7, Windows® 8 and Windows® 10)

Use Web Services to monitor printers on the network.

- Make sure you have installed the Brother software and drivers.
- Verify that the host computer and the Brother machine are on the same subnet, or that the router is correctly configured to pass data between the two devices.
- You must configure the IP address on your Brother machine before you configure this setting.

1. Do one of the following:
   - Windows® 7
     Click (Start) > Control Panel > Network and Internet > View network computers and devices.
     The machine's Web Services Name appears with the printer icon.
     Right-click the machine you want to install.
   - Windows® 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Change PC settings > Devices > Add a device.
     The machine's Web Services Name appears.
   - Windows® 8.1
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Change PC settings > PC and devices > Devices > Add a device.
     The machine's Web Services Name appears.
   - Windows® 10
     Click (Start) > Windows System > Control Panel. In the Hardware and Sound group, click Add a device.

     The Web Services Name for the Brother machine is your model name and the MAC Address (Ethernet Address) of your machine (for example, Brother MFC-XXXX (model name) [XXXXXXXXXXXX] (MAC Address / Ethernet Address)).
   - Windows® 8/Windows® 10
     Move your mouse over the machine name to display the machine's information.

2. Do one of the following:
   - Windows® 7
     Click Install in the displayed menu.
   - Windows® 8/Windows® 10
     Select the machine you want to install, and then follow the on-screen instructions.

To uninstall drivers, click Uninstall or (Remove device).

Related Information

- Web Services for Scanning on Your Network (Windows® 7, Windows® 8 and Windows® 10)
Scan Using Web Services from the Brother Machine (Windows® 7, Windows® 8 and Windows® 10)

If you have installed the driver for scanning via Web Services, you can access the Web Services scanning menu on your Brother machine's LCD.

- Certain characters in the messages displayed on the LCD may be replaced with spaces if the language settings of your OS and your Brother machine are different.
- If the LCD displays an insufficient memory error message, choose a smaller size in the Paper size setting or a lower resolution in the Resolution (DPI) setting.

1. Load your document.
2. Press [Scan] > [WS Scan].
3. Press ▲ or ▼ to select the type of scan you want, and then press it.
4. Press ▲ or ▼ to display the computer where you want to send data, and then press the computer name.
5. Press [Start].

   The machine starts scanning.

Related Information

- Web Services for Scanning on Your Network (Windows® 7, Windows® 8 and Windows® 10)
Configure Scan Settings for Web Services

1. Do one of the following:
   - **Windows® 7**
     Click (Start) > Devices and Printers.
   - **Windows® 8**
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware and Sound group, click View devices and printers.
   - **Windows® 10**
     Click > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers.

2. Right-click the machine icon, and then select Scan profiles…. The Scan Profiles dialog box appears.
3. Select the scan profile you want to use.
4. Make sure the scanner selected in the Scanner list is a Brother machine that supports Web Services for scanning, and then click the Set as Default button.
5. Click Edit....
   The Edit Default Profile dialog box appears.
7. Click the Save Profile button.
   These settings will be applied when you scan using the Web Services protocol.

If you are requested to select a scanning application, select Windows® Fax and Scan from the list.

</tbody>
</table>

**File Type**
Select the file type you want to use for the scanned data.

**Target Application**
Select the destination application from the drop-down list.

**OCR Language**
Set the optical character recognition (OCR) language to match the language of the scanned document's text (Available only for certain models).

**File Name**
Type a prefix for your file name, if needed.

**Destination Folder**
Click the folder icon to browse and select the folder where you want to save your scanned documents.

**Scan Location**
Select the Folder or SharePoint radio button to specify the destination where you want to save your scanned documents.
File Size Priority
Adjust the data compression ratio of the scanned image. Change the file size by moving the File Size Priority slider to the right or left.

Resolution
Select a scanning resolution from the Resolution drop-down list. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

Scan Type
Select from a range of scan color depths.

- **Auto**
  Use for any type of document. This mode automatically picks an appropriate color depth for the document.

- **Black & White**
  Use for text or line art images.

- **Gray (Error Diffusion)**
  Use for photographic images or graphics. (Error Diffusion is a method for creating simulated gray images without using true gray dots. Black dots are put in a specific pattern to give a gray appearance.)

- **True Gray**
  Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of gray.

- **24bit Color**
  Use to create an image with the most accurate color reproduction. This mode uses up to 16.8 million colors to scan the image, but it requires the most memory and has the longest transfer time.

Document Size
Select the exact size of your document from the Document Size drop-down list.

- If you select the **1 to 2 (A4)** option, the scanned image will be divided into two A5-size documents.

Brightness
Set the Brightness level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value into the field to set the Brightness level.

Contrast
Increase or decrease the Contrast level by moving the slider to the right or left. An increase emphasizes dark and light areas of the image, while a decrease reveals more details in gray areas. You can also type a value into the field to set the Contrast level.

Auto Crop
Scan multiple documents placed on the scanner glass. The machine will scan each document and create separate files or a single multi-page file.

ID Card Scan
Select this check box to scan both sides of an identification card onto one page.

Advanced Settings
Click the Advanced Settings button in the scan settings dialog box to configure advanced settings.

- **Remove Bleed-through / Pattern**
  - **Remove Background Color**
    Remove the base color of documents to make the scanned data more legible.

- **Rotate Image**
  Rotate the scanned image.

- **Skip Blank Page**
  Remove the document's blank pages from the scanning results.
• **Display Scanning Results**
  Show on your computer screen the number of total pages saved, and blank pages skipped.

• **ADF Auto Deskew**
  Set the machine to automatically correct a skewed document. (Available only for certain models)

**Default**
Select this option to restore all settings to their factory setting values.

  Use to create an image with the most accurate color reproduction. This mode uses up to 16.8 million colors to scan the image, but it requires the most memory and has the longest transfer time.
Brightness
Set the Brightness level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value into the field to set the Brightness level.

Contrast
Increase or decrease the Contrast level by moving the slider to the right or left. An increase emphasizes dark and light areas of the image, while a decrease reveals more details in gray areas. You can also type a value into the field to set the Contrast level.

Auto Crop
Scan multiple documents placed on the scanner glass. The machine will scan each document and create separate files or a single multi-page file.

Continuous Scanning
Select this option to scan multiple pages. After a page is scanned, select either continue scanning or finish.

ID Card Scan
Select this check box to scan both sides of an identification card onto one page.

Advanced Settings
Configure advanced settings by clicking the Advanced Settings button in the Scan Settings dialog box.
- Remove Bleed-through / Pattern
  - Remove Background Color
    Remove the base color of documents to make the scanned data more legible. (Available only for certain models)
- Rotate Image
  Rotate the scanned image.
- Skip Blank Page
  Remove the document's blank pages from the scanning results.
- Display Scanning Results
  Show on your computer screen the number of total pages saved, and blank pages skipped.
- ADF Auto Deskew
  Set the machine to automatically correct a skewed document. (Available only for certain models)

Related Information
- Select Document Type Using ControlCenter4 Home Mode (Windows®)
Change Scan Size Using ControlCenter4 Home Mode (Windows®)

For faster scan speeds, select the exact size of your document from the Scan Size drop-down menu.

Crop a Scanned Image Using ControlCenter4 Home Mode (Windows®)

The crop tool on the Image Editing Toolbar lets you trim unwanted areas from your scanned image. Use the **Zoom In** and **Zoom Out** tools to help view the image to be cropped.

**Image Editing Toolbar**

1. **Restart**
   Cancels all the edits applied to the selected image. The edited image returns to its original state.

2. **Fit to Window**
   Displays the scanned image so that the entire image fits in the window.

3. **Zoom In**
   Zooms in on the scanned image.

4. **Zoom Out**
   Zooms out of the scanned image.

5. **Crop and Edit**
   Removes the outer parts of the image. Click the **Crop and Edit** button, and then change the frame to contain the area you want to keep after cropping.

6. **Page Counter**
   Indicates the page number of the scanned page currently shown in the image viewer. To display a different page, select the desired page number from the drop-down page number list.

! If you have scanned multiple pages, you can see the next or previous scanned page by clicking the left or right arrow buttons in the preview window.

1. Scan a document.

2. Click (Crop and Edit) to edit the scanned image.
   The **Crop and Edit - ControlCenter4** window appears.
a. Expands the scanned image so that the entire image fits in the window.
b. Zooms in on the image.
c. Zooms out of the image.
d. Rotates the image counter-clockwise 90 degrees.
e. Rotates the image clockwise 90 degrees.
f. Click and drag the frame to adjust the area to be cropped.

3. Click OK.
   The edited image appears in the image viewer.

**Related Information**

- Scan Using ControlCenter4 Home Mode (Windows®)
Scan a document on your Brother machine, and then print copies using the printer driver features that are available in ControlCenter4.

1. Scan a document.
2. Click **Print**.

a. Shows which images are currently selected.

b. Click the Properties button to change specific printer settings.

c. Select the Paper Size, Media Type and Layout options. The current settings are enclosed in a blue square.

3. Configure the print settings, and then click the Start Printing button.

---

**Related Information**

- Scan Using ControlCenter4 Home Mode (Windows®)
Open with an Application Using ControlCenter4 Home Mode (Windows®)

The Open with an Application button lets you scan an image directly into your graphics application for editing.

1. Scan a document.
2. Click the Open with an Application button.
3. Select the application from the drop-down list, and then click OK.

The image will be opened in the application you have selected.

- Scan Using ControlCenter4 Home Mode (Windows®)
Save Scanned Data to a Folder as a PDF File Using ControlCenter4 Home Mode (Windows®)

Select **Home Mode** as the mode setting for ControlCenter4.

1. Load your document.
2. Click the (ControlCenter4) icon in the task tray, and then click **Open**.
3. Click the **Scan** tab.

4. Select the **Document Type**.
5. Change the size of your document, if needed.
6. Click (Scan).

   The machine starts scanning, and the scanned image appears in the image viewer.
7. Click the left or right arrow buttons to preview each scanned page.
8. Click **Save**.

   The **Save** dialog box appears.
9. Click the **File Type** drop-down list, and then select a PDF file.
To save the document as a password-protected PDF, select Secure PDF Single-Page (*.pdf) or Secure PDF Multi-Page (*.pdf) from the File Type drop-down list, click and then type the password.

10. To change the file name, click the Change button, if needed.
11. Click the folder icon to browse and select the folder where you want to save your scanned documents.
12. Click OK.

The scanned document is saved to the destination folder as a PDF.

**File Type**
Select the file type you want to use for the scanned data.

For **Image**, **E-mail** and **File**:
- **Windows Bitmap (*.bmp)**
- **JPEG (*.jpg)** (recommended for most users when scanning pictures)
- **TIFF Single-Page (*.tif)**
- **TIFF Multi-Page (*.tif)**
- **Portable Network Graphics (*.png)**
- **PDF Single-Page (*.pdf)** (recommended for scanning and sharing documents)
- **PDF Multi-Page (*.pdf)** (recommended for scanning and sharing documents)
- **High Compression PDF Single-Page (*.pdf)**
- **High Compression PDF Multi-Page (*.pdf)**
- **Secure PDF Single-Page (*.pdf)**
- **Secure PDF Multi-Page (*.pdf)**
- **Searchable PDF Single-Page (*.pdf)**
- **Searchable PDF Multi-Page (*.pdf)**
- **XML Paper Specification (*.xps)** (the XML Paper Specification is available for Windows® 7, Windows® 8 and Windows® 10, or when using applications that support XML Paper Specification files)
For OCR:
- Text (*.txt)
- HTML 3.2 (*.htm)
- HTML 4.0 (*.htm)
- Searchable PDF Single-Page (*.pdf)
- Searchable PDF Multi-Page (*.pdf)
- WordPad (*.rtf)
- RTF Word 2000 (*.rtf)
- WordPerfect 9, 10 (*.wpd)
- Microsoft Excel 2003, XP (*.xls)

For E-mail and File:
- Microsoft Office Word (*.docx) (Available only for certain models)
- Microsoft Office PowerPoint (*.pptx) (Available only for certain models)
- Microsoft Office Excel (*.xlsx) (Available only for certain models)

Target Application
Select the destination application from the drop-down list.

OCR Language
Set the optical character recognition (OCR) language to match the language of the scanned document's text (Available only for certain models).

File Name
Click Change to change the file name's prefix.

Destination Folder
Click the folder icon to browse and select the folder where you want to save your scanned documents.

Scan Location
Select the Folder or SharePoint radio button to specify the destination where you want to save your scanned documents.

Show Folder
Select this option to automatically display the destination folder after scanning.

Show Save As Window
Select this option to specify the scanned image's destination every time you scan.

File Size Priority
Adjust the data compression ratio of the scanned image. Change the file size by moving the File Size Priority slider to the right or left.

PreScan
Select PreScan to preview your image and crop unwanted portions before scanning.

Resolution
Select a scanning resolution from the Resolution drop-down list. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

Scan Type
Select from a range of scan color depths.
- Auto
  Use for any type of document. This mode automatically picks an appropriate color depth for the document.
- Black & White
  Use for text or line art images.
• **Gray (Error Diffusion)**
  
  Use for photographic images or graphics. (Error Diffusion is a method for creating simulated gray images without using true gray dots. Black dots are put in a specific pattern to give a gray appearance.)

• **True Gray**
  
  Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of gray.

• **24bit Color**
  
  Use to create an image with the most accurate color reproduction. This mode uses up to 16.8 million colors to scan the image, but it requires the most memory and has the longest transfer time.

**Document Size**

Select the exact size of your document from the **Document Size** drop-down list.

• If you select the **1 to 2 (A4)** option, the scanned image will be divided into two A5-size documents.

**Brightness**

Set the **Brightness** level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value into the field to set the **Brightness** level.

**Contrast**

Increase or decrease the **Contrast** level by moving the slider to the right or left. An increase emphasizes dark and light areas of the image, while a decrease reveals more details in gray areas. You can also type a value into the field to set the **Contrast** level.

**Continuous Scanning**

Select this option to scan multiple pages. After a page is scanned, select either continue scanning or finish.

**Auto Crop**

Scan multiple documents placed on the scanner glass. The machine will scan each document and create separate files or a single multi-page file.

**ID Card Scan**

Select this check box to scan both sides of an identification card onto one page.

**Advanced Settings**

Configure advanced settings by clicking the **Advanced Settings** button in the scan settings dialog box.

• **Remove Bleed-through / Pattern**
  
  - **Remove Background Color**
    Remove the base color of documents to make the scanned data more legible.

• **Rotate Image**
  
  Rotate the scanned image.

• **Skip Blank Page**
  
  Remove the document's blank pages from the scanning results. (Available only for certain models)

• **Display Scanning Results**
  
  Show on your computer screen the number of total pages saved, and blank pages skipped. (Available only for certain models)

**ADF Auto Deskew**

Set the machine to automatically correct a skewed document. (Available only for certain models)

**Default**

Select this option to restore all settings to their factory setting values.
Related Information

- Scan Using ControlCenter4 Advanced Mode (Windows®)
You can use the Nuance™ PaperPort™ 14SE application for scanning.

- To download the Nuance™ PaperPort™ 14SE application, click (Brother Utilities), select Do More in the left navigation bar, and then click PaperPort.
- For detailed instructions on using each application, click the application’s Help menu, and then click Getting Started Guide in the Help ribbon.

The instructions for scanning in these steps are for PaperPort™ 14SE. For other Windows® applications, the steps will be similar. PaperPort™ 14SE supports both TWAIN and WIA drivers; the TWAIN driver (recommended) is used in these steps.

- Depending on the model of your machine, Nuance™ PaperPort™ 14SE may not be included. If it is not included, you can use other software applications that support scanning.
  1. Load your document.
  2. Start PaperPort™ 14SE.
     Do one of the following:
     - Windows® 7
       Using your computer, click (Start) > All Programs > Nuance PaperPort 14 > PaperPort.
     - Windows® 8
       Click (PaperPort).
     - Windows® 10
       Click > Nuance PaperPort 14 > PaperPort.
  3. Click the Desktop menu, and then click Scan Settings in the Desktop ribbon.
     The Scan or Get Photo panel appears on the left side of the screen.
  4. Click Select.
  5. From the available Scanners list, select TWAIN: TW-Brother MFC-XXXX or TWAIN: TW-Brother MFC-XXXX LAN (where MFC-XXXX is the model name of your machine). To use the WIA driver, select the Brother driver that has “WIA” as the prefix.
  6. Select the Display scanner dialog box check box in the Scan or Get Photo panel.
  7. Click Scan.
     The Scanner Setup dialog box appears.
8. Adjust the settings in the Scanner Setup dialog box, if needed.
9. Click the Document Size drop-down list, and then select your document size.
10. Click PreScan if you want to preview your image and crop unwanted portions before scanning.
11. Click Start.

The machine starts scanning.

<td>200 x 200 dpi</td>
<td>Black &amp; White</td>
</tr>
</tbody>
</table>

2. **Resolution**
   Select a scanning resolution from the **Resolution** drop-down list. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

3. **Scan Type**
   Select from a range of scan color depths.
   - **Black & White**
     Use for text or line art images.
• **Gray (Error Diffusion)**
  Use for photographic images or graphics. (Error Diffusion is a method for creating simulated gray images without using true gray dots. Black dots are put in a specific pattern to give a gray appearance.)

• **True Gray**
  Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of gray.

• **24bit Color**
  Use to create an image with the most accurate color reproduction. This mode uses up to 16.8 million colors to scan the image, but it requires the most memory and has the longest transfer time.

4. **Document Size**
Select the exact size of your document from a selection of preset scan sizes.
If you select **Custom**, the **Custom Document Size** dialog box appears and you can specify the document size.

5. **Brightness**
Set the **Brightness** level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value in the field to set the brightness level.

6. **Contrast**
Increase or decrease the **Contrast** level by moving the slider to the right or left. An increase emphasizes dark and light areas of the image, while a decrease reveals more details in gray areas. You can also type a value in the field to set the contrast level.

7. **Auto Crop**
Scan multiple documents placed on the scanner glass. The machine will scan each document and create separate files or a single multi-page file.

8. **Advanced Settings**
Configure advanced settings by clicking the **Advanced Settings** link in the Scanner Setup dialog box.
• **Paper Detection**
  - **Auto Deskew**
    Set the machine to correct document skewing automatically as the pages are scanned from the ADF.
  - **Rotate Image**
    Rotate the scanned image.
• **Image Quality**
  - **Background Processing**
• Remove Bleed-through / Pattern
  Prevent bleed-through.

• Remove Background Color
  Remove the base color of documents to make the scanned data more legible.

- Color Drop
  Select a color to remove from the scanned image.

- Boldface Formatting
  Emphasize the characters of the original by making them bold.

- Blurred Character Correction
  Correct the broken or incomplete characters of the original to make them easier to read.

- Edge Emphasis
  Make the characters of the original sharper.

- Reduce Noise
  Improve and enhance the quality of your scanned images with this selection. The Reduce Noise option is available when selecting the 24bit Color option and the 300 x 300 dpi, 400 x 400 dpi, or 600 x 600 dpi scan resolution.

• Page Control

  - Edge Fill
    Fill in the edges on four sides of the scanned image using the selected color and range.

  - Skip Blank Page
    Remove the document's blank pages from the scanning results. (Available only for certain models)

  - Continuous Scan
    Select this option to scan multiple pages. After a page is scanned, select either continue scanning or finish.

✅ Related Information

• Scan Using Nuance™ PaperPort™ 14SE or Other Windows® Applications
Scan Using Windows® Fax and Scan

Windows® Fax and Scan application is another option that you can use for scanning.

- Windows® Fax and Scan uses the WIA scanner driver.
- If you want to crop a portion of a page after pre-scanning the document, you must scan using the scanner glass (also called the flatbed).

1. Load your document.
2. Launch Windows® Fax and Scan.
3. Click File > New > Scan.
4. Select the scanner you want to use.
5. Click OK.

The New Scan dialog box appears.

6. Adjust the settings in the Scanner Setup dialog box, if needed.
   The scanner resolution can be set to a maximum of 1200 dpi. If you want to scan at higher resolutions, use the Scanner Utility software from Brother Utilities.
7. Click Scan.
   The machine starts scanning the document.

Related Information

- Scan from Your Computer (Windows®)

Scan Using TWAIN-Compliant Applications (Mac)

You can also scan using TWAIN-compliant applications. For more information about the scanning procedure, see the manual for your application.

To use Brother TWAIN Driver, go to your model's Downloads page on the Brother Solutions Center at support.brother.com and download Scanner Driver (TWAIN).

1. Start your graphics application, and then select the scan operation.
   The scanner setup dialog box appears.

2. Change the scan settings, such as Resolution, Scan Type, or Adjust Image, if needed.

3. Click the Document Size pop-up menu, and then select your document size.

4. Click the PreScan option to preview your image and crop unwanted portions before scanning.
   - After you select a document size, adjust the scanning area by holding down the mouse button and dragging your mouse pointer over the portion you want to scan.

5. Click Start.
   The machine starts scanning.

Related Information

- Scan from Your Computer (Mac)
- TWAIN Driver Settings (Mac)
• Item names and assignable values will vary depending on the machine.
• The **Contrast** setting is available only when selecting **Gray (Error Diffusion)**, **True Gray**, or **24bit Color** from the **Scan Type** options.

1. **Resolution**
   Select a scanning resolution from the **Resolution** pop-up menu. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

2. **Scan Type**
   Select from a range of scan color depths.
   - **Black & White**
     Use for text or line art images.
   - **Gray (Error Diffusion)**
     Use for photographic images or graphics. (Error Diffusion is a method for creating simulated gray images without using true gray dots. Black dots are put in a specific pattern to give a gray appearance.)
   - **True Gray**
     Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of gray.
   - **24bit Color**
     Use to create an image with the most accurate color reproduction. This mode uses up to 16.8 million colors to scan the image, but it requires the most memory and has the longest transfer time.

3. **Document Size**
   Select the exact size of your document from a selection of preset scan sizes.
   - If you select **Custom**, you can specify the document size.

\[
\begin{array}{|l|c|}
\hline
\text{Width: } & 210 \\
\text{Height: } & 297 \\
\hline
\end{array}
\]
4. Adjust Image

Click the Adjust Image button to adjust other image qualities.

**Brightness**

Set the Brightness level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value in the box to set the brightness.

**Contrast**

Increase or decrease the Contrast level by moving the slider to the right or left. An increase emphasizes dark and light areas of the image, while a decrease reveals more details in gray areas. You can also type a value in the box to set the contrast.

**Reduce Noise**

Improve and enhance the quality of your scanned images with this selection. The Reduce Noise option is available when selecting the 24bit Color option and the 300 x 300 dpi, 400 x 400 dpi, or 600 x 600 dpi scan resolutions.

5. Rotate Image

Rotate the scanned image.

1. Load your document.

2. Press [Copy].

3. Enter the number of copies in one of the following ways:
   - Press [-] or [+] on the touchscreen.
   - Press to display the keyboard on the touchscreen, and then enter the number of copies using the touchscreen keyboard. Press [OK].

4. Press [Options] > [Enlarge/Reduce].

5. Press ▲ or ▼ to display the available options, and then press the option you want to change.

6. Do one of the following:
   - If you selected the [Enlarge] or [Reduce] option, press the enlargement or reduction ratio you want to use.
   - If you selected the [Custom(25-400%)] option, press (backspace) to erase the displayed percentage, or press ▼ to move the cursor, and then enter an enlargement or reduction ratio from [25%] to [400%]. Press [OK].
   - If you selected [100%] or the [Fit to Page] option, go to the next step.

7. Read and confirm the displayed list of options you have selected, and then press [OK].

8. When you have finished changing settings, press [Black Start] or [Color Start].

If you selected the [Fit to Page] option, your machine adjusts the copy size to fit the paper size set in the machine.

- The [Fit to Page] option does not work correctly when the document on the scanner glass is skewed more than three degrees. Using the document guidelines on the left and top, place your document in the upper-left corner, with the document face down on the scanner glass.
- The [Fit to Page] option is not available when using the ADF.
- The [Fit to Page] option is not available for Legal size documents.

Related Information

- Copy
Sort Copies

Sort multiple copies. Pages will be stacked in the order they are fed, that is: 1, 2, 3, and so on.

1. Load your document.
2. Press [Copy].
3. Enter the number of copies in one of the following ways:
   - Press [-] or [+] on the touchscreen.
   - Press [01] to display the keyboard on the touchscreen, and then enter the number of copies using the touchscreen keyboard. Press [OK].
4. Press [Options] > [Stack/Sort] > [Sort].
5. Read and confirm the displayed list of settings you have selected, and then press [OK].
6. When you have finished changing settings, press [Black Start] or [Color Start]. If you placed the document in the ADF, the machine scans the document and starts printing.
7. If you are using the scanner glass, repeat the following steps for each page of the document:
   - Place the next page on the scanner glass, and then press [Continue] to scan the page.
   - After scanning all the pages, press [Finish].

Related Information

- Copy
Make Page Layout Copies (N in 1 or Poster)

The N in 1 copy feature saves paper by copying two or four pages of your document onto one page of the copy. The poster feature divides your document into sections, then enlarges the sections so you can assemble them into a poster. To print a poster, use the scanner glass.

- Make sure the paper size is set to Letter, A4, or Executive.
- Poster copy is not available for Executive size paper.
- You can make only one Poster copy at a time.

1. Load your document.
2. Press [Copy].
3. Enter the number of copies in one of the following ways:
   - Press [-] or [+] on the touchscreen.
   - Press [0] to display the keyboard on the touchscreen, and then enter the number of copies using the touchscreen keyboard. Press [OK].
4. Press [Options] > [Page Layout].
5. Press ▲ or ▼ to display the options, and then press the option you want.

6. Read and confirm the displayed list of settings you have selected, and then press [OK].

7. When you have finished changing settings, press [Black Start] or [Color Start]. If you placed the document in the ADF or are making a poster, the machine scans the pages and starts printing.

8. If you are using the scanner glass, repeat the following steps for each page of the document:
   • Place the next page on the scanner glass, and then press [Continue] to scan the page.
   • After scanning all the pages, press [Finish].

Related Information

- Copy
Copy on Both Sides of the Paper (2-sided Copy)

Reduce the amount of paper you use by copying onto both sides of the paper.

- You must choose a 2-sided copy layout from the following options before you can start 2-sided copying.
- The layout of your original document determines which 2-sided copy layout you should choose.
- When you manually make 2 sided copies from a 2-sided document, use the scanner glass.
- You can use only Letter, A4, A5, or Executive size plain paper.

Portrait

1-sided to 2-sided (Long Edge Flip)

1-sided to 2-sided (Short Edge Flip)

2-sided to 2-sided

Landscape

1-sided to 2-sided (Long Edge Flip)

1-sided to 2-sided (Short Edge Flip)

2-sided to 2-sided

1. Load your document.
2. Press [Copy].
3. Enter the number of copies in one of the following ways:
   - Press [-] or [+] on the touchscreen.
   - Press [01] to display the keyboard on the touchscreen, and then enter the number of copies using the touchscreen keyboard. Press [OK].
4. To sort multiple copies, press [Options] > [Stack/Sort] > [Sort].

5. Press ▲ or ▼ to display the [2-sided Copy] option, and then press it.

6. Do one of the following:
   • To make 2-sided copies from a 1-sided document, follow these steps:
     a. To change the layout options, press [Layout], and then press [Long Edge Flip] or [Short Edge Flip].
     b. Press [1-sided⇒2-sided].
   • To make 2-sided copies of a 2-sided document manually, press [2-sided⇒2-sided].

   Use the scanner glass to make 2-sided copies of a 2-sided document manually.

7. Review your settings on the touchscreen, and then press [OK].

8. Press [Black Start] or [Color Start]. If you placed the document in the ADF, the machine scans the pages and starts printing.

9. If you are using the scanner glass, repeat the following steps for each page of the document:
   • Place the next page on the scanner glass, and then press [Continue] to scan the page.
   • After scanning all the pages, press [Finish].

   DO NOT touch the printed page until it is ejected the second time. The machine will print the first side and eject the paper, and then pull the paper in to print the second side.

   If you experience smudged printouts or paper jams, press [Settings] > [Maintenance] > [Print Setting Options] > [Reduce Smudging], and then change settings.

Related Information

Copy an ID Card

Use the [2in1(ID)] feature to copy both sides of an identification card onto one page, keeping the original card size.

- Make sure the paper size is set to Letter or A4.
- You may copy an identification card to the extent permitted under applicable laws. For more detailed information, see the Product Safety Guide.

1. Place your identification card face down near the upper-left corner of the scanner glass.

2. Press [Copy].

3. Enter the number of copies in one of the following ways:
   - Press [-] or [+] on the touchscreen.
   - Press [01] to display the keyboard on the touchscreen, and then enter the number of copies using the touchscreen keyboard. Press [OK].

4. Press [Options] > [Page Layout] > [2in1(ID)].

5. Read and confirm the displayed list of settings you have selected. When you have finished changing settings, press [OK].

6. Press [Black Start] or [Color Start].
   - The machine starts scanning one side of the identification card.

7. After the machine has scanned the first side, turn over the identification card and press [Continue] to scan the other side.
Copy in Ink Save Mode

When you select Ink Save Mode, the machine prints the colors lighter and emphasizes the outlines of the images.

- The amount of ink that is saved varies depending on the type of documents printed.
- Ink Save Mode may make your printouts look different from your original document.
- The Ink Save Mode feature is supported by technology from Reallusion, Inc.

1. Load your document.
2. Press [Copy].
3. Enter the number of copies in one of the following ways:
   - Press [-] or [+] on the touchscreen.
   - Press [01] to display the keyboard on the touchscreen, and then enter the number of copies using the touchscreen keyboard. Press [OK].
4. Press [Options] > [Advanced Settings] > [Ink Save Mode].
5. Read and confirm the displayed list of settings you have selected, and then press [OK].
6. When you have finished changing settings, press [Black Start] or [Color Start].

Send a Fax from Your Brother Machine

1. Load your document in the ADF or place it on the scanner glass.

2. Press [Fax].

   If [Fax Preview] is set to [On], press [Fax] > [Sending Faxes].

The touchscreen displays:

3. Enter the fax number in one of the following ways:
   - Dial Pad (Enter the fax number manually.)
     Press all digits of the number using the touchscreen.
   - Call History
     Press [Call History].
     Press [Redial], [Outgoing Call] or [Caller ID History].
     If you select [Outgoing Call] or [Caller ID History], select the number you want, and then press [Apply].
   - Address Book
     Press [Address Book].
     Do one of the following:
     - Select the number you want, and then press [Apply].
     - Press [ ], and then enter the first letter of the name and press [OK]. Press the name you want to dial. If the name has two numbers, press the number you want. Press [Apply].

   If the LDAP search is available, the result will be shown on the touchscreen with [ ].

4. To change the fax settings, press [Options].
   When finished, press [OK].

5. Press [Fax Start].
   - If you are using the ADF, the machine starts scanning and sending the document.
   - If you are using the scanner glass and selected [Black] in the [Color Setting], the machine starts scanning the first page.
     Go to the next step.
   - If you are using the scanner glass and selected [Color] in the [Color Setting], the touchscreen asks if you want to send a color fax.
Press [Yes (Color fax)] to confirm. The machine starts dialing and sending the document.

6. When the touchscreen displays [Next page?], do one of the following:
   • Press [No] when finished scanning pages. The machine starts sending the document.
   • Press [Yes] to scan another page. Place the next page on the scanner glass, and then press [OK]. The machine starts scanning the page.

Repeat this step for each additional page.

Send a Fax Manually

Manual fax transmission lets you hear the dialing, ringing and fax-receiving tones while sending a fax.

1. Load your document.
2. Press [Fax].

   If [Fax Preview] is set to [On], press [Fax] > [Sending Faxes].

3. Press [Hook] and listen for a dial tone.
4. Enter the fax number.
5. When you hear fax tones, press [Fax Start].
   • If you are using the scanner glass, press [Send].

Related Information

• Send a Fax
Send a Fax at the End of a Conversation

At the end of a conversation, you can send a fax to the other party before you both hang up.

1. Ask the other party to wait for fax tones (beeps) and to press the Start key before hanging up.
2. Load your document.
3. Press \[Fax Start\] to display the [Fax Start] button.
4. Press [Fax Start].
   - If you are using the scanner glass, press [Send].
5. Replace the handset of the external telephone.

Related Information

- Send a Fax
Send the Same Fax to More than One Recipient (Broadcasting)

Use the Broadcasting feature to send the same fax to multiple fax numbers at the same time.

- This feature is available only for black and white faxes.
- Address Book numbers must be stored in the machine’s memory before they can be used in a broadcast.
- Group numbers must also be stored in the machine’s memory before they can be used in a broadcast. Group numbers include many stored Address Book numbers for easier dialing.

You can include Groups, Address Book numbers and up to 50 manually-dialed numbers in the same broadcast.

If you did not use any of the Address Book numbers for Groups, you can broadcast faxes to as many as 250 different numbers.

1. Load your document.
2. Press [Fax].
3. Press [Options] > [Broadcasting].
4. Press [Add Number].

You can add numbers to the broadcast in the following ways:
- Press [Add Number] and enter a fax number using the dial pad. Press [OK].
- Press [Add from Address book]. Press ▲ or ▼ to display the numbers you want to add to the broadcast. Select the check boxes of the numbers you want to add. When finished, press [OK].
- Press [Search in Address book]. Press the first letter of the name and press [OK]. Press the name, and then press the number you want to add.

Repeat this step to enter additional fax numbers.
5. When finished, press [OK].
6. Press [Fax Start].
7. Do one of the following:
   - If you are using the ADF, the machine starts scanning and sending the document.
   - If you are using the scanner glass, the machine starts scanning the first page. When the touchscreen displays [Next page?], do one of the following:
     - Press [No] when finished scanning pages. The machine starts sending the document.
     - Press [Yes] to scan another page. Place the next page on the scanner glass, and then press [OK]. The machine starts scanning the page.

Repeat this step for each additional page.

Send a Fax in Real Time

When sending a fax, the machine scans the document into the memory before sending it. As soon as the telephone line is free, the machine starts dialing and sending. If you want to send an important document immediately without waiting for the machine to retrieve the scan from its memory, turn on [Real Time TX].

- If you are sending a color fax or if the machine's memory is full and you are sending a black and white fax from the ADF, the machine sends the document in real time (even if [Real Time TX] is set to [Off]).
- In Real Time Transmission, the automatic redial feature does not work when using the scanner glass.

1. Load your document.
2. Press [Fax].
   
   If [Fax Preview] is set to [On], press [Fax] > [Sending Faxes].
3. Press [Options] > [Real Time TX].
4. Press [On] (or [Off]).
5. Press [OK].
6. Enter the fax number.
7. Press [Fax Start].

Related Information
- Send a Fax
Send a Fax at a Specified Time (Delayed Fax)

You can store up to 50 faxes in the machine’s memory to be sent within the next twenty-four hour period.

This feature is available only for black and white faxes.

1. Load your document.
2. Press [Fax].

   If [Fax Preview] is set to [On], press [Fax] > [Sending Faxes].

3. Press [Options] > [Delayed Fax].
4. Press [Delayed Fax].
5. Press [On].
6. Press [Set Time].
7. Enter the time you want the fax to be sent using the touchscreen. Press [OK].

   The number of pages you can scan into the memory depends on the amount and type of data.

8. Press [OK].
9. Enter the fax number.
10. Press [Fax Start].

   • If you are using the scanner glass, go to the next step.
11. When the touchscreen displays [Next page?], do one of the following:

   • Press [No] when finished scanning pages.
   • Press [Yes] to scan another page. Place the next page on the scanner glass, and then press [OK]. The machine starts scanning the page.

Repeat this step for each additional page.

- Set the F/T Ring Time (Pseudo/Double-ring)
Receive Modes Overview

Some receive modes answer automatically ([Fax Only] and [Fax/Tel]). You may want to change the Ring Delay before using these modes.

Fax Only

[Fax Only] mode automatically answers every call as a fax.

Fax/Tel

[Fax/Tel] mode helps you manage incoming calls, by recognizing whether they are fax or voice calls and handling them in one of the following ways:

- Faxes will be received automatically.
- Voice calls will start the F/T ring to tell you to pick up the line. The F/T ring is a pseudo/double-ring made by your machine.

Manual

[Manual] mode turns off all automatic answering functions (unless you are using the Distinctive Ring feature).

To receive a fax in [Manual] mode, lift the handset of the external telephone or press the Hook button. When you hear fax tones (short repeating beeps), press the Start button, and then select [Receive] to receive a fax. You can also use the Easy Receive feature to receive faxes by lifting a handset on the same line as the machine.

External TAD

[External TAD] mode lets an external answering device manage your incoming calls.

Incoming calls will be handled in the following ways:

- Faxes will be received automatically.
- Voice callers can record a message on the external TAD.

Related Information

- Receive Mode Settings
- Set the Number of Rings Before the Machine Answers (Ring Delay)

- Set Easy Receive
- Connect an External TAD
Choose the Correct Receive Mode

The correct Receive Mode for you is determined by the external devices and telephone subscriber services (Voice Mail, Distinctive Ring and so on) you will be using on the same line as the Brother machine.

Will you be using a Distinctive Ring number for receiving faxes? (USA and Canada only)

Brother uses the term "Distinctive Ring" but different telephone companies may have other names for this service, such as Custom Ringing, Personalized Ring, Teen Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Smart Ring and SimpleBiz Fax & Alternate Number Ringing.

Will you be using Voice Mail on the same telephone line as your Brother machine?

If you have Voice Mail on the same telephone line as your Brother machine, there is a strong possibility that Voice Mail and the Brother machine will conflict with each other when receiving incoming calls. Select Manual Mode as your Receive Mode.

If you do not want to answer every call manually to determine whether it’s a voice call or a fax, contact your telephone provider and ask about Distinctive Ring services.

Will you be using a Telephone Answering Device on the same telephone line as your Brother machine?

Your external telephone answering device (TAD) will answer every call automatically. Voice messages are stored on the external TAD and fax messages are printed. Select [External TAD] as your Receive Mode.

Will you be using your Brother machine on a dedicated fax line?

Your machine automatically answers every call as a fax. Select [Fax Only] as your Receive Mode.

Will you be using your Brother machine on the same line as your telephone?

- Do you want to receive voice calls and faxes automatically?
  Select [Fax/Tel] mode when your Brother machine and your telephones share the same line.
  **Important Note:** You cannot receive voice messages on either Voice Mail or an answering machine if you select [Fax/Tel] mode.

- Do you expect to receive very few faxes?
  Select [Manual] as your Receive Mode. You control the telephone line and must answer every call yourself.

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Receive Mode].

   If you cannot change the [Receive Mode] option, make sure the Distinctive Ring feature is set to [Off].

2. Press ▲ or ▼ to display the [Fax Only], [Fax/Tel], [External TAD], or [Manual] option, and then press the option you want.

3. Press .

Set the Number of Rings Before the Machine Answers (Ring Delay)

When somebody calls your machine, you will hear the normal telephone ring sound. The number of rings is set in the Ring Delay option.

- The Ring Delay setting sets the number of times the machine rings before it answers in [Fax Only] and [Fax/Tel] modes.
- If you have external or extension telephones on the same line as the machine, keep the Ring Delay setting of [4].

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Ring Delay].

2. Press the number of times you want the line to ring before the machine answers (0, 1, 2, 3, or 4).

   If you select [0], the machine will answer immediately and the line will not ring at all (available only for some countries).

3. Press 📞.

Set the F/T Ring Time (Pseudo/Double-ring)

When you set the Receive Mode to [Fax/Tel], if the call is a fax, your machine will receive it automatically. However, if it is a voice call, the machine will sound the F/T ring (pseudo/double-ring) for the time you set in the F/T Ring Time option. When you hear the F/T ring, it means that a voice caller is on the line.

Because the F/T ring is a setting only on your Brother machine, extension and external telephones will not ring; however, you can still answer the machine’s call on any telephone.

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [F/T Ring Time].
2. Press how long the machine will double-ring to alert you to a voice call (20Secs, 30Secs, 40Secs, or 70Secs).
3. Press .

Even if the caller hangs up during the pseudo/double-ringing, the machine will continue to ring for the set time.

Set Easy Receive

If Easy Receive is On: The machine can receive a fax automatically, even if you answer the call. When the message that your machine is receiving a fax appears on the LCD or when you hear a click on the phone line through the handset you are using, just replace the handset. Your machine will do the rest.

If Easy Receive is Off: If you are at the machine and answer a fax call first by lifting the external handset, press the Start button, and then select [Receive] to receive the fax. If you answered at an extension telephone, press *51.

- If Easy Receive is set to [On], but your machine does not connect a fax call when you lift an extension or external telephone handset, press the fax receive code *51.
- If you send faxes from a computer on the same telephone line and the machine intercepts them, set Easy Receive to [Off].

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Easy Receive].
3. Press [Home].

Fax Preview

Use the Fax Preview feature to view received faxes on the LCD.

• Set Fax Preview to On

• Preview New Faxes
Set Fax Preview to On

- This feature is available only for black and white faxes.
- When Fax Preview is turned on, a backup copy of received faxes will not be printed for Fax Forwarding, PC-Fax Receiving and Forward to Cloud operations, even if you set Backup Print to On.
- Although printed faxes show the received date and time when Fax Receive Stamp is turned on, the Fax Preview screen will not display the received date and time.

1. Press [Settings].
2. Press [Fax Preview].
3. Press [On] (or [Off]).
   The touchscreen displays a message saying future received faxes will not be printed.
4. Press [Yes].
5. Press [Home]

If faxes are stored in the memory when you change Fax Preview to Off, do one of the following:
- If you do not want to print the stored faxes, press [Continue].
  Press [Yes] to confirm.
  Your faxes will be deleted.
- To print all the stored faxes, press [Print All Faxes Before Delete].
- If you do not want to turn off Fax Preview, press [Cancel].

Memory Receive Options

Use Memory Receive options to direct incoming faxes while you are away from the machine. You can use only one Memory Receive option at a time.

Memory Receive can be set to:

- Fax Forwarding
- Fax Storage
- PC-Fax Receive
- Forward to Cloud
  The machine forwards your received faxes to the online services.
- Off

This feature is available only for black and white faxes.

- Forward Incoming Faxes to Another Machine
- Store Incoming Faxes in the Machine's Memory
- Use PC-Fax Receive to Transfer Received Faxes to Your Computer (Windows® only)
- Change Memory Receive Options
- Turn Off Memory Receive
- Print a Fax Stored in the Machine's Memory
- Turn On FaxForward to Cloud or E-mail
Forward Incoming Faxes to Another Machine

Use the Fax Forwarding feature to automatically forward your incoming faxes to another machine.

This feature is available only for black and white faxes.

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Memory Receive].
2. Press ▲ or ▼ to display the [Fax Forward] option, and then press it.
3. Enter the forwarding fax number (up to 20 digits) using the dial pad. Press [OK].

- If you select [Backup Print: On], the machine prints received faxes at your machine so you will have a copy.
- When Fax Preview is turned on, a backup copy of received faxes will not be printed.
- If you receive a color fax, your machine only prints the color fax and does not forward it to the Fax Forwarding number you programmed.

5. Press 🏠.

Forward Faxes Remotely

Call your Brother machine from any touch-tone telephone or fax machine to forward incoming faxes to another machine.

- You must turn on Fax Storage, or Fax Preview before you use this feature.

1. Dial your fax number.
2. When your machine answers, enter your Remote Access Code (three digits followed by *). If you hear one long beep, you have messages.
4. Wait for the long beep, and then use the dial pad to enter the fax number (up to 20 digits) of the remote fax machine where you want your fax messages sent, followed by # #.

⚠️ You cannot use * and # as dial numbers but you can press # to insert a pause in the fax number.

5. Hang up after you hear one long beep. Your Brother machine will forward any incoming faxes to the fax number you entered. The other fax machine will then print your fax messages.

Special Line Considerations

- Rollover Telephone Lines
- Two-Line Telephone System
- Convert Telephone Wall Outlets
- Install Your Brother Machine, an External Two-Line TAD and Two-Line Telephone
Rollover Telephone Lines

A rollover telephone system is a group of two or more separate telephone lines that pass incoming calls to each other if they are busy. This feature is available only in the USA and Canada. The calls are usually passed down or 'rolled over' to the next available telephone line in a preset order.

Your machine can work in a rollover system only if it is the last number in the sequence, so the call cannot roll away. Do not place the machine on any of the other numbers; when the other lines are busy and a second fax call is received, the fax call would be transferred to a line that does not have a fax machine. **Your machine will work best on a dedicated line.**

**Related Information**

* Special Line Considerations
Two-Line Telephone System

A two-line telephone system is nothing more than two separate telephone numbers on the same wall outlet. This feature is available only in the USA and Canada. The two telephone numbers can be on separate jacks (RJ11) or combined into one jack (RJ14). Your machine must be plugged into an RJ11 jack. RJ11 and RJ14 jacks may be equal in size and appearance and both may contain four wires (black, red, green, yellow). To test the type of jack, plug in a two-line telephone and see if it can access both lines. If it can, you must separate the line for your machine.

Related Information

- Special Line Considerations
Convert Telephone Wall Outlets

This feature is available only in the USA and Canada.

There are three ways to convert to an RJ11 jack. The first two ways may require assistance from the telephone company. You can change the wall outlets from one RJ14 jack to two RJ11 jacks. Or, you can have an RJ11 wall outlet installed and slave or jump one of the telephone numbers to it.

The third way is the easiest: Buy a triplex adapter. You can plug a triplex adapter into an RJ14 outlet. It separates the wires into two separate RJ11 jacks (Line 1, Line 2) and a third RJ14 jack (Lines 1 and 2). If your machine is on Line 1, plug the machine into L1 of the triplex adapter. If your machine is on Line 2, plug it into L2 of the triplex adapter.

Triplex adapter

  - Special Line Considerations
Install Your Brother Machine, an External Two-Line TAD and Two-Line Telephone

When you are installing an external two-line telephone answering device (TAD) and a two-line telephone, your machine must be isolated on one line at both the wall jack and at the TAD.

• This feature is available only in the USA and Canada.
• The most common connection is to place the machine on Line 2, which is explained in the following steps. The back of the two-line TAD must have two telephone jacks: one labeled L1 or L1/L2, and the other labeled L2. You will need at least three telephone line cords, the one that came with your machine and two for your external two-line TAD. You will need a fourth line cord if you add a two-line telephone.

1. Place the two-line TAD and the two-line telephone next to your machine.
2. Plug one end of the telephone line cord for your machine into the L2 jack of the triplex adapter. Plug the other end into the LINE jack of the machine.
3. Plug one end of the first telephone line cord for your TAD into the L1 jack of the triplex adapter. Plug the other end into the L1 or L1/L2 jack of the two-line TAD.
4. Plug one end of the second telephone line cord for your TAD into the L2 jack of the two-line TAD. Plug the other end into the EXT. jack of the machine.

You can keep two-line telephones on other wall outlets as always. There are ways to add a two-line telephone to the machine's wall outlet. You can plug the telephone line cord from the two-line telephone into the L1+L2 jack of the triplex adapter. Or, you can plug the two-line telephone into the TEL jack of the two-line TAD.

Dial Access Codes and Credit Card Numbers

Sometimes you may want to choose from several long-distance carriers when you send a fax. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes of long-distance carriers and credit card numbers as Address Book numbers.

You can store these long dialing sequences by dividing them and setting them up as separate Address Book numbers in any combination. You can even include manual dialing.

For example: you might have stored ‘555’ on Address Book: Brother 1 and ‘7000’ on Address Book: Brother 2. You can use them both to dial ‘555-7000’ if you press the following:

1. Press [Fax] > [Address Book].
2. Press ▲ or ▼ to display the number of Brother 1.
3. Press the number.
4. Press [Apply].
5. Press [Options].
6. Press ▲ or ▼ to display the [Address Book] option, and then press it.
7. Read and review the message on the touchscreen, and then press [OK].
8. Press ▲ or ▼ to display the number of Brother 2.
9. Press the number.
10. Press [Apply].
11. Press [Fax Start].
   You will dial ‘555-7000’.

To change a number temporarily, you can substitute part of the number by pressing it using the touchscreen. For example, to change the number to ‘555-7001’, you could enter the number (Brother 1: 555) using Address Book, press [Apply], and then press 7001 using the touchscreen.

If you must wait for another dial tone or signal at any point in the dialing sequence, create a pause in the number by pressing [Pause].

Voice Mail

This feature is available only in the USA and Canada.

If you have Voice Mail on the same telephone line as your Brother machine, Voice Mail and the Brother machine will conflict with each other when receiving incoming calls.

For example, if your Voice Mail is set to answer after four rings and your Brother machine is set to answer after two rings, then your Brother machine will answer first. This will prevent callers from being able to leave a message in your Voice Mail.

Similarly, if your Brother machine is set to answer after four rings and your Voice Mail is set to answer after two rings, then your Voice Mail will answer first. This will prevent your Brother machine from being able to receive an incoming fax, since Voice Mail cannot transfer the incoming fax back to the Brother machine.

To avoid conflicts between your Brother machine and your Voice Mail service, do one of the following:

• Get the Distinctive Ring service from your telephone company. Distinctive Ring is a feature of your Brother machine that allows a person with one line to receive fax and voice calls through two different telephone numbers on that one line.

   Brother uses the term 'Distinctive Ring,' but telephone companies market the service under a variety of names, such as Custom Ringing, Personalized Ring, Smart Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Teen Ring, and SimpleBiz Fax & Alternate Number Ringing. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes.

• Set your Brother machine’s Receive Mode to "Manual". Manual Mode requires you answer every incoming call if you want to be able to receive a fax. If the incoming call is a telephone call, then complete the call as you normally would. If you hear fax sending tones you must transfer the call to the Brother machine. Unanswered fax and voice calls will go to your Voice Mail.

Distinctive Ring

This feature is available only in the USA and Canada.
Distinctive Ring is a function of your Brother machine that allows a person with one line to receive fax and voice calls through two different phone numbers on that one line. Brother uses the term "Distinctive Ring," but telephone companies market the service under a variety of names, such as Custom Ringing, Personalized Ring, Smart Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Teen Ring, and SimpleBiz Fax & Alternate Number Ringing. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes.

- You must pay for your telephone company's Distinctive Ring service before you program the machine to work with it.
- Contact your telephone company for availability and rates.

What does your telephone company’s ‘Distinctive Ring’ do?
Your telephone company’s Distinctive Ring service allows you to have more than one number on the same telephone line. If you need more than one telephone number, it is cheaper than paying for an extra line. Each telephone number has its own distinctive ring pattern, so you will know which telephone number is ringing. This is one way to have a separate telephone number for your machine.

Contact your telephone company for availability and rates.

What does Brother’s ‘Distinctive Ring’ do?
The Brother machine has a Distinctive Ring feature that allows you to use your machine to take full advantage of the telephone company’s Distinctive Ring service. The new telephone number on your line can only receive faxes.

You must pay for your telephone company’s Distinctive Ring service before you program the machine to work with it.

Do you have Voice Mail?
If you have Voice Mail on the telephone line where you will install your new machine, there is a strong possibility that Voice Mail and the machine will conflict with each other while receiving incoming calls. However, the Distinctive Ring feature allows you to use more than one number on your line, so both Voice Mail and the machine can work together without any problems. If each one has a separate telephone number, neither will interfere with the other’s operations.
If you decide to get the Distinctive Ring service from the telephone company, you must register the new Distinctive Ring pattern they give you. This is so your machine can recognize its incoming calls.

You can change or cancel the Distinctive Ring pattern at any time. You can switch it off temporarily, and turn it back on later. When you get a new fax number, make sure you reset this feature.

Before you choose the ring pattern to register
You can register only one Distinctive Ring pattern with the machine. Some ring patterns cannot be registered. The ring patterns below are supported by your Brother machine. Register the one your telephone company gives you.

<table>
<thead>
<tr>
<th>Ring Pattern</th>
<th>Rings</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>short-short or long-long</td>
</tr>
<tr>
<td>2</td>
<td>short-long-short</td>
</tr>
</tbody>
</table>
Ring Pattern | Rings  
---|---
3 | short-short-long  
4 | very long  
(normal pattern)

- Ring Pattern #1 is often called Short-Short and is the most commonly used.
- If the ring pattern you received is not on this chart, **contact your telephone company and ask for one that is shown**.

- The machine will answer only calls to its registered number.
- The first two rings are silent on the machine. This is because the fax must **listen** to the ring pattern (to compare it to the pattern that was ’registered’). (Other telephones on the same line will ring.)
- If you program the machine correctly, it will recognize the registered ring pattern of the ‘fax number’ within two ring patterns and then answer with a fax tone. When the ‘voice number’ is called, the machine will not answer.

Register the Distinctive Ring Pattern

This feature is available only in the USA and Canada.

After you set the Distinctive Ring feature to [On], your Distinctive Ring number will receive faxes automatically. The receive mode is set to [Manual] automatically and you cannot change it to another receive mode while Distinctive Ring is set to [On]. This ensures the Brother machine will answer only the Distinctive Ring number and not interfere when your main telephone number is called.

When Distinctive Ring is on, the LCD will show [D/R] as the Receive Mode.

1. Press [Settings] > [All Settings] > [Fax] > [Miscellaneous] > [Distinctive].
2. Do one of the following:
   - If you have not registered Distinctive Ring, press [Distinctive], and then press [On].
   - If you have already registered Distinctive Ring, and want to change the pattern, go to the next step.
3. Press [Ring Pattern].
4. Press the stored ring pattern you want. (You will hear each pattern as you press the four buttons. Make sure you select the pattern that the telephone company gave you.) Press [OK].
5. Press [Home].

Distinctive Ring is now set to [On].

If you do not want to receive faxes on your Distinctive Ring number, you can turn off Distinctive Ring. The machine will stay in [Manual] receive mode so you must set the Receive Mode again.

Caller ID

The Caller ID feature lets you use the Caller ID subscriber service offered by many local telephone companies. This service displays the telephone number, or name if it is available, of your caller as the line rings.

- The [# Unavailable] message means the call originated outside your Caller ID service area.
- The [Private Call] message means the caller has intentionally blocked transmission of Caller ID information.

Call your telephone company for more information.

Once you answer a call, the Caller ID information disappears from the LCD and is stored in Caller ID memory. View the list or select a number and fax to it, add it to the Address Book, or delete it from the history.

You can print a list of the Caller ID information received by your machine.

- This feature is not available in some countries.
- This feature may not be available in certain areas of the USA and Canada.
- The Caller ID service varies with different carriers. Contact your local telephone company to learn if the service is available in your area.

Voice Over Internet Protocol (VoIP/Telephone Line Interference)

VoIP is a type of phone system that uses an Internet connection instead of a traditional telephone line. Telephone providers frequently bundle VoIP together with Internet and cable services.

Your machine may not work with some VoIP systems. To use your machine to send and receive faxes on a VoIP system, connect one end of your telephone cord to the jack labeled LINE on your machine. Connect the other end of the telephone cord to a modem, interface box, phone adapter, splitter, or other such device.

If you have questions about how to connect your machine to the VoIP system, contact your VoIP provider.

After you have connected your machine to the VoIP system, press the Hook button to verify the machine has a dial tone. If the machine does not have a dial tone, call your VoIP provider.

If you are having problems sending or receiving faxes over a VoIP system, we recommend changing the machine’s modem speed to the [Basic(for VoIP)] setting.

Related Information

- Telephone Services and External Devices
- Telephone Line Interference/VoIP
You can connect an external Telephone Answering Device (TAD) to the same line as your machine. When the TAD answers a call, your machine will “listen” for the CNG (fax calling) tones sent by a sending fax machine. If it hears them it will take over the call and receive the fax. If it does not hear them, it will let your TAD take a voice message and the LCD will show [Telephone].

The external TAD must answer within four rings (we recommend setting it to two rings). This is because your machine cannot hear the CNG tones until the external TAD has picked up the call. The sending machine will send CNG tones for only eight to ten seconds longer. We do not recommend using the toll saver feature on your external TAD if it needs more than four rings to activate it.

Unless you are using Distinctive Ring, the TAD must be connected to the EXT. jack of the machine.

- **If you subscribe to your telephone company’s Distinctive Ring service:**
  
  You may connect an external TAD to a separate wall jack only if you subscribe to your telephone company’s Distinctive Ring service, have registered the distinctive ring pattern on your machine, and use that number as a fax number. The recommended setting is at least four rings on the external TAD when you have the telephone company’s Distinctive Ring service. You cannot use the Toll Saver setting.

- **If You Do Not Subscribe to the Distinctive Ring Service:**
  
  You must plug your TAD into the EXT. jack of your machine. If your TAD is plugged into a wall jack, both your machine and the TAD will try to control the telephone line. (See the illustration.)

1 TAD
2 Protective Cap

**IMPORTANT**

DO NOT connect a TAD elsewhere on the same telephone line.

If you have problems receiving faxes, reduce the Ring Delay setting on your external TAD.

**Related Information**

- Telephone Services and External Devices
- Connect an External TAD
- Record an Outgoing Message (OGM) on the External TAD
- Multi-line Connections (PBX)
Connect an External TAD

The external TAD must be plugged into the jack labeled EXT. Your machine cannot work correctly if you plug the TAD into a wall jack (unless you are using Distinctive Ring).

1. Plug the telephone line cord from the telephone wall jack into the jack labeled LINE.
2. Remove the protective cap (1) from the jack labeled EXT., and then plug the telephone line cord from your external TAD into the EXT. jack.
   Make sure this cord is connected to the TAD at the TAD's telephone line jack, and not its handset jack.

3. Set your external TAD to the minimum number of rings allowed. For more information, contact your telephone provider. (The machine’s Ring Delay setting does not apply.)
4. Record the outgoing message on your external TAD.
5. Set the TAD to answer calls.
6. Set the Receive Mode on your machine to [External TAD].

Related Information

- External TAD (Telephone Answering Device)
- Receive Modes Overview
- Choose the Correct Receive Mode
- Telephone and Fax Problems
Record an Outgoing Message (OGM) on the External TAD

1. Record five seconds of silence at the beginning of your message. This allows your machine time to listen for fax tones.

We recommend beginning your OGM with an initial five second silence because the machine cannot hear fax tones over a loud voice. You may try leaving out this pause, but if your machine has trouble receiving faxes, then you should re-record the OGM to include it.

2. Limit your speaking to 20 seconds.

3. End your 20-second message by giving your Fax Receive Code for people sending manual faxes. For example: “After the beep, leave a message or press *51 and Start to send a fax.”

Related Information

- External TAD (Telephone Answering Device)
Multi-line Connections (PBX)

We suggest you ask the company that installed your PBX to connect your machine. If you have a multi line system we suggest you ask the installer to connect the unit to the last line on the system. This prevents the machine being activated each time the system receives telephone calls. If all incoming calls will be answered by a switchboard operator we recommend setting the Receive Mode to [Manual].

We cannot guarantee that your machine will operate correctly under all circumstances when connected to a PBX. Any difficulties with sending or receiving faxes should be reported first to the company that handles your PBX.

- External and Extension Telephones
Operation from External and Extension Telephones

Use extension telephones

If you answer a fax call at an extension telephone, you can make your machine receive the fax by pressing the Fax Receive Code *51.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at an extension telephone by pressing the Telephone Answer Code #51.

Use an external telephone (Connected to the EXT. jack of the machine)

If you answer a fax call at the external telephone connected to the EXT. jack of the machine, you can make the machine receive the fax by pressing the Start button and selecting the option to receive.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at the external telephone by pressing [Pickup].

If you answer a call and no one is on the line:

You should assume that you're receiving a manual fax.

Press *51 and wait for the chirp or until the LCD shows [Receiving], and then hang up.

You can also use the Easy Receive feature to make your machine automatically take the call.

Related Information

- External and Extension Telephones
- Set the Number of Rings Before the Machine Answers (Ring Delay)

- Voice Mail
- Set the F/T Ring Time (Pseudo/Double-ring)
Use a Non-Brother Cordless External Handset

If your non-Brother cordless telephone is connected to the EXT. jack of the machine and you typically carry the cordless handset elsewhere, it is easier to answer calls during the Ring Delay.

If you let the machine answer first, you must go to the machine so you can press [Pickup] to transfer the call to the cordless handset.

Related Information

- External and Extension Telephones
Use the Remote Codes

Fax Receive Code

If you answer a fax call on an extension telephone, you can tell your machine to receive it by pressing the Fax Receive Code *51. Wait for the chirping sounds then replace the handset.

If you answer a fax call at the external telephone, you can make the machine receive the fax by pressing the Start button and then selecting the option to receive.

Telephone Answer Code

If you receive a voice call and the machine is in F/T mode, it will start to sound the F/T ring (pseudo/double-ring) after the initial Ring Delay. If you pick up the call on an extension telephone you can turn the F/T ring off by pressing #51 (make sure you press this between the rings).

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at the external telephone by pressing [Pickup].

Set the Transmission Verification Report's Style

You can use the Transmission Verification Report as proof that you sent a fax. This report lists the receiving party's name or fax number, the time and date of transmission, duration of transmission, number of pages sent, and whether or not the transmission was successful.

There are several settings available for the Transmission Verification Report:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Prints a report after every fax you send.</td>
</tr>
<tr>
<td>On (+Image)</td>
<td>Prints a report after every fax you send. A portion of the fax's first page appears on the report.</td>
</tr>
<tr>
<td>Error only</td>
<td>Prints a report if your fax is unsuccessful due to a transmission error.</td>
</tr>
<tr>
<td>Error only (+Image)</td>
<td>Prints a report if your fax is unsuccessful due to a transmission error. A portion of the fax's first page appears on the report.</td>
</tr>
<tr>
<td>Off</td>
<td>The report will not be printed.</td>
</tr>
</tbody>
</table>

1. Press [Settings] > [All Settings] > [Fax] > [Report Setting] > [Transmission].
2. Press the option you want.
   - If you select [On (+Image)] or [Error only (+Image)], the image will not appear on the Transmission Verification Report if Real Time Transmission is set to [On]. The image will not appear on the report when you send a color fax.
3. Press [OK].
   - If the transmission is successful, [OK] appears next to [RESULT] on the Transmission Verification Report. If the transmission is not successful, [NG] appears next to [RESULT].

Related Information

- Fax Reports
Set the Fax Journal's Interval Period

You can set the machine to print a Fax Journal at specific intervals (every 50 faxes, 6, 12 or 24 hours, 2 or 7 days).

1. Press [Settings] > [All Settings] > [Fax] > [Report Setting] > [Journal Period].
2. Press [Journal Period].
3. Press ▲ or ▼ to select an interval.
   - 6, 12, 24 hours, 2 or 7 days
     The machine will print the report at the selected interval and then erase all fax jobs from the Journal's memory. If the memory becomes full with 200 jobs before the time you selected has passed, the machine will print the Journal early and then erase all fax jobs from the memory. If you want an extra report before it is due to print, you can print it without erasing the jobs.
   - Every 50 Faxes
     The machine will print the Journal when the machine has stored 50 fax jobs.
4. If you selected 6, 12, 24 hours, 2 or 7 days, press [Time] and enter the time of day using the touchscreen. Press [OK].
5. If you selected [Every 7 Days], press [Day]. Press ▲ or ▼ to display the [Every Monday], [Every Tuesday], [Every Wednesday], [Every Thursday], [Every Friday], [Every Saturday] or [Every Sunday] option, and then press the first day of the seven-day countdown.
6. Press ✅.

- PC-FAX for Windows®
- PC-FAX for Mac
PC-FAX for Windows®

- PC-FAX Overview (Windows®)
- Send a Fax Using PC-FAX (Windows®)
- Receive Faxes on Your Computer (Windows®)
Reduce paper consumption and save time by using Brother's PC-FAX software to send faxes directly from your machine.

- Configure PC-FAX (Windows®)
- Configure your PC-Fax Address Book (Windows®)
Before sending faxes using PC-FAX, personalize the send options in each tab of the PC-FAX Setup dialog box.

1. Do one of the following:
   - Windows® 7
     
     Click (Start) > All Programs > Brother > Brother Utilities.
     
     Click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Setup Sending.
   - Windows® 8 and Windows® 10
     
     Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Setup Sending.

The PC-FAX Setup dialog box appears.

2. Do one of the following:
   - Click the User Information tab, and then type your user information in the fields.
     
     Each Microsoft® account can have its own customized User Information screen for custom fax headers and cover pages.
     
     - Click the Sending tab, and then type the number needed to access an outside line (if needed) in the Outside line access field. Select the Include header check box to include the header information.
     - Click the Address Book tab, and then select the address book you want to use for PC-FAX from the Select Address Book drop-down list.

3. Click OK.

- Configure your PC-Fax Address Book (Windows®)
Send a Fax Using PC-FAX (Windows®)

PC-FAX supports only black and white faxes. A black and white fax will be sent even if the original data is color and the receiving fax machine supports color faxes.

1. Create a file in any application on your computer.
2. Select the print command in your application.
3. Select Brother PC-FAX as your printer, and then complete your print operation.
   The Brother PC-FAX dialog box appears.

4. Type a fax number using one of the following methods:
   • Click the numbers on the dial pad to type the number, and then click Add Send Address.

   If you select the Dial Restriction check box, a confirmation dialog box will appear for you to re-type the fax number using the keyboard. This feature helps to prevent transmissions to the wrong destination.
   • Click the Address Book button, and then select a member or group from the Address Book.

   If you make a mistake, click All Clear to delete all entries.

5. To include a cover page, select the Add Cover Page check box. You can also click to create or edit a cover page.
6. Click Start to send the fax.

   • To cancel the fax, click Cancel.
   • To redial a number, click Redial to show the last five fax numbers, select a number, and then click Start.

Related Information

Receive Faxes on Your Computer (Windows®)

Use Brother's PC-FAX software to receive faxes on your computer, screen them and print only those faxes you want.

• Receive Faxes Using PC-FAX Receive (Windows®)
Receive Faxes Using PC-FAX Receive (Windows®)

Brother's PC-FAX Receive software lets you view and store faxes on your computer. It is automatically installed when you install the Brother software and drivers and works on locally- or network-connected machines.

- PC-FAX Receive supports only black and white faxes. When you receive a color fax, your machine prints the color fax at your machine but does not send the fax to your computer.

When you turn off your computer, your machine will continue to receive and store faxes in your Brother machine's memory. The machine's LCD will display the number of stored faxes received. When you start this application, the software will transfer all received faxes to your computer at once. You can enable the Backup Print option if you want the machine to print a copy of the fax before the fax is sent to your computer, or before the computer is switched off. You can configure the Backup Print settings from your Brother machine.

Important Information about Photo Printing

USB flash drive support is available only for certain models.

Your machine is designed to be compatible with modern digital camera image files, memory cards and USB flash drives. Read the points below to avoid errors:

- The image file extension must be .JPG (other image file extensions like .JPEG, .TIF, .GIF and so on will not be recognized).
- Direct photo printing must be performed separately from photo printing operations using the computer. (Simultaneous operation is not available.)
- The machine can read up to 999 files 1 on a memory card or USB flash drive.

Be aware of the following:

- When printing an index or image, the machine will print all the valid images, even if one or more images have been corrupted. Corrupted images will not be printed.
- (Memory card users) Your machine is designed to read memory cards that have been formatted by a digital camera. When a digital camera formats a memory card, it creates a special folder into which it copies image data. If you must use your computer to modify the image data stored on a memory card, we recommend that you do not modify the folder structure created by the digital camera. When saving new or modified image files to the memory card, we also recommend you use the same folder your digital camera uses. If the data is not saved to the same folder, the machine may not be able to read the file or print the image.
- (USB flash drive users) Your machine supports USB flash drives that have been formatted by Windows®.

2. Do one of the following:
   - (Windows®)
     In Windows® Explorer, double-click the Removable Disk icon.
   - (Mac)
     Double-click the removable disk icon.

   If you create a name for the volume label of the media, this name appears.

   The files and folders on the media appear on your computer screen.
3. You can edit a file and save it to another drive on your computer.
4. Quit all applications that are running stored data on the media.
5. Do one of the following:
   - (Windows®)
     In Windows® Explorer, right-click the removable disk icon and select **Eject**.
   - (Mac)
     Drag the removable disk icon into the Trash icon.
6. Wait until your Brother machine has stopped accessing the media before removing the media.

**IMPORTANT**

DO NOT remove the media while your Brother machine is accessing the media. Otherwise, the media, or data stored on the media could be damaged.

If you remove the media while your Brother machine is accessing the media, you must restart your computer before inserting the same media into the machine. If you do not restart your computer, the data on your media could be destroyed.

**Related Information**

- Copy Photos from Media to a Computer
You can print and edit photos using various ControlCenter features.

1. Make sure you have loaded the correct media in the paper tray.

   **IMPORTANT**
   
   • For best results, use Brother paper.
   • When you print on Brother photo paper, load one extra sheet of the same photo paper in the paper tray.

2. Click the (ControlCenter4) icon in the task tray, and then click Open.

3. Do one of the following:
   
   • If you are using Advanced Mode, click the Photo tab, and then click the Photo Print button.
   • If you are using Home Mode, click the Photo tab.

4. Select the folder that contains the image you want to print.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>My CC4 Folder</td>
<td>The My CC4 Folder button lets you open the ControlCenter4 folder located in the My Pictures folder on your computer.</td>
</tr>
<tr>
<td>Desktop</td>
<td>The Desktop button lets you open the folder tree from your desktop to select images you want to print.</td>
</tr>
</tbody>
</table>

5. Select images you want to print by selecting the check box under the thumbnail in the image viewer.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select All</td>
<td>Selects all thumbnails in the current view.</td>
</tr>
<tr>
<td>Option</td>
<td>Description</td>
</tr>
<tr>
<td>------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Deselect All</td>
<td>Deselects all thumbnails in the current view.</td>
</tr>
</tbody>
</table>

6. Specify the number of copies you want to print (1-99) by clicking +.

7. To trim the photo before printing, click Edit.

8. Click Print.

The print settings window appears.

9. Configure the settings for the **Paper Size**, **Media Type**, and **Layout** options.

10. Click the **Properties** button to configure the **Print Quality**, **Color / Grayscale** and **Color Mode** options, if needed. To print the image's timestamp in the lower-right corner of the image, select the **Print Date** check box.

11. To change other printer settings, click the **Print Options...** button. (For Advanced Mode only)

12. Click **OK**.

13. Click the **Preview** button to view the image on screen before printing.

14. Click the **Start Printing** button.

---

1. BRAdmin Light is available as a download from your model's page at support.brother.com.
2. BRAdmin Professional is available as a download from your model's page at support.brother.com.
3. The default login password to manage machine settings is **initpass**. We recommend you change it to protect your machine from unauthorized access.
Configure and change your Brother machine’s network settings using a management utility.

- Learn about Network Management Software and Utilities
- Change Machine Settings from Your Computer
Learn about Network Management Software and Utilities

Web Based Management
Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS). Type your machine’s IP address into your web browser to access and change your print server settings.

BRAdmin Light (Windows®)
BRAdmin Light is a utility for the initial setup of Brother network-connected devices. This utility can search for Brother products on your network, view the status and configure the basic network settings, such as IP address. Go to your model’s Downloads page on the Brother Solutions Center at support.brother.com to download BRAdmin Light.

- If using Windows® Firewall, or the firewall function of an anti-spyware or antivirus application, temporarily disable them. When you are sure you can print, configure the software settings following the instructions.

BRAdmin Professional (Windows®)
BRAdmin Professional is a utility for more advanced management of network-connected Brother devices. This utility can search for Brother products on your network and view the device status from an easy-to-read Windows® Explorer-style screen that changes color to identify the status of each device. You can configure network and device settings, and update device firmware from a Windows® computer on your LAN. BRAdmin Professional can also log activity of Brother devices on your network and export the log data.

- Go to your model’s Downloads page on the Brother Solutions Center at support.brother.com to download the latest version of Brother’s BRAdmin Professional utility.
- Node name: The node name appears in the current BRAdmin Professional window. The default node name is "BRNxxxxxxxxxxxx" for a wired network or "BRWxxxxxxxxxxxx" for a wireless network (where "xxxxxxxxxxxx" is your machine’s MAC Address / Ethernet address).
- If using Windows® Firewall, or the firewall function of an anti-spyware or antivirus application, temporarily disable them. When you are sure you can print, configure the software settings following the instructions.

Remote Setup (Windows® and Mac)
Remote Setup is a program for configuring many machine and network settings from either a Windows® or a Mac application. When you start this application, the settings on your machine are automatically downloaded to your computer and displayed on your computer screen. If you change the settings, you can upload them directly to the machine.

Windows®
This utility can be used with either a USB or a network connection.

Mac
- Go to your model’s Downloads page on the Brother Solutions Center at support.brother.com to download the Remote Setup.
- This utility can be used with a USB connection.

Additional Methods of Configuring Your Brother Machine for a Wireless Network

To connect your machine to your wireless network, we recommend using the Brother installation disc.

- Before Configuring Your Brother Machine for a Wireless Network
- Configure Your Machine for a Wireless Network Using the One Push Method of Wi-Fi Protected Setup™ (WPS)
- Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)
- Configure Your Machine for a Wireless Network When the SSID is Not Broadcast
- Configure Your Machine for an Enterprise Wireless Network
- Use Wi-Fi Direct®
Before Configuring Your Brother Machine for a Wireless Network

Before attempting to configure a wireless network, confirm the following:

- If you are using an enterprise wireless network, you must know the User ID and Password.
- To achieve optimum results with normal everyday document printing, place the Brother machine as close to the wireless LAN access point/router as possible with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider selecting wired Ethernet for faster data transfer (supported models only), or USB for the fastest throughput speed.

- Although the Brother machine can be used in both a wired and wireless network (supported models only), only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.

If you do not know the security information (for example, Network Name (SSID) and Network Key), consult the router manufacturer, your system administrator, or your Internet provider.

Related Information

- Additional Methods of Configuring Your Brother Machine for a Wireless Network
If your wireless access point/router supports WPS (Push Button Configuration), you can use WPS from your machine’s control panel menu to configure your wireless network settings.

Routers or access points that support WPS are marked with this symbol:

1. Press \[\text{Settings} \] > \[\text{All Settings} \] > \[\text{Network} \] > \[\text{WLAN} \] > \[\text{WPS} \].

2. When \[\text{Enable WLAN?} \] appears, press \[\text{Yes} \].

   The wireless setup wizard starts. To cancel, press \[\text{No} \].

3. When the touchscreen instructs you to start WPS, press the WPS button on your wireless access point/router. Then press \[\text{OK} \] on your machine. Your machine automatically tries to connect to your wireless network.

   If your wireless device is connected successfully, the LCD displays \[\text{Connected} \].

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

- Additional Methods of Configuring Your Brother Machine for a Wireless Network
Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)

If your wireless LAN access point/router supports WPS, you can use the Personal Identification Number (PIN) Method to configure your wireless network settings.

The PIN Method is one of the connection methods developed by the Wi-Fi Alliance®. By submitting a PIN created by an Enrollee (your machine) to the Registrar (a device that manages the wireless LAN), you can set up the wireless network and security settings. For more information on how to access WPS mode, see the instructions provided with your wireless access point/router.

**Type A**
Connection when the wireless LAN access point/router (1) doubles as the Registrar.

1. Press [Settings] > [All Settings] > [Network] > [WLAN] > [WPS w/ PIN Code].
2. When [Enable WLAN?] appears, press [Yes].
3. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
4. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: http://192.168.1.2)
5. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

**Type B**
Connection when another device (2), such as a computer, is used as the Registrar.

1. Press
2. When [Enable WLAN?] appears, press [Yes].
3. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
4. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: http://192.168.1.2)
5. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

Routers or access points that support WPS are marked with this symbol:
If you are using a Windows® 7, Windows® 8, or Windows® 10 computer as a Registrar, complete the following steps:

6. Do one of the following:
   - Windows® 7
     Click (Start) > Devices and Printers > Add a device.
   - Windows® 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel > Hardware and Sound > Devices and Printers > Add a device.
   - Windows® 10
     Click > Windows System > Control Panel. In the Hardware and Sound group, click Add a device.

7. Select your machine and click Next.

8. Type the PIN displayed on the machine's LCD, and then click Next.

9. (Windows® 7) Select your network, and then click Next.

10. Click Close.

- Additional Methods of Configuring Your Brother Machine for a Wireless Network
Configure Your Machine for a Wireless Network When the SSID is Not Broadcast

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and write down the current wireless network settings.

<table>
<thead>
<tr>
<th>Network Name (SSID)</th>
</tr>
</thead>
<tbody>
<tr>
<td>HELLO</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Communication Mode</th>
<th>Authentication Method</th>
<th>Encryption Mode</th>
<th>Network Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>Infrastructure</td>
<td>Open System</td>
<td>NONE</td>
<td>-</td>
</tr>
<tr>
<td></td>
<td>Shared Key</td>
<td>WEP</td>
<td></td>
</tr>
<tr>
<td></td>
<td>WPA/WPA2-PSK</td>
<td>AES</td>
<td>12345678</td>
</tr>
</tbody>
</table>

   For example:

<table>
<thead>
<tr>
<th>Network Name (SSID)</th>
</tr>
</thead>
<tbody>
<tr>
<td>HELLO</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Communication Mode</th>
<th>Authentication Method</th>
<th>Encryption Mode</th>
<th>Network Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>Infrastructure</td>
<td>WPA2-PSK</td>
<td>AES</td>
<td>12345678</td>
</tr>
</tbody>
</table>

   If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.

2. Press [Settings] > [All Settings] > [Network] > [WLAN] > [Setup Wizard].

3. When [Enable WLAN?] appears, press [Yes].
   The wireless setup wizard starts. To cancel, press [No].

4. The machine searches for your network and displays a list of available SSIDs. Press ▲ or ▼ to display the [<New SSID>] option, and then press it.

5. Press [OK].

6. Enter the SSID name, and then press [OK].

   For more information about how to enter text, see the Appendix.

7. Press [Infrastructure].

8. Select the Authentication Method, and then press it.

9. Do one of the following:
   - If you selected the [Open System] option, press either [None] or [WEP].
     If you selected the [WEP] option for Encryption type, enter the WEP key, and then press [OK].
   - If you selected the [Shared Key] option, enter the WEP key, and then press [OK].
   - If you selected the [WPA/WPA2-PSK] option, press either [TKIP+AES] or [AES].
     Enter the WPA key, and then press [OK].
• For more information about how to enter text, see the Appendix.
• Your Brother machine supports the use of the first WEP key only.

10. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

<td>Brother</td>
<td>12345678</td>
</tr>
</tbody>
</table>
• If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.

• If you verify your machine using the common name of the server certificate, we recommend writing down the common name before you start configuration. Contact your network administrator about the common name of the server certificate.

2. Press [Settings] > [All Settings] > [Network] > [WLAN] > [Setup Wizard].

3. When [Enable WLAN?] appears, press [Yes].

The wireless setup wizard starts. To cancel, press [No].

4. The machine searches for your network and displays a list of available SSIDs. Press ▲ or ▼ to display the [<New SSID>] option, and then press it.

5. Press [OK].

6. Enter the SSID name, and then press [OK].

For more information about how to enter text, see the Appendix.

7. Press [Infrastructure].

8. Select the Authentication Method, and then press it.

9. Do one of the following:

   • If you selected the [LEAP] option, enter the user ID, and then press [OK]. Enter the Password, and then press [OK].

   • If you selected the [EAP-FAST],[PEAP] or [EAP-TTLS] option, select the Inner Authentication method [NONE],[CHAP],[MS-CHAP],[MS-CHAPv2],[GTC] or [PAP].

Depending on your Authentication method, the Inner Authentication method selections differ.

Select the encryption type [TKIP+AES] or [AES].

Select the verification method [No Verification],[CA] or [CA + Server ID].

   - If you selected the [CA + Server ID] option, enter the server ID, user ID and password (if required), and then press [OK] for each option.

   - For other selections, enter the user ID and Password, and then press [OK] for each option.

 If you have not imported a CA certificate into your machine, the machine displays [No Verification].

   • If you selected the [EAP-TLS] option, select the encryption type [TKIP+AES] or [AES].

      The machine will display a list of available Client Certificates, and then select the certificate.

      Select the verification method [No Verification],[CA] or [CA + Server ID].

      - If you selected the [CA + Server ID] option, enter the server ID and user ID, and then press [OK] for each option.

      - For other selections, enter the user ID, and then press [OK].

10. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model’s Downloads page on the Brother Solutions Center at support.brother.com.

Print or Scan from Your Mobile Device Using Wi-Fi Direct

Wi-Fi Direct is one of the wireless configuration methods developed by the Wi-Fi Alliance®. It allows you to configure a secured wireless network between your Brother machine and a mobile device, such as an Android™ device, Windows® device, iPhone, iPod touch, or iPad, without using an access point. Wi-Fi Direct supports wireless network configuration using the one-push or PIN Method of Wi-Fi Protected Setup™ (WPS). You can also configure a wireless network by manually setting a SSID and password. Your Brother machine’s Wi-Fi Direct feature supports WPA2™ security with AES encryption.

1. Mobile device
2. Your Brother machine

- Although the Brother machine can be used in both a wired (supported models only) and wireless network, only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection and Wi-Fi Direct connection can be used at the same time.
- The Wi-Fi Direct supported device can become a Group Owner (G/O). When configuring the Wi-Fi Direct network, the Group Owner (G/O) serves as an access point.

</table>

2. Does your mobile device support one-push configuration for Wi-Fi Direct?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the One-Push Method</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the PIN Method</td>
</tr>
</tbody>
</table>

3. Does your mobile device support Wi-Fi Protected Setup™ (WPS)?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>Go to Step 4</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Manually</td>
</tr>
</tbody>
</table>

4. Does your mobile device support one-push configuration for Wi-Fi Protected Setup™ (WPS)?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the One-Push Method of Wi-Fi Protected Setup™ (WPS)</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)</td>
</tr>
</tbody>
</table>

To use Brother iPrint&Scan functionality in a Wi-Fi Direct network configured by one-push configuration using Wi-Fi Direct or by PIN Method configuration using Wi-Fi Direct, the device you use to configure Wi-Fi Direct must be running Android™ 4.0 or greater.

**Related Information**

Configure Your Wi-Fi Direct Network Using the One-Push Method

If your mobile device supports Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

1. Press **[Settings]** > **[All Settings]** > **[Network]** > **[Wi-Fi Direct]** > **[Push Button]**.

2. Activate Wi-Fi Direct on your mobile device (see your mobile device’s user's guide for instructions) when **[Activate Wi-Fi Direct on other device. Then Press [OK].]** appears. Press **[OK]** on your Brother machine. This will start the Wi-Fi Direct setup.

3. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), connect your mobile device to the machine directly.
   - When your Brother machine is not the Group Owner (G/O), it will display available device names with which to configure a Wi-Fi Direct network. Select the mobile device to which you want to connect. Search for available devices again by pressing **[Rescan]**.

If your mobile device connects successfully, the machine displays **[Connected]**. You have completed the Wi-Fi Direct network setup.

Configure Your Wi-Fi Direct Network Using the One-Push Method of Wi-Fi Protected Setup™ (WPS)

If your mobile device supports WPS (PBC; Push Button Configuration), follow these steps to configure a Wi-Fi Direct network:

When the machine receives the Wi-Fi Direct request from your mobile device, the message [Wi-Fi Direct connection request received. Press [OK] to connect.] will appear on the LCD. Press [OK] to connect.

1. Press [Settings] > [All Settings] > [Network] > [Wi-Fi Direct] > [Group Owner] > [On].
2. Press [Push Button].
3. Activate your mobile device's WPS one-push configuration method (see your mobile device's user's guide for instructions). When [Activate Wi-Fi Direct on other device. Then Press [OK].] appears on the machine's LCD, press [OK] on your machine.

This will start the Wi-Fi Direct setup.

If your mobile device connects successfully, the machine displays [Connected]. You have completed the Wi-Fi Direct network setup.

Configure Your Wi-Fi Direct Network Using the PIN Method

If your mobile device supports the PIN Method of Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

1. Press \[Settings\] > \[All Settings\] > \[Network\] > \[Wi-Fi Direct\] > \[PIN Code\].

2. Activate Wi-Fi Direct on your mobile device (see your mobile device’s user’s guide for instructions) when \[Activate Wi-Fi Direct on other device. Then Press [OK].\] appears. Press [OK] on your Brother machine. This will start the Wi-Fi Direct setup.

3. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), it will wait for a connection request from your mobile device. When [PIN Code] appears, enter the PIN displayed on your mobile device in the machine. Press [OK]. Follow the instructions.
     If the PIN is displayed on your Brother machine, enter the PIN in your mobile device.
   - When your Brother machine is not the Group Owner (G/O), it will display available device names with which to configure a Wi-Fi Direct network. Select the mobile device to which you want to connect. Search for available devices again by pressing [Rescan].
     Do one of the following:
     - Press [Display PIN Code] to display the PIN on your machine and enter the PIN in your mobile device. Follow the instructions.
     - Press [Input PIN Code] to enter a PIN shown on your mobile device in the machine, and then press [OK]. Follow the instructions.

     If your mobile device does not display a PIN, press \[\] on your Brother machine. Go back to step 1 and try again.

If your mobile device connects successfully, the machine displays [Connected]. You have completed the Wi-Fi Direct network setup.

Print the Network Configuration Report

The Network Configuration Report lists the network configuration, including the network print server settings.

- Node Name: The Node Name appears on the current Network Configuration Report. The default Node Name is "BRNxxxxxxxxxxxx" for a wired network or "BRWxxxxxxxxxxxx" for a wireless network (where "xxxxxxxxxxxx" is your machine's MAC Address / Ethernet Address.)
- If the [IP Address] on the Network Configuration Report shows 0.0.0.0, wait for one minute and try printing it again.
- You can find your machine's settings, such as the IP address, subnet mask, node name, and MAC Address on the report, for example:
  - IP address: 192.168.0.5
  - Subnet mask: 255.255.255.0
  - Node name: BRN000ca0000499
  - MAC Address: 00-0c-a0-00-04-99

1. Press [Settings] > [All Settings] > [Print Reports] > [Network Configuration] > [Yes].
   The machine prints the current Network Configuration Report.

Change LDAP Configuration Using Web Based Management

Use Web Based Management to configure your LDAP settings in a web browser.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   
   For example:
   
   https://192.168.1.2

3. If the machine prompts you for a password, type it, and then click.

4. Click the Network tab.
5. Click the Protocol menu in the left navigation bar.
6. Select the LDAP check box, and then click Submit.
7. Restart your Brother machine to activate the configuration.
8. On your computer, in Web Based Management's Address Book tab, select LDAP in the left navigation bar.
   
   - LDAP Search
   - LDAP Server Address
   - Port (The default port number is 389.)
   - Search Root
   - Authentication
   - Username
     This selection will be available depending on the authentication method used.
   - Password
     This selection will be available depending on the authentication method used.
   - Kerberos Server Address
     This selection will be available depending on the authentication method used.
   - Timeout for LDAP
   - Attribute of Name (Search Key)
   - Attribute of E-mail
   - Attribute of Fax Number
9. When finished, click Submit. Make sure the Status field reads OK.

Related Information

- Configure and Operate LDAP Search
- Synchronize Time with the SNTP Server Using Web Based Management
Perform an LDAP Search Using Your Machine's Control Panel

After you configure LDAP settings, you can use the LDAP search feature to find fax numbers to use for:

- Sending a Fax

- The LDAP feature supports LDAPv3.
- The LDAP feature does not support SSL/TLS.
- You may need to use Kerberos Authentication or Simple Authentication to connect to your LDAP server, depending on the security policy set by your network administrator.
- You must configure the SNTP protocol (network time server), or you must set the date, time and time zone correctly on the control panel for Kerberos authentication.

1. Press 🔍 to search.
2. Enter the initial characters for your search using the LCD.

- You can enter up to 15 characters.
- For more information about how to enter text, see the Appendix.
3. Press [OK].
   
   The LDAP search result will be shown on the LCD; the 📞 icon appears before the local address book search results.
   
   - If there is no match on the server or the local address book, the LCD will show [Results cannot be found.] for about 60 seconds.
4. Press ▲ or ▼ to display the name you want.
5. Press the name.
   
   To view the details of the name, press [Detail].
6. If the result includes more than one fax number, the machine will prompt you to select just one. Press [Apply], and then [Fax Start].

Related Information

- Configure and Operate LDAP Search
- Synchronize Time with the SNTP Server Using Web Based Management
Synchronize Time with the SNTP Server Using Web Based Management

The Simple Network Time Protocol (SNTP) is used to synchronize the time used by the machine for authentication with the SNTP time server. (This is not the time displayed on the machine’s LCD.) You can automatically or manually synchronize the machine’s time with the Coordinated Universal Time (UTC) provided by the SNTP time server.

- Configure Date and Time Using Web Based Management
- Configure the SNTP Protocol Using Web Based Management
- Change LDAP Configuration Using Web Based Management
- Perform an LDAP Search Using Your Machine's Control Panel
Configure Date and Time Using Web Based Management

Configure date and time to synchronize the time used by the machine with the SNTP time server.

This feature is not available in some countries.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click ➡️
4. Click the Administrator tab.
5. Click Date&Time in the left navigation bar.

6. Verify the Time Zone settings.

   Select the time difference between your location and UTC from the Time Zone drop-down list. For example, the time zone for Eastern Time in the USA and Canada is UTC-05:00.

7. Select the Synchronize with SNTP server check box.
8. Click Submit.

Related Information

- Synchronize Time with the SNTP Server Using Web Based Management
Configure the SNTP Protocol Using Web Based Management

Configure the SNTP protocol to synchronize the time the machine uses for authentication with the time kept by the SNTP time server.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click .
4. Click the Network tab.
5. Click the Protocol menu in the left navigation bar.
6. Select the SNTP check box to activate the settings.
7. Click Submit.
8. Restart your Brother machine to activate the configuration.
9. Next to the SNTP check box, click Advanced Settings.
10. Configure the settings.

### Wireless LAN Report Error Codes

If the Wireless LAN Report shows that the connection failed, check the error code on the printed report and see the corresponding instructions in the table:

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Problem and Recommended Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>TS-01</td>
<td>The wireless setting is not activated. Change the wireless setting to ON. If a network cable is connected to your machine, disconnect it and change the wireless setting of your machine to ON.</td>
</tr>
</tbody>
</table>
| TS-02      | The wireless access point/router cannot be detected.  
1. Check the following two points:  
   - Unplug the power to your wireless access point/router, wait for 10 seconds, and then plug it back in.  
   - If your WLAN access point/router is using MAC address filtering, confirm that the MAC address of the Brother machine is allowed in the filter.  
2. If you manually entered the SSID and security information (SSID/authentication method/encryption method/Network Key), the information may be incorrect. Reconfirm the SSID and security information and re-enter the correct information as necessary.  
This device does not support a 5GHz SSID/ESSID and you must select a 2.4 GHz SSID/ESSID. Make sure the access point/router is set to 2.4 GHz or 2.4 GHz/5 GHz mixed mode. |
| TS-03      | The wireless network and security setting you entered may be incorrect. Reconfirm the wireless network settings. If you do not know this information, ask your network administrator. |
| TS-04      | The Authentication/Encryption methods used by the selected wireless access point/router are not supported by your machine. Change the authentication and encryption methods of the wireless access point/router. Your machine supports the following authentication methods:  
   - WPA-Personal  
     TKIP or AES  
   - WPA2-Personal  
     TKIP or AES  
   - Open  
     WEP or None (without encryption)  
   - Shared key  
     WEP  
If your problem is not solved, the SSID or network settings you entered may be incorrect. Confirm the wireless network settings. |
| TS-05      | The security information (SSID/Network Key) is incorrect. Confirm the SSID and Network Key. |
| TS-06      | The wireless security information (Authentication method/Encryption method/Network Key) is incorrect. Confirm the wireless security information (Authentication method/Encryption method/Network Key). |
| TS-07      | The machine cannot detect a WLAN access point/router that has WPS enabled. If you want to connect with WPS, you must operate both your machine and the WLAN access point/router. Confirm the connection method for WPS on WLAN access point/router and try starting again. If you do not know how to operate your WLAN access point/router using WPS, see the documentation provided with your WLAN access point/router, ask the manufacturer of your WLAN access point/router, or ask your network administrator. |
Error Code | Problem and Recommended Solutions
--- | ---
TS-08 | Two or more WLAN access points that have WPS enabled are detected.  
- Confirm that only one WLAN access point/router within range has the WPS method active and try again.  
- Try again after a few minutes to avoid interference from other access points.

How to confirm wireless security information (SSID/authentication method/encryption method/Network Key) of your WLAN access point/router:

1. The Default security settings may be provided on a label attached to the WLAN access point/router. Or the manufacturer's name or model number of the WLAN access point/router may be used as the default security settings.

2. See the documentation provided with your WLAN access point/router for information on how to find the security settings.
   - If the WLAN access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name.
   - The Network key may also be described as the Password, Security Key or Encryption Key.

If you do not know the SSID and wireless security settings of your WLAN access point/router or how to change the configuration, see the documentation provided with your WLAN access point/router, ask the manufacturer of your access point/router or ask your Internet provider or network administrator.

Setting Scan restrictions (for administrators)

Secure Function Lock 3.0 allows an administrator to restrict which users are allowed to scan. When the Scan feature is set to Off for the public user setting, only users who have the Scan check box selected will be able to scan.

Using the Scan feature (for restricted users)

- To scan using the machine's control panel:
  Restricted users must enter their PINs on the machine's control panel to access Scan mode.
- To scan from a computer:
  Restricted users must enter their PINs on the machine's control panel before scanning from their computers. If the PIN is not entered on the machine's control panel, an error message will appear on the user's computer.

If the machine supports ID card authentication, restricted users can also access Scan mode by touching the NFC symbol on the machine's control panel with their registered ID cards.

Related Information

- Secure Function Lock 3.0
Use the Secure Function Lock screen to set up Public Mode, which limits the functions available to public users. Public users will not need to enter a password to access the features made available through Public Mode settings.

Public Mode includes print jobs sent via Google Cloud Print™, Brother iPrint&Scan, and CUPS driver (Mac).

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example: https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click ▶
4. Click the Administrator tab.
5. Click the Restriction Management or User Restriction Function menu in the left navigation bar.
7. Click Submit.
8. Click the Restricted Functions menu in the left navigation bar.
9. In the Public Mode row, select a check box to allow or clear a check box to restrict the function listed.
10. Click Submit.

Related Information

- Secure Function Lock 3.0
Additional Secure Function Lock 3.0 Features

Configure the following features in the Secure Function Lock screen:

**All Counter Reset**
- Click **All Counter Reset**, in the Page Counters column, to reset the page counter.

**Export to CSV file**
- Click **Export to CSV file**, to export the current and last page counter including User List / Restricted Functions information as a CSV file.

**Card ID (NFC ID) (supported models only)**
- Click the **User List** menu, and then type a users' Card ID in the Card ID (NFC ID) field. You can use your IC card for authentication.

**Last Counter Record**
- Click **Last Counter Record** if you want the machine to retain the page count after the counter has been reset.

**Counter Auto Reset**
- Click **Counter Auto Reset** to configure the time interval you want between page counter reset. Choose a daily, weekly, or monthly interval.

**Related Information**

- Secure Function Lock 3.0
Register an External IC Card Reader

When you connect an external IC card reader, use Web Based Management to register the card reader. Your machine supports HID class driver supported external IC card readers.

1. Start your web browser.

2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

3. If the machine prompts you for a password, type it, and then click →.

4. Click the Administrator tab.

5. Click the External Card Reader menu, and then enter the necessary information.

6. Click Submit.

7. Restart your Brother machine to activate the configuration.

8. Unplug the power code from the AC power outlet.

9. Connect the card reader to your machine, and then plug the machine’s power cord into the AC power outlet.

10. Touch the card to the card reader when using card authentication.

Introduction to Active Directory® Authentication

Active Directory® Authentication restricts the use of your Brother machine. If Active Directory® Authentication is enabled, the machine's control panel will be locked. You cannot change the machine's settings until you enter a User ID and password.

Active Directory® Authentication offers the following features:

- Stores incoming fax data

When Active Directory® Authentication is enabled, your machine stores all incoming fax data. After you log on, the machine prints the stored fax data.

You can change the Active Directory® Authentication settings using Web Based Management or BRAdmin Professional (Windows®).

Related Information

- Use Active Directory® Authentication
Active Directory® authentication supports Kerberos authentication and NTLMv2 authentication. You must configure the SNTP protocol (network time server) and DNS server configuration for authentication.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click.
4. Click the Administrator tab.
5. Click the User Restriction Function menu in the left navigation bar.
7. Click Submit.
8. Select the Active Directory Authentication menu in the left navigation bar.
9. Configure the following settings:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storage Fax RX Data</td>
<td>Select this option to store incoming fax data. You can print all incoming fax data after you log on to the machine.</td>

• Stores incoming fax data

When LDAP Authentication is enabled, your machine stores all incoming fax data. After you log on, the machine prints the stored fax data.

You can change the LDAP Authentication settings using Web Based Management or BRAdmin Professional (Windows®).

Related Information

• Use LDAP Authentication
Configure LDAP Authentication Using Web Based Management

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click.
4. Click the Administrator tab.
5. Click the User Restriction Function menu in the left navigation bar.
6. Select LDAP Authentication.
7. Click Submit.
8. Click the LDAP Authentication menu in the left navigation bar.
9. Configure the following settings:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storage Fax RX Data</td>
<td>Select this option to store incoming fax data. You can print all incoming fax data after you log on to the machine.</td>
</tr>
<tr>
<td>Remember User ID</td>
<td>Select this option to save your User ID.</td>
</tr>
<tr>
<td>LDAP Server Address</td>
<td>Type the IP address or the server name (for example: ldap.example.com) of the LDAP server.</td>
</tr>
<tr>
<td>Get User's Home Directory</td>
<td>Select this option to obtain your home directory as the Scan to Network destination.</td>
</tr>
<tr>
<td>LDAP Server Port</td>
<td>Type the LDAP server port number.</td>
</tr>
<tr>
<td>LDAP Search Root</td>
<td>Type the LDAP search root directory.</td>
</tr>
<tr>
<td>Attribute of Name (Search Key)</td>
<td>Type the attribute you want to use as a search key.</td>
</tr>
</tbody>
</table>

1 If this option is not available, update your machine's firmware. Go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

10. Click Submit.

Related Information

- Use LDAP Authentication
When LDAP Authentication is enabled, the machine's control panel will be locked until you enter your User ID and password on the machine's control panel.

1. On the machine's control panel, use the touchscreen to enter your User ID and Password.
2. Press [OK].
3. When authentication is successful, the machine's control panel will be unlocked.

Manage Your Network Machine Securely Using SSL/TLS

- Certificates and Web Based Management
You must configure a certificate to manage your networked Brother machine securely using SSL/TLS. You must use Web Based Management to configure a certificate.

- Supported Security Certificate Features
- Create and Install a Certificate
- Manage Multiple Certificates
Supported Security Certificate Features

Your Brother machine supports the use of multiple security certificates, which allows secure authentication and communication with the machine. The following security certificate features can be used with the machine:

- SSL/TLS communication
- IEEE 802.1x authentication
- IPsec

The Brother machine supports the following:

- Pre-installed certificate
  Your machine has a pre-installed self-signed certificate. This certificate enables you to use SSL/TLS communication without creating or installing a different certificate.

  The pre-installed self-signed certificate protects your communication up to a certain level. We recommend using a certificate that is issued by a trusted organization for better security.

- Self-signed certificate
  This print server issues its own certificate. Using this certificate, you can easily use the SSL/TLS communication without creating or installing a different certificate from a CA.

- Certificate from a Certificate Authority (CA)
  There are two methods for installing a certificate from a CA. If you already have a certificate from a CA or if you want to use a certificate from an external trusted CA:
    - When using a Certificate Signing Request (CSR) from this print server.
    - When importing a certificate and a private key.

- Certificate Authority (CA) Certificate
  To use a CA certificate that identifies the CA and owns its private key, you must import that CA certificate from the CA before configuring the security features of the Network.

  If you are going to use SSL/TLS communication, we recommend contacting your system administrator first.
  When you reset the print server back to its default factory settings, the certificate and the private key that are installed will be deleted. If you want to keep the same certificate and the private key after resetting the print server, export them before resetting, and then reinstall them.

Create and Install a Certificate

• Step by Step Guide for Creating and Installing a Certificate
• Create and Install a Self-signed Certificate
• Create and Install a Certificate from a Certificate Authority (CA)
• Import and Export a CA Certificate
Step by Step Guide for Creating and Installing a Certificate

There are two options when choosing a security certificate: use a self-signed certificate or use a certificate from a Certificate Authority (CA).

These are a brief summary of the actions required, based on the option you choose.

Option 1

Self-Signed Certificate

1. Create a self-signed certificate using Web Based Management.
2. Install the self-signed certificate on your computer.

Option 2

Certificate from a CA

1. Create a Certificate Signing Request (CSR) using Web Based Management.
2. Install the certificate issued by the CA on your Brother machine using Web Based Management.
3. Install the certificate on your computer.

Related Information

- Create and Install a Certificate
Create and Install a Self-signed Certificate

- Create a Self-signed Certificate
- Install the Self-signed Certificate for Windows® users with Administrator Rights
- Import and Export the Self-signed Certificate on your Brother Machine
Create a Self-signed Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   - If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
       The NetBIOS name can be found in the Network Configuration Report.
   - For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Create Self-Signed Certificate.
8. Enter a Common Name and a Valid Date.
   - The length of the Common Name is less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default.
   - A warning will appear if you use the IPPS or HTTPS protocol and enter a different name in the URL than the Common Name that was used for the self-signed certificate.
9. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
10. Select your setting from the Digest Algorithm drop-down list. The default setting is SHA256.
11. Click Submit.
12. Click the Network tab.
13. Click the Protocol menu in the left navigation bar.
14. Click HTTP Server Settings.
15. Select the certificate you want to configure from the Select the Certificate drop-down list.
16. Click Submit.
17. Click Yes to restart your print server.

The self-signed certificate is created and saved in your machine's memory.

To use SSL/TLS communication, the self-signed certificate must be installed on your computer.

Related Information

• Create and Install a Self-signed Certificate
Install the Self-signed Certificate for Windows® users with Administrator Rights

The following steps are for Microsoft® Internet Explorer®. If you use another web browser, consult the documentation for your web browser to get help with installing certificates.

1. Do one of the following:
   - (Windows® 7 and Windows Server® 2008)
     Click (Start) > All Programs.
   - (Windows® 8)
     Right-click the (Internet Explorer) icon on the taskbar.
   - (Windows® 10 and Windows Server® 2016)
     Click > Windows Accessories.
   - (Windows Server® 2012 and Windows Server® 2012 R2)
     Click (Internet Explorer), and then right-click the (Internet Explorer) icon that appears on the taskbar.

2. Right-click Internet Explorer, and then click Run as administrator.
   
   If the More option appears, click More.
   
   If the User Account Control screen appears, click Yes.

3. Type "https://machine's IP address" in your browser's address bar to access your machine (where "machine's IP address" is the machine's IP address or the node name that you assigned for the certificate).

4. Click Continue to this website (not recommended).

5. Click Certificate error, and then click View certificates.
6. Click Install Certificate…
7. When the Certificate Import Wizard appears, click Next.
8. Select Place all certificates in the following store, and then click Browse….
9. Select Trusted Root Certification Authorities, and then click OK.
10. Click Next.
11. Click Finish.
12. Click Yes, if the fingerprint (thumbprint) is correct.
13. Click OK.

The self-signed certificate is now installed on your computer, and SSL/TLS communication is available.

- Import the Self-signed Certificate
Import and Export the Self-signed Certificate on your Brother Machine

You can store the self-signed certificates on your Brother machine and manage them by importing and exporting.

- Import the Self-signed Certificate
- Export the Self-signed Certificate
1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.

3. If the machine prompts you for a password, type it, and then click.

4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Import Certificate and Private Key.
8. Browse to the file you want to import.
9. Type the password if the file is encrypted, and then click Submit.

The self-signed certificate is imported to your machine.

To use SSL/TLS communication, the self-signed certificate must also be installed on your computer. Contact your network administrator.

Related Information

Export the Self-signed Certificate

1. Start your web browser.

2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.

3. If the machine prompts you for a password, type it, and then click 

4. Click the Network tab.

5. Click the Security tab.

6. Click the Certificate menu in the left navigation bar.

7. Click Export shown with Certificate List.

8. If you want to encrypt the file, type a password in the Enter password field.
   If the Enter password field is blank, your output file will not be encrypted.

9. Type the password again in the Retype password field, and then click Submit.

10. Click ▼ next to Save, and then specify the location where you want to save the file.

The self-signed certificate is exported to your computer.

You can also import the self-signed certificate to your computer.

Related Information

- Import and Export the Self-signed Certificate on your Brother Machine
Create and Install a Certificate from a Certificate Authority (CA)

If you already have a certificate from an external trusted CA, you can store the certificate and private key on the machine and manage them by importing and exporting. If you do not have a certificate from an external trusted CA, create a Certificate Signing Request (CSR), send it to a CA for authentication, and install the returned certificate on your machine.

- Create a Certificate Signing Request (CSR)
- Install a Certificate on Your Brother Machine
- Import and Export the Certificate and Private Key
Create a Certificate Signing Request (CSR)

A Certificate Signing Request (CSR) is a request sent to a Certificate Authority (CA) to authenticate the credentials contained within the certificate.

We recommend installing a Root Certificate from the CA on your computer before creating the CSR.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Create CSR.
8. Type a Common Name (required) and add other information about your Organization (optional).
   • Your company details are required so that a CA can confirm your identity and verify it to the outside world.
   • The length of the Common Name must be less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this printer through SSL/TLS communication. The node name is displayed by default. The Common Name is required.
   • A warning will appear if you type a different name in the URL than the Common Name that was used for the certificate.
   • The length of the Organization, the Organization Unit, the City/Locality and the State/Province must be less than 64 bytes.
   • The Country/Region should be a two character ISO 3166 country code.
   • If you are configuring an X.509v3 certificate extension, select the Configure extended partition check box, and then select Auto (Register IPv4) or Manual.
9. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
10. Select your setting from the Digest Algorithm drop-down list. The default setting is SHA256.
11. Click Submit.
    The CSR appears on your screen. Save the CSR as a file or copy and paste it into an online CSR form offered by a Certificate Authority.
12. Click **Save**.
13. Click ▼ next to **Save**, and then specify the location where you want to save the file.

- Follow your CA’s policy regarding the method to send a CSR to your CA.
- If you are using the Enterprise root CA of Windows Server® 2008/2012/2012 R2/2016, we recommend using the Web Server for the certificate template to securely create the Client Certificate. If you are creating a Client Certificate for an IEEE 802.1x environment with EAP-TLS authentication, we recommend using User for the certificate template. For more detailed information, go to your model's **FAQs & Troubleshooting** page on the Brother Solutions Center at support.brother.com. Search for "SSL".

- Create and Install a Certificate from a Certificate Authority (CA)
Install a Certificate on Your Brother Machine

When you receive a certificate from a CA, follow the steps below to install it into the print server:

Only a certificate issued with your machine’s CSR can be installed onto the machine. When you want to create another CSR, make sure that the certificate is installed before creating another CSR. Create another CSR only after installing the certificate on the machine. If you do not, the CSR you create before installing will be invalid.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser’s address bar (where "machine's IP address" is the machine’s IP address).
   For example: https://192.168.1.2
   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example: https://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
     - For example: https://brnxxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine’s icon on the Status Monitor screen.
3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Install Certificate.
8. Browse to the file that contains the certificate issued by the CA, and then click Submit.
   The certificate has been created successfully and saved in your machine’s memory successfully.

To use SSL/TLS communication, the Root Certificate from the CA must be installed on your computer. Contact your network administrator.

Related Information

- Import and Export a CA Certificate
Manage Multiple Certificates

The multiple certificate feature allows you to use Web Based Management to manage each certificate installed on your machine. In Web Based Management, navigate to the Certificate or CA Certificate screen to view certificate content, delete, or export your certificates.

<table>
<thead>
<tr>
<th>Maximum Number of Certificates Stored UP on Brother Machine</th>
</tr>
</thead>
<tbody>
<tr>
<td>Self-signed Certificate or Certificate Issued by a CA</td>
</tr>
<tr>
<td>CA Certificate</td>
</tr>
</tbody>
</table>

We recommend storing one less certificate than allowed, reserving an empty spot in case of certificate expiration. When a certificate expires, import a new certificate into the reserved spot, and then delete the expired certificate. This ensures that you avoid configuration failure.

- When you use HTTPS/IPPS or IEEE 802.1x, you must select which certificate you are using.
- When you use SSL for SMTP communications, you do not have to choose the certificate. The necessary certificate will be chosen automatically.

- Configure an IPsec Address Template Using Web Based Management
- Configure an IPsec Template Using Web Based Management
Introduction to IPsec

IPsec (Internet Protocol Security) is a security protocol that uses an optional Internet Protocol function to prevent manipulation and ensure the confidentiality of data transmitted as IP packets. IPsec encrypts data carried over the network, such as print data sent from computers to a printer. Because the data is encrypted at the network layer, applications that employ a higher-level protocol use IPsec even if the user is not aware of its use.

IPsec supports the following functions:

- **IPsec transmissions**
  According to the IPsec setting conditions, the network-connected computer sends data to and receives data from the specified device using IPsec. When the devices start communicating using IPsec, keys are exchanged using Internet Key Exchange (IKE) first, and then the encrypted data is transmitted using the keys.

  In addition, IPsec has two operation modes: the Transport mode and Tunnel mode. The Transport mode is used mainly for communication between devices and the Tunnel mode is used in environments such as a Virtual Private Network (VPN).

- **IPsec settings**
  The settings that are necessary for connections using IPsec. These settings can be configured using Web Based Management.

  To configure the IPsec settings, you must use the browser on a computer that is connected to the network.

**Related Information**

- Manage Your Network Machine Securely Using IPsec
# Configure IPsec Using Web Based Management

The IPsec connection conditions are comprised of two Template types: Address and IPsec. You can configure up to 10 connection conditions.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the IPsec menu in the left navigation bar.
7. Configure the settings.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Status</td>
<td>Enable or disable IPsec.</td>
</tr>
<tr>
<td>Negotiation Mode</td>
<td>Select Negotiation Mode for IKE Phase 1. IKE is a protocol that is used to exchange encryption keys in order to carry out encrypted communication using IPsec. In Main mode, the processing speed is slow, but the security is high. In Aggressive mode, the processing speed is faster than Main mode, but the security is lower.</td>
</tr>
<tr>
<td>All Non-IPsec Traffic</td>
<td>Select the action to be taken for non-IPsec packets. When using Web Services, you must select Allow for All Non-IPsec Traffic. If you select Drop, Web Services cannot be used.</td>
</tr>
<tr>
<td>Broadcast/Multicast Bypass</td>
<td>Select Enabled or Disabled.</td>
</tr>
<tr>
<td>Protocol Bypass</td>
<td>Select the check box for the option or options you want.</td>
</tr>
<tr>
<td>Rules</td>
<td>Select the Enabled check box to activate the template. When you select multiple check boxes, the lower numbered check boxes have priority if the settings for the selected check boxes conflict. Click on the corresponding drop-down list to select the Address Template that is used for the IPsec connection conditions. To add an Address Template, click Add Template. Click on the corresponding drop-down list to select the IPsec Template that is used for the IPsec connection conditions. To add an IPsec Template, click Add Template.</td>
</tr>
</tbody>
</table>

8. Click Submit.

If the machine must be restarted to register the new settings, the restart confirmation screen will appear. If there is a blank item in the template you enabled in the Rules table, an error message appears. Confirm your choices and click Submit again.

<tr>
<td></td>
<td>Because the prefix is specified in the form of a 24-bit subnet mask (255.255.255.0) for 192.168.1.1, the addresses 192.168.1.xxx are valid.</td>
</tr>
</tbody>
</table>

9. Click **Submit**.

When you change the settings for the template currently in use, restart your machine to activate the configuration.

**Related Information**

- Manage Your Network Machine Securely Using IPsec
1. Start your web browser.

2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   
   For example: https://192.168.1.2

3. If the machine prompts you for a password, type it, and then click .

4. Click the Network tab.

5. Click the Security tab.

6. Click IPsec Template in the left navigation bar.
   
   The Template List appears, displaying 10 IPsec Templates.
   
   Click the Delete button to delete an IPsec Template. When an IPsec Template is in use, it cannot be deleted.

7. Click IPsec Template that you want to create. The IPsec Template screen appears. The configuration fields differ based on the Use Prefixed Template and Internet Key Exchange (IKE) you select.

8. In the Template Name field, type a name for the template (up to 16 characters).

9. If you selected Custom in the Use Prefixed Template drop-down list, select the Internet Key Exchange (IKE) options, and then change the settings if needed.

10. Click Submit.

SA (Security Association) is an encrypted communication method using IPsec or IPv6 that exchanges and shares information, such as the encryption method and encryption key, in order to establish a secure communication channel before communication begins. SA may also refer to a virtual encrypted communication channel that has been established. The SA used for IPsec establishes the encryption method, exchanges the keys, and carries out mutual authentication according to the IKE (Internet Key Exchange) standard procedure. In addition, the SA is updated periodically.

**Perfect Forward Secrecy (PFS)**

PFS does not derive keys from previous keys that were used to encrypt messages. In addition, if a key that is used to encrypt a message was derived from a parent key, that parent key is not used to derive other keys. Therefore, even if a key is compromised, the damage will be limited only to the messages that were encrypted using that key.
Select Enabled or Disabled.

**Authentication Method**

Select the authentication method. Select Pre-Shared Key or Certificates.

**Pre-Shared Key**

When encrypting communication, the encryption key is exchanged and shared beforehand using another channel.

If you selected Pre-Shared Key for the Authentication Method, type the Pre-Shared Key (up to 32 characters).

- **Local/ID Type/ID**
  - Select the sender's ID type, and then type the ID.
  - Select IPv4 Address, IPv6 Address, FQDN, E-mail Address, or Certificate for the type.
  - If you select Certificate, type the common name of the certificate in the ID field.

- **Remote/ID Type/ID**
  - Select the recipient's ID type, and then type the ID.
  - Select IPv4 Address, IPv6 Address, FQDN, E-mail Address, or Certificate for the type.
  - If you select Certificate, type the common name of the certificate in the ID field.

**Certificate**

If you selected Certificates for Authentication Method, select the certificate.

You can select only the certificates that were created using the Certificate page of Web Based Management’s Security configuration screen.

Configure Email Sending Using Web Based Management

We recommend using Web Based Management to configure secured email sending with user authentication.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click .
4. Click the Network tab.
5. Click the Protocol menu in the left navigation bar.
6. In the SMTP field, click Advanced Setting and make sure the status of SMTP is Enabled.
7. Configure the SMTP settings.
   - Confirm that the email settings are correct after configuration by sending a test email.
   - If you do not know the SMTP server settings, contact your network administrator or Internet Service Provider (ISP).
8. When finished, click Submit.
   The Test Send E-mail Configuration dialog box appears.
9. Follow the instructions in the dialog box to test the current settings.

Related Information

- Send an Email Securely
Send an Email with User Authentication

Your Brother machine supports the SMTP-AUTH method to send email via an email server that requires user authentication. This method prevents unauthorized users from accessing the email server.

You can use the SMTP-AUTH method for email notification and email reports (available for certain models).

We recommend using Web Based Management to configure the SMTP authentication.

Email Server Settings

You must configure your machine’s SMTP authentication method to match the method used by your email server. For details about your email server settings, contact your network administrator or Internet Service Provider (ISP).

To enable SMTP server authentication: in the Web Based Management SMTP screen, under Server Authentication Method, you must select SMTP-AUTH.

Related Information

- Send an Email Securely
Send an Email Securely Using SSL/TLS

Your Brother machine supports SSL/TLS communication methods. To use email server that is using SSL/TLS communication, you must configure following settings.

We recommend using Web Based Management to configure SSL/TLS.

Verify Server Certificate

Under SSL/TLS, if you choose SSL or TLS, the Verify Server Certificate check box will be selected automatically.

- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm if importing a CA certificate is necessary.
- If you do not need to verify the server certificate, clear the Verify Server Certificate check box.

Port Number

If you select SSL, or TLS, the Port value will be changed to match the protocol. To change the port number manually, type the port number after you select SSL/TLS settings.

You must configure your machine’s communication method to match the method used by your email server. For details about your email server settings, contact your network administrator or your ISP.

In most cases, the secured webmail services require the following settings:

<table>
<thead>
<tr>
<th>SMTP</th>
<th>Port</th>
<th>25</th>
</tr>
</thead>
<tbody>
<tr>
<td>Server Authentication Method</td>
<td>SMTP-AUTH</td>
<td></td>
</tr>
<tr>
<td>SSL/TLS</td>
<td></td>
<td>TLS</td>
</tr>
</tbody>
</table>

- Send an Email Securely
Use IEEE 802.1x Authentication for a Wired or a Wireless Network

- What Is IEEE 802.1x Authentication?
- Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management (Web Browser)
- IEEE 802.1x Authentication Methods
What Is IEEE 802.1x Authentication?

IEEE 802.1x is an IEEE standard for wired and wireless networks that limits access from unauthorized network devices. Your Brother machine (supplicant) sends an authentication request to a RADIUS server (Authentication server) through your access point or HUB. After your request has been verified by the RADIUS server, your machine can access the network.

Related Information

- Use IEEE 802.1x Authentication for a Wired or a Wireless Network
Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management (Web Browser)

- If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.
- Before you verify the server certificate, you must import the CA certificate that has been issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm whether a CA certificate import is necessary.

You can also configure IEEE 802.1x authentication using:
- BRAdmin Professional (Wired and wireless network)
- Wireless setup wizard from the control panel (Wireless network)
- Wireless setup wizard on the installation disc (Wireless network)

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example: https://192.168.1.2
   - For example: https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example: https://brnxxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.
   - For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Do one of the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wired network</td>
<td>Click the Wired tab, and then select Wired 802.1x Authentication in the left navigation bar.</td>
</tr>
<tr>
<td>Wireless network</td>
<td>Click the Wireless tab, and then select Wireless (Enterprise) in the left navigation bar.</td>
</tr>
</tbody>
</table>
6. Configure the IEEE 802.1x authentication settings.
To enable IEEE 802.1x authentication for wired networks, select **Enabled** for **Wired 802.1x status** on the **Wired 802.1x Authentication** page.

- If you are using **EAP-TLS** authentication, you must select the client certificate that has been installed (shown with certificate name) for verification from the **Client Certificate** drop-down list.

- If you select **EAP-FAST, PEAP, EAP-TTLS, or EAP-TLS** authentication, select the verification method from the **Server Certificate Verification** drop-down list. Verify the server certificate using the CA certificate, imported to the machine in advance, that has been issued by the CA that signed the server certificate.

Select one of the following verification methods from the **Server Certificate Verification** drop-down list:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>No Verification</td>
<td>The server certificate can always be trusted. The verification is not performed.</td>
</tr>
<tr>
<td>CA Cert.</td>
<td>The verification method to check the CA reliability of the server certificate, using the CA certificate that has been issued by the CA that signed the server certificate.</td>
</tr>
<tr>
<td>CA Cert. + ServerID</td>
<td>The verification method to check the common name value of the server certificate, in addition to the CA reliability of the server certificate.</td>
</tr>
</tbody>
</table>

7. When finished with configuration, click **Submit**.

For wired networks: After configuring, connect your machine to the IEEE 802.1x supported network. After a few minutes, print the Network Configuration Report to check the **Wired IEEE 802.1x** Status.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Success</td>
<td>The wired IEEE 802.1x function is enabled and the authentication was successful.</td>
</tr>
<tr>
<td>Failed</td>
<td>The wired IEEE 802.1x function is enabled; however, the authentication failed.</td>
</tr>
<tr>
<td>Off</td>
<td>The wired IEEE 802.1x function is not available.</td>
</tr>
</tbody>
</table>

---

1 The common name verification compares the common name of the server certificate to the character string configured for the **Server ID**. Before you use this method, contact your system administrator about the server certificate's common name and then configure **Server ID**.
IEEE 802.1x Authentication Methods

LEAP (Wireless network)
Lightweight Extensible Authentication Protocol (LEAP) is a proprietary EAP method developed by Cisco Systems, Inc., which uses a user ID and password for authentication.

EAP-FAST
Extensible Authentication Protocol-Flexible Authentication via Secured Tunneling (EAP-FAST) has been developed by Cisco Systems, Inc., which uses a user ID and password for authentication, and symmetric key algorithms to achieve a tunneled authentication process.

The Brother machine supports the following inner authentication methods:
- EAP-FAST/NONE
- EAP-FAST/MS-CHAPv2
- EAP-FAST/GTC

EAP-MD5 (Wired network)
Extensible Authentication Protocol-Message Digest Algorithm 5 (EAP-MD5) uses a user ID and password for challenge-response authentication.

PEAP
Protected Extensible Authentication Protocol (PEAP) is a version of EAP method developed by Cisco Systems, Inc., Microsoft® Corporation and RSA Security. PEAP creates an encrypted Secure Sockets Layer (SSL)/Transport Layer Security (TLS) tunnel between a client and an authentication server, for sending a user ID and password. PEAP provides mutual authentication between the server and the client.

The Brother machine supports the following inner authentications:
- PEAP/MS-CHAPv2
- PEAP/GTC

EAP-TTLS
Extensible Authentication Protocol-Tunneled Transport Layer Security (EAP-TTLS) has been developed by Funk Software and Certicom. EAP-TTLS creates a similar encrypted SSL tunnel to PEAP, between a client and an authentication server, for sending a user ID and password. EAP-TTLS provides mutual authentication between the server and the client.

The Brother machine supports the following inner authentications:
- EAP-TTLS/CHAP
- EAP-TTLS/MS-CHAP
- EAP-TTLS/MS-CHAPv2
- EAP-TTLS/PAP

EAP-TLS
Extensible Authentication Protocol-Transport Layer Security (EAP-TLS) requires digital certificate authentication both at a client and an authentication server.

Brother Web Connect Overview

Certain websites provide services that allow users to upload and view images and files on the website. Your Brother machine can scan images and upload them to these services, and also download from and print images that are already uploaded to these services.

1. Printing
2. Scanning
3. Photos, images, documents and other files
4. Web Service

To use Brother Web Connect, your Brother machine must be connected to a network that has access to the Internet, through either a wired or wireless connection.

For network setups that use a proxy server, the machine must also be configured to use a proxy server. If you are unsure of your network configuration, check with your network administrator.

A proxy server is a computer that serves as an intermediary between computers without a direct Internet connection, and the Internet.

Press (Web) or (Apps) on the touchscreen to use Brother Web Connect.

Brother Software Installation for Using Brother Web Connect

The initial installation of Brother Web Connect requires a computer that has access to the Internet and has the Brother machine's software installed.

Windows®

To install the Brother Software and configure the machine to be able to print over your wired or wireless network, see the Quick Setup Guide included with your Brother machine.

Mac

To install the Full Driver & Software Package, go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

Related Information

- Conditions for Using Brother Web Connect
Configure the Proxy Server Settings Using the Machine's Control Panel

If your network uses a proxy server, the following proxy server information must be configured on the machine:

- Proxy server address
- Port number
- User Name
- Password

1. Press [Settings] > [All Settings] > [Network] > [Web Connect Settings] > [Proxy Settings] > [Proxy Connection].
2. Press [On].
3. Press the option that you want to set, and then enter the proxy server information. Press [OK].
4. Press [Home].

Related Information

Configure the Proxy Server Settings Using Web Based Management

If your network uses a proxy server, the following proxy server information must be configured using Web Based Management:

- Proxy server address
- Port number
- User Name
- Password

We recommend Microsoft® Internet Explorer® 11/Microsoft Edge™ for Windows®, and Safari 10/11 for Mac. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Protocol menu in the left navigation bar.
6. Make sure the Proxy check box is selected, and then click Submit.
7. In the Proxy field, click Advanced Settings.
8. Enter the proxy server information.
9. Click Submit.

• Create an Account for Each Online Service Before Using Brother Web Connect
• Apply for Brother Web Connect Access
• Register an Account on Your Brother Machine for Brother Web Connect
• Set Up Brother Web Connect for Brother CreativeCenter
Brother Web Connect Setup Overview

Configure the Brother Web Connect settings using the following procedure (when using Brother CreativeCenter, this procedure is not necessary):

**Step 1: Create an account with the service you want to use.**
Access the service’s website using a computer and create an account. (If you already have an account, there is no need to create an additional account.)

1. User registration
2. Web Service
3. Obtain account

**Step 2: Apply for Brother Web Connect access.**
Start Brother Web Connect access using a computer and obtain a temporary ID.

1. Enter account information
2. Brother Web Connect application page
3. Obtain temporary ID

**Step 3: Register your account information on your machine so you can access the service you want to use.**
Enter the temporary ID to enable the service on your machine. Specify the account name as you would like it to be displayed on the machine, and enter a PIN if you would like to use one.

1. Enter temporary ID
2. Web Service

Your Brother machine can now use the service.
Related Information

- Set Up Brother Web Connect
Create an Account for Each Online Service Before Using Brother Web Connect

To use Brother Web Connect to access an online service, you must have an account with that online service. If you do not already have an account, use a computer to access the service's website and create an account. After creating an account, log on and use the account once with a computer before using the Brother Web Connect feature. Otherwise, you may not be able to access the service using Brother Web Connect.

If you already have an account, there is no need to create an additional account.

After you finish creating an account with the online service you want to use, apply for Brother Web Connect access.

Related Information

- Set Up Brother Web Connect
Apply for Brother Web Connect Access

To use Brother Web Connect to access online services, you must first apply for Brother Web Connect access using a computer that has the Brother Software installed.

1. Access the Brother Web Connect application website:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows® 7</td>
<td>Click (Start) &gt; All Programs &gt; Brother &gt; Brother Utilities, and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Windows® 8</td>
<td>Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Windows® 10</td>
<td>Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Windows® 8.1</td>
<td>Move your mouse to the lower left corner of the Start screen and click (if you are using a touch-based device, swipe up from the bottom of the Start screen to bring up the Apps screen). Click (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Mac</td>
<td>Click Go in the Finder bar, Applications &gt; Brother &gt; Utilities &gt; Brother Web Connect.</td>
</tr>
</tbody>
</table>

You can also access the website directly:
Type bwc.brother.com into your web browser's address bar.

The Brother Web Connect page launches.

2. Select the service you want to use.

3. Follow the on-screen instructions and apply for access.
When finished, your temporary ID will appear.
4. Make a note of your temporary ID, as you will need it to register accounts to the machine. The temporary ID is valid for 24 hours.

5. Close the web browser.

Now that you have a Brother Web Connect access ID, you must register this ID on your machine, and then use your machine to access the web service you want to use.

**Related Information**

- Set Up Brother Web Connect
Register an Account on Your Brother Machine for Brother Web Connect

You must enter your Brother Web Connect account information and configure your machine so that it can use Brother Web Connect to access the service you want.

- You must apply for Brother Web Connect access to register an account on your machine.
- Before you register an account, confirm that the correct date and time are set on the machine's control panel.

1. Press ◀ or ▶ to display [Web].
   Press [Web].
   - If information regarding the Internet connection appears on the machine's LCD, read the information and press [OK].
   - Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

2. Press ▲ or ▼ to display the service with which you want to register.
   Press the service name.

3. If information regarding Brother Web Connect appears, press [OK].

4. Press [Register/Delete] > [Register Account].

5. The machine will prompt you to enter the temporary ID you received when you applied for Brother Web Connect access.
   Press [OK].

6. Enter the temporary ID using the LCD, and then press [OK].
   - An error message will appear on the LCD if the information you entered does not match the temporary ID you received when you applied for access, or if the temporary ID has expired. Either enter the temporary ID correctly, or apply for access again and receive a new temporary ID.

7. The machine will prompt you to enter the account name that you want to be displayed on the LCD.
   Press [OK].

8. Enter the name using the LCD, and then press [OK].

9. Do one of the following:
   - To set a PIN for the account, press [Yes]. (A PIN prevents unauthorized access to the account.) Enter a four-digit number, and then press [OK].
   - If you do not want to set a PIN, press [No].
   - When the account information you entered appears, confirm that it is correct.

10. Press [Yes] to register your information as entered.

11. Press [OK].
    Account registration is complete and your machine can now access the service.

12. Press 🔜.

Scan and Upload Documents Using Brother Web Connect

Upload your scanned photos and documents directly to a web service without using a computer.

- When scanning and uploading JPEG files, black and white scanning is not available.
- When scanning and uploading Searchable PDF or Microsoft® Office files, black and white and gray scanning is not available.
- When scanning and uploading JPEG files, each page is uploaded as a separate file.
- Uploaded documents are saved in an album named From_BrotherDevice.

For information regarding restrictions, such as the size or number of documents that can be uploaded, refer to the respective service's website.

If you are a restricted Web Connect user due to the Secure Function Lock feature (available for certain models), you cannot upload the scanned data.

1. Load your document.
2. Press < or > to display [Web].
   Press [Web].

   - You can also press [Scan] > [to Web].
   - If information regarding the Internet connection appears on the machine's LCD, read the information and press [OK].
   - Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

3. Press ▲ or ▼ to display the service that hosts the account to which you want to upload.
   Press the service name.
4. Press ▲ or ▼ to display your account name, and then press it.
5. If the PIN entry screen appears, enter the four-digit PIN and press [OK].
6. Press ▲ or ▼ to display [Upload: Scanner].
   Press [Upload: Scanner].

   - If you pressed [Scan] > [to Web], this option does not appear.
   - This option may not appear depending on the service.

7. Follow the on-screen instructions to complete this operation.

Related Information

Documents saved on media (such as a memory card or a USB flash drive) connected to the machine can be uploaded directly to a web service.

- Uploaded documents are saved in an album named **From_BrotherDevice**.
- USB flash drive is available only for some models.

For information regarding restrictions, such as the size or number of documents that can be uploaded, refer to the respective service's website.

If you are a restricted Web Connect user due to the Secure Function Lock feature (available for certain models), you cannot upload documents saved on media.

**IMPORTANT**

**DO NOT** remove the memory card or USB flash drive while your Brother machine is accessing the media. Otherwise, the card, USB flash drive, or data stored on the card could be damaged.

---

(For Hong Kong, Taiwan and Korea)

Brother Web Connect supports only file names written in English. Files named in the local language will not be uploaded.

1. Insert a memory card or USB flash drive into your machine.
   - The LCD automatically changes.
2. Press **[Web]**.
   - If information regarding the Internet connection appears on the machine’s LCD, read the information and press **[OK]**.
   - Occasionally, updates or announcements about Brother Web Connect’s features will appear on the LCD. Read the information, and then press **[OK]**.
3. Press **[Upload: Media]**.
4. Follow the on-screen instructions to complete this operation.

**Related Information**

- **Brother Web Connect**
Documents that have been uploaded to your account can be downloaded directly to your machine and printed. Documents that other users have uploaded to their own accounts for sharing can also be downloaded to your machine and printed, as long as you have viewing privileges for those documents. Certain services allow guest users to view documents that are public. When accessing a service or an account as a guest user, you can view documents that the owner has made public, that is, documents with no viewing restrictions.

To download other users' documents, you must have access privileges to view the corresponding albums or documents.

If you are a restricted user for Web Connect due to the Secure Function Lock feature (available for certain models), you cannot download the data.

The Secure Function Lock Page Limit feature applies to the print job using Web Connect.

For Hong Kong, Taiwan and Korea

Brother Web Connect supports only file names written in English. Files named in the local language will not be downloaded.

6. If a different machine (or no printer) is selected, tap Printer.
   A list of available machines appears.
7. Tap your machine's name in the list.
8. Select the desired options, such as the number of pages to print and 2-sided printing (if supported by your machine).

Related Information

- Print Using AirPrint
Print Using AirPrint (macOS)

The procedure used to print may vary by application. Safari is used in the example below. Before printing, make sure your Brother machine is in the printer list on your Mac computer.

1. Make sure your Brother machine is turned on.
2. On your Mac computer, use Safari to open the page that you want to print.
3. Click the File menu, and then select Print.
4. Make sure your Brother machine is selected. If a different machine (or no printer) is selected, click the Printer pop-up menu, and then select your Brother machine.
5. Select the desired options, such as the number of pages to print and 2-sided printing (if supported by your machine).
6. Click Print.

Scan Using AirPrint (macOS)

Before scanning, make sure your Brother machine is in the scanner list on your Mac computer.

1. Load your document.
2. Select System Preferences from the Apple Menu.
3. Click Printers & Scanners.
4. Select your Brother machine from the scanner list.
5. Click the Scan tab, and then click the Open Scanner… button.
   The Scanner screen appears.
6. If you place the document in the ADF, select Use Document Feeder check box, and then select the size of your document from the scan size setting pop-up menu.
7. Select the destination folder or destination application from the destination setting pop-up menu.
8. Click Show Details to change the scanning settings if needed.
   You can crop the image manually by dragging the mouse pointer over the portion you want to scan when scanning from the scanner glass.
9. Click Scan.

Send a Fax Using AirPrint (macOS)

Make sure your Brother machine is in the printer list on your Mac computer. Apple TextEdit is used in the example below.

- AirPrint supports only black and white fax documents.
- Your machine supports the Secure Function Lock feature. Sending faxes via AirPrint is not available if Fax Tx for each user is restricted.

1. Make sure your Brother machine is turned on.
2. On your Mac computer, open the file that you want to send as a fax.
3. Click the File menu, and then select Print.
4. Click the Printer pop-up menu, and then select Brother MFC-XXXX - Fax (where XXXX is your model name).
5. Type the fax recipient information.
6. Click Fax.

Mobile Printing for Windows®

Mobile printing for Windows® is a function to print wirelessly from your Windows® mobile device. You can connect to the same network that your Brother machine is connected to and print without installing the printer driver on the device. Many Windows® apps support this function.

1. **Windows® mobile device (Windows® 10 Mobile or later)**
2. **Wi-Fi® connection**
3. **Your Brother machine**

**Related Information**

- Mobile/Web Connect
Mopria® Print Service

Mopria® Print Service is a print feature on Android™ mobile devices (Android™ version 4.4 or later) developed by the Mopria® Alliance. With this service, you can connect to the same network as your machine and print without additional setup. Many native Android™ apps support printing.

1. Android™ 4.4 or later
2. Wi-Fi® Connection
3. Your Brother machine

You must download the Mopria® Print Service from the Google Play™ Store and install it on your Android™ device. Before using this service, you must turn it on.

- Scan to an Office File Using ControlCenter4 Advanced Mode (Windows®)
- Scan Settings for ControlCenter4 Advanced Mode (Windows®)
- Change the Operation Mode in ControlCenter4 (Windows®)
If Secure Function Lock is set to On, you cannot use Remote Setup.

1. Click the (ControlCenter4) icon in the task tray, and then click Open.
2. Click the Device Settings tab.
3. Click the Remote Setup button.
4. Configure the settings as needed.

Export

Click to save the current configuration settings to a file.

Click Export to save your address book or all settings for your machine.
Import
Click to import a file and read its settings.

Print
Click to print the selected items on the machine. You cannot print the data until it is uploaded to the machine. Click Apply to upload the new data to the machine, and then click Print.

OK
Click to start uploading data to the machine, and then exit the Remote Setup Program. If an error message appears, confirm that your data is correct, and then click OK.

Cancel
Click to exit the Remote Setup Program without uploading data to the machine.

Apply
Click to upload data to the machine without exiting the Remote Setup Program.

5. Click OK.

- If your computer is protected by a firewall and is unable to use Remote Setup, you may need to configure the firewall settings to allow communication through port numbers 137 and 161.
- If you are using Windows® Firewall and you installed the Brother software and drivers from the Brother installation disc, the necessary firewall settings have already been set.

Troubleshooting

If you think there is a problem with your machine, first check each of the items below, then try to identify the problem, and follow our troubleshooting tips.

You can correct most problems yourself. If you need additional help, the Brother Solutions Center offers the latest FAQs & Troubleshooting tips.
Visit us at support.brother.com.
Click FAQs & Troubleshooting and search for your model name.

First, check the following:

• The machine's power cord is connected correctly and the machine's power is on.
• All of the machine's protective parts have been removed.
• The ink cartridges are installed correctly.
• The Scanner Cover and the Jam Clear Cover are fully closed.
• Paper is inserted correctly in the paper tray.
• The interface cables are securely connected to the machine and the computer, or the wireless connection is set up on both the machine and your computer.
• (For network models) The access point (for wireless), router, or hub is turned on and its link button is blinking.
• The machine's LCD is displaying messages.

If you did not solve the problem with the checks, identify the problem and then see Related Information.

# Error and Maintenance Messages

As with any sophisticated office product, errors may occur and supply items may have to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown in the table.

You can correct most errors and perform routine maintenance yourself. If you need more tips, go to your model’s FAQs & Troubleshooting page on the Brother Solutions Center at support.brother.com.

- If the touchscreen displays errors and your Android™ device supports the NFC feature, touch your device to the NFC symbol on the control panel to access the Brother Solutions Center and browse the latest FAQs from your device. (Your mobile telephone provider's message and data rates may apply.)
  
  Make sure the NFC settings of both your Brother machine and your Android™ device are set to On.

<td>Ink Absorber Pad Full</td>
<td>The ink absorber box is full. These components are periodic maintenance items that may require replacement after a period of time to ensure optimum performance from your Brother machine. Because these components are periodic maintenance items, the replacement is not covered under the warranty. The need to replace these items and the time period before replacement is dependent on the number of purges and flushes required to clean the ink system. These boxes acquire amounts of ink during the different purging and flushing operations. The number of times a machine purges and flushes for cleaning varies depending on different situations. For example, frequently powering the machine on and off will cause numerous cleaning cycles since the machine automatically cleans upon power up. The use of non-Brother ink may cause frequent cleanings because non-Brother ink could cause poor print quality which is resolved by cleaning. The more cleaning the machine requires, the faster these boxes will fill up. <strong>Repairs resulting from the use of non-Brother supplies may not be covered under the stated product warranty.</strong></td>
<td>The ink absorber box must be replaced. Call Brother Customer Service or a Brother Authorized Service Center to have your machine serviced.</td>

Transfer Faxes to Another Fax Machine

If you have not set up your Station ID, you cannot enter Fax Transfer mode.

1. Press ✗ to interrupt the error temporarily.

2. Press [Settings] > [All Settings] > [Service] > [Data Transfer] > [Fax Transfer].

3. Do one of the following:
   • If the touchscreen displays [No Data], there are no faxes left in the machine’s memory.
     Press [Close], and then press 🏡.
   • Enter the fax number where faxes will be forwarded.

4. Press [Fax Start].

Related Information

• Transfer Your Faxes or Fax Journal Report
• Set Your Station ID
Transfer Faxes to Your Computer

You can transfer the faxes from your machine's memory to your computer.

1. Press \[ \text{X} \] to interrupt the error temporarily.

2. Make sure you have installed the Brother software and drivers on your computer, and then turn on **PC-FAX Receive** on the computer. Do one of the following:
   - **Windows® 7**
     
     From the \( \text{(Start)} \) menu, select **All Programs > Brother > Brother Utilities**.
     
     Click the drop-down list and select your model name (if not already selected). Click **PC-FAX** in the left navigation bar, and then click **Receive**.
   
   - **Windows® 8 and Windows® 10**
     
     Click \( \text{(Brother Utilities)} \), and then click the drop-down list and select your model name (if not already selected). Click **PC-FAX** in the left navigation bar, and then click **Receive**.

3. Read and confirm the instructions on your computer.

   Faxes in the machine's memory will be sent to your computer automatically.

---

**When faxes in the machine's memory are not sent to your computer:**

- Make sure you have set [PC Fax Receive] on the machine.

  If faxes are in the machine's memory when you set up PC-Fax Receive, the touchscreen will ask if you want to transfer the faxes to your computer.

  If Fax Preview is set to Off, you will be asked if you want to print backup copies.

  Press [Yes] to transfer all faxes in the memory to your computer.

---

Document Jams

- Document is Jammed in the Top of the ADF Unit
- Document is Jammed inside the ADF Unit
- Remove Paper Scraps Jammed in the ADF
- Error and Maintenance Messages
Document is Jammed in the Top of the ADF Unit

1. Remove any paper that is not jammed from the ADF.
2. Open the ADF cover.
3. Remove the jammed document by pulling it upward.
4. Close the ADF cover.
5. Press \[<Button>\].

**IMPORTANT**

To avoid future document jams, close the ADF cover correctly by pressing it down in the center.

**Related Information**

- Document Jams
Document is Jammed inside the ADF Unit

1. Remove any paper that is not jammed from the ADF.
2. Lift the document cover.
3. Pull the jammed document out to the left.

4. Close the document cover.
5. Press 🗑.

Related Information

- Document Jams
Remove Paper Scraps Jammed in the ADF

1. Lift the document cover.
2. Insert a piece of stiff paper, such as cardstock, into the ADF to push any small paper scraps through.
3. Close the document cover.
4. Press \( \times \).

Related Information

- Document Jams
Printer Jam or Paper Jam

Locate and remove the jammed paper.

- Paper is Jammed Inside and in the Front of the Machine (Jam A Inside/Front)
- Paper is Jammed in the Front of the Machine (Jam B Front)
- Paper is Jammed in the Back of the Machine (Jam C Rear)
- Error and Maintenance Messages
- Paper Handling and Printing Problems
If the LCD displays [Jam A Inside/Front] or [Repeat Jam A Inside/Front], follow these steps:

1. Unplug the machine from the AC power outlet.
2. Pull the paper tray (1) completely out of the machine.

3. Pull the two green levers inside the machine to release the jammed paper.

4. Place both hands under the plastic tabs on both sides of the machine to lift the scanner cover (1) into the open position.

5. Slowly pull the jammed paper (1) out of the machine.
• DO NOT touch the encoder strip, a thin strip of plastic that stretches across the width of the machine (1). Doing this may cause damage to the machine.

• If the print head is in the right corner as shown in the illustration (2), you cannot move it. Follow these steps:
  a. Close the scanner cover, and then reconnect the power cord.
  b. Open the scanner cover again, and then hold down ❌ until the print head moves to the center.
  c. Unplug the machine from the power source and remove the jammed paper.

• If the paper is jammed under the print head, unplug the machine from the power source, and then move the print head to take out the paper.
  Hold the concave areas with the triangle marks as shown in the illustration (3) to move the print head.

• If ink gets on your skin or clothing, immediately wash it off with soap or detergent.
If your LCD error message was [Repeat Jam A Inside/ Front], move the print head (if needed) to take out any paper remaining in this area. Make sure scraps of paper are not left in the corners of the machine (1) and (2).

When finished, continue with the next step.

6. Gently close the scanner cover using both hands.

7. Slowly pull the jammed paper (1) out of the machine.
If your LCD error message was [Repeat Jam A Inside/Front], do the following:

a. Make sure you look carefully inside (1) for any scraps of paper.

b. Squeeze both levers (1), and then open the Jam Clear Cover at the back of the machine.

c. Slowly pull the jammed paper out of the machine.

d. Close the Jam Clear Cover. Make sure the cover is closed completely.

When finished, continue with the next step.

8. Put the paper tray firmly back in the machine.
9. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

10. Reconnect the power cord.

Related Information

- Printer Jam or Paper Jam
- Error and Maintenance Messages
If the LCD displays [Jam B Front] or [Repeat Jam B Front], follow these steps:

1. Unplug the machine from the AC power outlet.
2. Pull the paper tray (1) completely out of the machine.

3. Pull the two green levers inside the machine to release the jammed paper.

4. Slowly pull out the jammed paper (1).
If your LCD error message was [Repeat Jam B Front], do the following:

a. Make sure you look carefully inside (1) for any scraps of paper.

b. Squeeze both levers (1), and then open the Jam Clear Cover at the back of the machine.

c. Slowly pull the jammed paper out of the machine.

d. Close the Jam Clear Cover. Make sure the cover is closed completely.

When finished, continue with the next step.

5. Put the paper tray firmly back in the machine.
6. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

7. Reconnect the power cord.

**Related Information**

- Printer Jam or Paper Jam
- Error and Maintenance Messages
If the LCD displays [Jam C Rear], follow these steps:

1. Unplug the machine from the AC power outlet.
2. Pull the paper tray (1) completely out of the machine.

3. Pull the two green levers inside the machine to release the jammed paper.

Depending on the paper size, it is easier to remove the jammed paper from the front of the machine rather than from the back of the machine.

4. Squeeze both levers (1), and then open the Jam Clear Cover at the back of the machine.

5. Slowly pull the jammed paper out of the machine.

6. Close the Jam Clear Cover. Make sure the cover is closed completely.
7. Put the paper tray firmly back in the machine.

8. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

9. Reconnect the power cord.
Additional paper jam clear operations

If the LCD error message continues to appear and you repeatedly experience paper jams, do the following:

1. Unplug the machine from the AC power outlet and open the manual feed slot cover.
2. Load one sheet of thick A4 or Letter sized paper, such as glossy paper, in the manual feed slot. Insert the paper deep into the manual feed slot.

3. Re-connect the power cord.

    The paper you placed in the manual feed slot will be fed through the machine and ejected. If the thick paper is pushing any jammed paper out, remove the jammed paper.

<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>No printout</td>
<td>Check that the correct printer driver has been installed and selected. Check to see if the machine's display is showing an error message. See Related Information: Error and Maintenance Messages.</td>
</tr>
</tbody>
</table>

Check that the machine is online:

- Windows Server® 2008
  Click (Start) > Control Panel > Hardware and Sound > Printers. Right-click Brother MFC-XXXX Printer (where XXXX is your model name). Make sure Use Printer Online is not listed. If it is listed, click this option to set the driver Online.

- Windows® 7 and Windows Server® 2008 R2
  Click (Start) > Devices and Printers. Right-click Brother MFC-XXXX Printer (where XXXX is your model name) and click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar. Make sure Use Printer Offline is not selected.

- Windows® 8
  Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware and Sound group, click View devices and printers. Right-click the Brother MFC-XXXX Printer (where XXXX is your model name). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected.

- Windows® 10 and Windows Server® 2016
  Click Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers. Right-click the Brother MFC-XXXX Printer (where XXXX is your model name). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected.

- Windows Server® 2012
  Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware group, click View devices and printers. Right-click the Brother MFC-XXXX Printer (where XXXX is your model name). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected.

- Windows Server® 2012 R2
  Click Control Panel on the Start screen. In the Hardware group, click View devices and printers. Right-click the Brother MFC-XXXX Printer (where XXXX is your model name). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected.

One or more ink cartridges have reached the end of their life. See Related Information: Replace the Ink Cartridges.

If old, unprinted data remains in the printer driver spooler, it will prevent new print jobs from printing. Open the printer icon and delete all data as follows:

- Windows Server® 2008

### Difficulties | Suggestions
--- | ---
Smudge or stain at the top center of the printed page. | Make sure the paper is not too thick or curled. See Related Information: Acceptable Paper and Other Print Media.
Printing appears dirty or ink seems to run. | Make sure you are using the recommended types of paper. Do not handle the paper until the ink is dry. See Related Information: Acceptable Paper and Other Print Media. Make sure the printing surface is face down in the paper tray. Make sure you are using Genuine Brother Ink. If you are using photo paper, make sure the glossy side of the photo paper is face down in the tray and you have set the correct paper type. If you are printing a photo from your computer, set the Media Type in the printer driver.
Ink is smudged or wet when using glossy photo paper. | Be sure to check the front and back of the paper. Place the glossy surface (printing surface) face down. See Related Information: Change the Paper Size and Paper Type. If you use glossy photo paper, make sure the paper type setting is correct.
Stains appear on the reverse side or at the bottom of the page. | Make sure the printer platen is not dirty with ink. Make sure you are using Genuine Brother Ink. Make sure you are using the paper support flap. Make sure the paper feed rollers are not dirty with ink. See Related Information: Clean the Paper Feed Rollers.
The printouts are wrinkled. | • Windows®
  In the printer driver, select the Advanced tab, click Other Print Options, and then click Advanced Color Settings. Clear the Bi-Directional Printing check box.
  • Mac
  In the printer driver, select Print Settings, click Advanced, select Other Print Options, and clear the Bi-Directional Printing check box. Make sure you are using Genuine Brother Ink.
Smudge or stain on the reverse side of the page when using the automatic 2-sided printing feature. | Change the Reduce Smudge option in your printer driver properties or preferences. See Related Information: Prevent Smudged Printouts and Paper Jams (Windows®) or Prevent Smudged Printouts and Paper Jams (Mac).

### Paper Handling Difficulties

| Difficulties | Suggestions |
--- | ---|
The machine does not feed paper. | Make sure the paper tray is pushed in all the way until it locks into place. Make sure the Jam Clear Cover at the back of the machine is closed. If the machine's LCD displays a Paper Jam message and you still have a problem, see Related Information: Error and Maintenance Messages. If the paper tray is empty, load a new stack of paper into the paper tray. If there is paper in the paper tray, make sure it is straight. If the paper is curled, straighten it. Sometimes it is helpful to remove the paper, turn the stack over and put it back in the paper tray. Reduce the amount of paper in the paper tray, and then try again. Clean the paper pick-up rollers. See Related Information: Clean the Paper Pick-up Rollers. |

### Telephone and Fax Problems

#### Telephone Line or Connections

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
</table>
| Dialing does not work. (No dial tone)| **Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you subscribe to DSL, VoIP or magicJack services, call your service provider for connection instructions.**  
  If you are using a VoIP system, try changing the VoIP setting to **Basic (for VoIP).** This will lower modem speed and turn off Error Correction Mode (ECM).  
  **See Related Information: Telephone Line Interference/VoIP.**  
  (Available only for some countries.)  
  Change the Tone/Pulse setting.  
  **See Related Information: Set Tone or Pulse Dialing Mode.**  
  Send a manual fax by pressing the Hook button, and dialing the number. Wait to hear fax-receiving tones before pressing the Start button.  
  If there is no dial tone, connect a known working telephone and telephone line cord to the jack. Then lift the external telephone’s handset and listen for a dial tone. If there is still no dial tone, ask your telephone company to check the line and/or wall jack. |
| The machine does not answer when called. | **Make sure the machine is in the correct receive mode for your setup.**  
  **See Related Information: Choose the Correct Receive Mode.**  
  Check for a dial tone. If possible, call your machine to hear it answer. If there is still no answer, check that the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If there is no ringing when you call your machine, ask your telephone company to check the line. |

#### Handling Incoming Calls

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
</table>
| The machine ‘Hears’ a voice as a CNG Tone. | **If Easy Receive is set to On, your machine is more sensitive to sounds. It may mistakenly interpret certain voices or music on the line as a fax machine calling and respond with fax receiving tones. Deactivate the machine by pressing . Try avoiding this problem by turning Easy Receive to Off.**  
  **See Related Information: Set Easy Receive.**  
  Sending a Fax Call to the machine. | If you answered on an extension telephone, press your Fax Receive Code (the factory setting is *51). If you answered on the external telephone (connected to the EXT. jack), press the Start button to receive the fax.  
  When your machine answers, hang up.  
  Custom features on a single line. | If you have Call Waiting, Call Waiting/Caller ID, Caller ID, Voice Mail, an answering machine, an alarm system or other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes.  
  **For Example:** If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the faxes. Brother’s ECM (Error Correction Mode) feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding... |
### Difficulties | Suggestions
--- | ---
a slight interruption is crucial to your business, we recommend using a separate telephone line with no custom features.

### Receiving Faxes

#### Difficulties | Suggestions
--- | ---
Cannot receive a fax. | Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you hear static or interference on your fax line, contact your local telephone provider. Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. If you subscribe to DSL, VoIP, or magicJack services, call your service provider for connection instructions. If you are using a VoIP system, try changing the VoIP setting to Basic (for VoIP). This will lower modem speed and turn off Error Correction Mode (ECM). See Related Information: Telephone Line Interference/VoIP.

Make sure the machine is in the correct Receive Mode. This is determined by the external devices and telephone subscriber services you have on the same line as the Brother machine. See Related Information: Choose the Correct Receive Mode.
| • If you have a dedicated fax line and want your Brother machine to automatically answer all incoming faxes, you should select Fax only mode. | • If your Brother machine shares a line with an external answering machine, you should select the External TAD mode. In External TAD mode, your Brother machine will receive incoming faxes automatically and voice callers will be able to leave a message on your answering machine. | • If your Brother machine shares the line with a Voice Mail subscriber service, see Related Information: Voice Mail. |
| • If your Brother machine is on a line with the Distinctive Ring subscriber service, see Related Information: Distinctive Ring. | • If your Brother machine shares a line with other telephones and you want it to automatically answer all incoming faxes, you should select the Fax/Tel mode. In Fax/Tel mode, your Brother machine will receive faxes automatically and produce a pseudo/double-ring to alert you to answer voice calls. | • If you do not want your Brother machine to answer any incoming faxes automatically, you should select the Manual mode. In Manual mode, you must answer every incoming call and activate the machine to receive faxes. |

Another device or service at your location may be answering the call before your Brother machine answers. To test this, lower the Ring Delay setting: | • If the Receive Mode is set to Fax Only or Fax/Tel, reduce the Ring Delay to one ring. | • If the Receive Mode is set to External TAD, reduce the number of rings programmed on your answering machine to two. |
| • If you do not want your Brother machine to answer any incoming faxes automatically, you should select the Manual mode. In Manual mode, you must answer every incoming call and activate the machine to receive faxes. | See Related Information: Set the Number of Rings Before the Machine Answers (Ring Delay). | • If the Receive Mode is set to Manual, DO NOT adjust the Ring Delay setting. |
| **Another device or service at your location may be answering the call before your Brother machine answers. To test this, lower the Ring Delay setting:** | **Have someone send you a test fax:** |
| • If the Receive Mode is set to Fax Only or Fax/Tel, reduce the Ring Delay to one ring. | • If you received the test fax successfully, your machine is operating correctly. Remember to reset your Ring Delay or answering machine setting back to your original setting. If receiving problems recur after resetting the Ring Delay, then a person, device, or subscriber service is answering the fax call before the machine has a chance to answer. |
| See Related Information: Set the Number of Rings Before the MachineAnswers (Ring Delay). | • If you were not able to receive the fax, then another device or subscriber service may be interfering with your fax reception or there may be a problem with your fax line. |

Set Dial Tone Detection

Setting the Dial Tone to [Detection] will shorten the Dial Tone detect pause.

1. Press [Settings] > [All Settings] > [Initial Setup] > [Dial Tone].
2. Press [Detection] or [No Detection].
3. Press 🏠.

Related Information

- Telephone and Fax Problems
Telephone Line Interference/VoIP

If you are having problems sending or receiving a fax due to possible interference on the telephone line or if you are using a VoIP system, we recommend changing the modem speed to minimize errors in fax operations.

1. Press [Settings] > [All Settings] > [Initial Setup] > [Compatibility].

2. Press the option you want.
   - [Basic(for VoIP)] reduces the modem speed to 9,600 bps and turns off color fax receiving and Error Correction Mode (ECM), except for color fax-sending. Unless interference is a recurring problem on your telephone line, you may prefer to use it only when needed.
     To improve compatibility with most VoIP services, Brother recommends changing the compatibility setting to [Basic(for VoIP)].
   - [Normal] sets the modem speed at 14,400 bps.

3. Press .

VoIP (Voice over IP) is a type of phone system that uses an Internet connection, rather than a traditional phone line.

Network Problems

• Use the Network Connection Repair Tool (Windows®)
• Where Can I Find My Brother Machine’s Network Settings?
• I Cannot Complete the Wireless Network Setup Configuration
• My Brother Machine Cannot Print, Scan, or PC-FAX Receive over the Network
• I Want to Check that My Network Devices are Working Correctly
• Troubleshooting
Use the Network Connection Repair Tool (Windows®)

Use the Network Connection Repair Tool to fix the Brother machine's network settings. It will assign the correct IP address and Subnet Mask.

- Windows® 7/Windows® 8/Windows® 10
  You must log on with Administrator rights.
- Make sure the Brother machine is turned on and is connected to the same network as your computer.

1. Do one of the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows® 7</td>
<td>Click (Start) &gt; All Programs &gt; Brother &gt; Brother Utilities. Click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
<tr>
<td>Windows® 8/Windows® 10</td>
<td>Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
</tbody>
</table>

If the User Account Control screen appears, click Yes.

2. Follow the on-screen instructions.

3. Check the diagnosis by printing the Network Configuration Report.

The Network Connection Repair Tool will start automatically if you select the Enable Connection Repair Tool option in the Status Monitor. Right-click the Status Monitor screen, and then click Other Settings > Enable Connection Repair Tool. This is not recommended when your network administrator has set the IP address to Static, since it will automatically change the IP address.

If the correct IP address and the Subnet Mask are still not assigned even after using the Network Connection Repair Tool, ask your network administrator for this information.

Check Network Devices Using the Ping Command

Check the IP addresses of both your computer and your Brother machine, and then confirm whether the network is operating correctly.

>> Configure the IP Address on your computer (Windows®)
>> Configure the IP Address on your computer (Mac)
>> Configure the IP Address on your Brother machine

Configure the IP Address on your computer (Windows®)

1. Do one of the following:
   - Windows® 7
     Click \( (\text{Start}) > \text{All Programs} > \text{Accessories} > \text{Command Prompt} \)
   - Windows® 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Search > Command Prompt.
   - Windows® 10
     Click \( \text{Windows} > \text{Windows System} > \text{Command Prompt} \).

2. Type "ipconfig" and then press the Enter key on your keyboard.
3. Confirm the values for the IPv4 address and subnet mask.
4. Type "exit" and then press the Enter key on your keyboard.

Configure the IP Address on your computer (Mac)

1. Select System Preferences from the Apple Menu.
2. Click Network > Advanced > TCP/IP
3. Confirm the values for the IPv4 address and subnet mask.

Configure the IP Address on your Brother machine

Print the Network Configuration Report, and confirm the values for the IP address and subnet mask.

<table>
<thead>
<tr>
<th>IP Settings</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP Address</td>
<td>192.168.100.0</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
</tr>
</tbody>
</table>

Check the IP addresses for both your computer and your Brother machine. Confirm that the network address portions are the same. For example, if the subnet mask is "255.255.255.0", it is normal for only the host address portions to be different.

<table>

Reset Functions Overview

The following reset functions are available:

1. [Machine Reset]
   You can reset all the machine's settings that you have changed.
   The Address Book, Fax Reports, and Call History will remain.

2. [Network]
   Reset the print server back to its default factory settings (includes Password and IP Address information).

3. [Address Book & Fax]
   Address Book & Fax resets the following settings:
   • Address Book and Setup Groups
   • Programmed fax jobs in the memory
     Delayed Fax and Delayed Batch Transmission
   • Station ID
     Name and Number
   • Remote Fax Options
   • Report
     Transmission Verification Report, Address Book and Fax Journal
   • History
     Caller ID history and Outgoing Call
   • Faxes in memory

4. [All Settings]
   Use the Settings Reset function to reset all machine's settings to the settings originally set at the factory.
   Brother strongly recommends you perform this operation when you dispose of the machine.

Unplug the interface cable before you select [Network] or [All Settings].

Routine Maintenance

• Replace the Ink Cartridges
• Clean Your Brother Machine
• Check Your Brother Machine
• Correct the Paper Feed to Clear Vertical Lines
• Change the Print Setting Options When Having Printing Problems
• Pack and Ship Your Brother Machine
Your Brother machine is equipped with an ink dot counter. The ink dot counter automatically monitors the level of ink in each of the four cartridges. When the machine detects an ink cartridge is running out of ink, the machine will display a message.

The LCD displays which ink cartridge needs replacing. Be sure to follow the LCD prompts to replace the ink cartridges in the correct order.

Even though the machine tells you to replace an ink cartridge, there will be a small amount of ink left in the ink cartridge.

**CAUTION**

If the ink gets into your eye, rinse it with water immediately. If left as is, it may cause redness or mild inflammation of the eye. In case of any abnormality, consult with your doctor.

**IMPORTANT**

Brother strongly recommends that you do not refill the ink cartridges provided with your machine. We also strongly recommend that you continue to use only Genuine Brother Brand replacement ink cartridges. Use or attempted use of potentially incompatible ink and/or cartridges in the Brother machine may cause damage to the machine and/or may result in unsatisfactory print quality. Our warranty coverage does not apply to any problem that is caused by the use of unauthorized third-party ink and/or cartridges. To protect your investment and obtain premium performance from the Brother machine, we strongly recommend the use of Genuine Brother Supplies.

1. **Open the ink cartridge cover (1).**

   If one or more of the ink cartridges needs replacing, the LCD displays **[B&W Print Only]** or **[Replace Ink].**

   ![Image](image1)

   If the black ink cartridge is empty, the only message that will appear is **[Replace Ink].** You must replace the black ink cartridge.

2. **Press the lock release lever to release the cartridge color indicated on the LCD and remove the cartridge from the machine, as shown in the illustration.**

   ![Image](image2)
3. Open the new ink cartridge bag for the color indicated on the LCD, and take out the ink cartridge.

**IMPORTANT**

- DO NOT touch the ink cartridge in the area indicated (1); this can prevent the machine from detecting the cartridge.

![Image of ink cartridge area](image)

- Quickly shake just the **black** ink cartridge horizontally 15 times as shown, before inserting it into the machine.

![Image of shaking black ink cartridge](image)

4. Insert the ink cartridge in the direction of the arrow on the label. Each color has its own correct position.

![Image of correct direction](image)

5. Gently push the area marked “PUSH” until the ink cartridge locks into place, and then close the ink cartridge cover.

![Image of pushing and closing cartridge](image)
The machine automatically resets the ink dot counter.

If the LCD displays [No Ink Cartridge] or [Cannot Detect] after you install the ink cartridge, check that the ink cartridge is installed correctly. Remove the ink cartridge and reinstall it slowly until it locks into place.

**IMPORTANT**

- DO NOT shake the ink cartridges. If ink stains your skin or clothing, wash with soap or detergent at once.
- DO NOT take out ink cartridges if you do not need to replace them; the machine will not know the quantity of ink left in the cartridge.
- DO NOT touch the cartridge insertion slots; the ink may stain your skin.
- If you mix the colors by installing an ink cartridge in the wrong position, the LCD shows [Wrong Ink Color]. Check which ink cartridges are not matched by color to their ink cartridge positions and move them to their proper positions.
- Use unopened ink cartridges by the expiration date written on the cartridge package.
- DO NOT dismantle or tamper with the ink cartridge; this can cause the ink to leak out of the cartridge.

Clean the Scanner

1. Unplug the machine from the AC power outlet.
2. Lift the document cover (1). Clean the scanner glass (2) and the white plastic (3) with a soft lint-free cloth moistened with water.

3. In the ADF unit, clean the white bar (1) and the glass strip (2) with a lint-free cloth moistened with water.

In addition to cleaning the scanner glass and glass strip with a soft lint-free cloth moistened with water, run your fingertip over the glass to see if you can feel anything on it. If you feel dirt or debris, clean the glass again concentrating on that area. You may need to repeat the cleaning process three or four times. To test, make a copy after each cleaning attempt.

When there is a spot of dirt or correction fluid on the glass strip, the printed sample shows a vertical line.

After the glass strip is cleaned, the vertical line is gone.

Clean the Print Head from Your Brother Machine

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

- Clean the print head if there is a horizontal line or a blank space in the text or graphics on printed pages. Depending on the problem color, select to clean Black only, three colors at a time (Yellow/Cyan/Magenta), or all four colors at once.
- Cleaning the print head consumes ink.
- Cleaning too often uses ink unnecessarily.

**IMPORTANT**

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

1. Press [Settings] > [Maintenance] > [Print Head Cleaning].
2. Press [Black only], [Color only], or [All].
3. Press [Normal], [Strong], or [Strongest].
4. Press [Start].

The machine cleans the print head.

- If you clean the print head and the print has not improved, try installing a new Genuine Brother Brand replacement ink cartridge for each problem color. Try cleaning the print head again. If the print has not improved, contact Brother Customer Service.
- You can also clean the print head from your computer.

Clean the Print Head from Your Computer (Windows®)

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

1. Do one of the following:
   - For Windows Server® 2008
     Click (Start) > Control Panel > Hardware and Sound > Printers.
   - For Windows® 7 and Windows Server® 2008 R2
     Click (Start) > Devices and Printers.
   - For Windows® 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware and Sound group, click View devices and printers.
   - For Windows Server® 2012
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware group, click View devices and printers.
   - For Windows Server® 2012 R2
     Click Control Panel on the Start screen. In the Hardware group, click View devices and printers.
   - For Windows® 10 and Windows Server® 2016
     Click > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers.

2. Right-click the Brother MFC-XXXX Printer icon (where XXXX is your model name), and then select Printing preferences. If printer driver options appear, select your printer driver. The printer driver dialog box appears.

3. Click the Maintenance tab.

4. Select one of the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Check Print Quality...</td>
<td>Use to print the test page and check the print quality.</td>
</tr>
<tr>
<td>Print Head Cleaning...</td>
<td>Use to start the cleaning process manually. Select if a line or blank spaces appear in text or graphics on the test page.</td>
</tr>
</tbody>
</table>

5. Do one of the following:
   - If you selected the Check Print Quality... option, click Start.
     The machine prints the test page.
   - If you selected the Print Head Cleaning... option, select the Black only, Color only, or All option for the cleaning type, and then click Next.

6. Select the Normal, Strong, or Strongest option for the cleaning strength, and then click Next.

7. Click Start.
   The machine starts cleaning.

Clean the Machine's LCD

IMPORTANT

DO NOT use liquid cleaners (including ethanol).

1. Press and hold down the power button \(\text{\ding{51}}\) to turn off the machine. The LCD displays \([\text{Shutting Down}]\) for a few seconds before the power goes off.

2. Clean the LCD with a dry, soft lint-free cloth.

Related Information

- Clean Your Brother Machine
Clean the Outside of the Machine

**IMPORTANT**

- Cleaning with volatile liquids such as thinner or benzine will damage the outside surface of the machine.
- DO NOT use cleaning materials that contain ammonia.
- DO NOT use isopropyl alcohol to remove dirt from the control panel. It may crack the panel.

1. If the paper support flap is open, close it, and then close the paper support.
2. Pull the paper tray (1) completely out of the machine.

3. Wipe the outside of the machine with a dry, lint-free cloth to remove dust.

4. Lift the output paper tray cover and remove anything that is stuck inside the paper tray.

5. Wipe the inside and the outside of the paper tray with a dry, lint-free cloth to remove dust.

6. Close the output paper tray cover and slowly push the paper tray completely into the machine.

**Related Information**

- Clean Your Brother Machine
Clean the Machine's Printer Platen

**WARNING**

Be sure to unplug the machine from the AC power outlet before cleaning the printer platen to avoid an electrical shock.

1. Using both hands, use the finger holds on each side of the machine to lift the scanner cover into the open position.
2. Clean the machine's printer platen (1) and the area around it, wiping off scattered ink with a dry, soft lint-free cloth.

**IMPORTANT**

DO NOT touch the encoder strip, the thin strip of plastic that stretches across the width of the machine (2). Doing this may cause damage to the machine.

3. Gently close the scanner cover using both hands.

4. Reconnect the power cord.

**Related Information**

- Clean Your Brother Machine
- Paper Handling and Printing Problems
Clean the Paper Feed Rollers

If the paper feed rollers are stained with ink or have a buildup of paper dust, it may cause paper feed problems.

1. Unplug the machine from the AC power outlet.
2. If the paper support flap is open, close it, and then close the paper support.
3. Pull the paper tray (1) completely out of the machine.

4. Clean the front side of the Paper Feed Rollers (1) with a soft lint-free cloth moistened with water, using a side-to-side motion. After cleaning, wipe the rollers with a dry, soft lint-free cloth to remove all moisture.

5. Lift the Jam Clear Flap (2), and then clean the back side of the Paper Feed Rollers (1) with a soft lint-free cloth moistened with water. After cleaning, wipe the rollers with a dry, soft lint-free cloth to remove all moisture.

6. Slowly push the paper tray completely into the machine.
7. Reconnect the power cord.

Do not use the machine again until the rollers are dry. Using the machine before the rollers are dry may cause paper feed problems.
Related Information

- Clean Your Brother Machine

Clean the Base Pad

Cleaning the Base Pad periodically may prevent the machine from feeding multiple sheets of paper when there are only a few sheets of paper left in the tray.

1. If the paper support flap is open, close it, and then close the paper support.
2. Pull the paper tray (1) completely out of the machine.

3. Clean the Base Pad (1) with a soft lint-free cloth moistened with water.
   After cleaning, wipe the pad with a dry, soft lint-free cloth to remove all moisture.

4. Slowly push the paper tray completely into the machine.

In Canada, the photo bypass tray is called the photo paper tray.

Related Information

- Clean Your Brother Machine
- Paper Handling and Printing Problems
Clean the Paper Pick-up Rollers

Cleaning the paper pick-up rollers periodically may prevent paper jams by ensuring that paper feeds correctly.

1. Unplug the machine from the AC power outlet.
2. If the paper support flap (1) is open, close it, and then close the paper support (2).

3. Pull the paper tray completely out of the machine.
4. Clean the Paper Pick-up Rollers (1) with a soft lint-free cloth moistened with water. Slowly turn the rollers so that the whole surface is cleaned. After cleaning, wipe the rollers with a dry, soft lint-free cloth to remove all moisture.

5. Slowly push the paper tray completely into the machine.
6. Reconnect the power cord.

Check the Print Quality

If faded or streaked colors and text appear or if text is missing on your printouts, the print head nozzles may be clogged. Print the Print Quality Check Sheet and look at the nozzle check pattern.

1. Press [Settings] > [Maintenance] > [Improve Print Quality] > [Check Print Quality].
2. Press [Start].
   The machine prints the Print Quality Check Sheet.
3. Check the quality of the four color blocks on the sheet.
4. The touchscreen asks about the print quality. Do one of the following:
   • If all lines are clear and visible, press [No], and then press [Home] to finish the Print Quality check.
   • If lines are missing (see Poor, as follows), press [Yes].

![Print Quality Check Sheet]

5. The touchscreen asks you to check the print quality of each color. Press the number of the pattern (1–4) that most closely matches the printing result.
6. Do one of the following:
   • If print head cleaning is needed, press [Start] to start the cleaning procedure.
   • If print head cleaning is not needed, the Maintenance screen reappears on the touchscreen. Press [Home].
7. After the cleaning procedure is finished, the touchscreen asks if you want to print the Print Quality Check Sheet again. Press [Yes], and then press [Start].
   The machine prints the Print Quality Check Sheet again. Check the quality of the four color blocks on the sheet again.

If you clean the print head and the print has not improved, try installing a new Genuine Brother Brand replacement ink cartridge for each problem color. Try cleaning the print head again. If the print has not improved, contact Brother Customer Service.

**IMPORTANT**

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.
When a print head nozzle is clogged, the printed sample looks like this.

After the print head nozzle is cleaned, the lines are gone.

Check the Print Alignment from Your Brother Machine

If your printed text becomes blurred or images become faded after transporting the machine, adjust the print alignment.

Before adjusting the print alignment, make a print quality check first by pressing [Settings] > [Maintenance] > [Improve Print Quality] > [Check Print Quality].

1. Press [Settings] > [Maintenance] > [Improve Print Quality] > [Alignment].
2. Press [Next].
3. Press [Yes] after a confirmation message if a print quality check has been completed appears on the LCD.
   - If you select the [Auto] mode, the print alignment is automatically adjusted by scanning the Alignment Check Sheet.
   - If you select the [Manual] mode, you need to input information printed on the Alignment Check Sheet manually.
5. If you selected the [Auto] mode, select the paper size to print the Alignment Check Sheet on.
6. Load specified size paper in the tray, and then press [Start].
   The machine prints the Alignment Check Sheet.
7. Follow the instructions on the LCD.

When the print alignment is not adjusted correctly, text looks blurry or crooked, like this.

<table>
<thead>
<tr>
<th>A</th>
<th>B</th>
<th>C</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>B</td>
<td>C</td>
</tr>
</tbody>
</table>

After the print alignment is adjusted correctly, text looks like this.

<table>
<thead>
<tr>
<th>A</th>
<th>B</th>
<th>C</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>B</td>
<td>C</td>
</tr>
</tbody>
</table>

Check the Ink Volume (Page Gauge)

Although an ink volume icon appears on the machine’s LCD, you can view a larger graph that displays the ink left in each cartridge.

1. Press \[Settings\] > [Maintenance] > [Ink Volume].

   The touchscreen displays the ink volume and the page gauge 1.

   a. Displays the cartridge ink level.
   b. Displays the ink level remaining in the internal ink reservoir.
   c. Press to change the display settings for the approximate page yield.
   d. The page gauge 1 shows the approximate number of remaining pages that can be printed with the cartridges.

   • When the ink cartridge is near the end of its life or having a problem, one of the following icons appears:

   ![Alert Icon]  
   The ink level is low.
   ![Error Icon]  
   The ink cartridge needs to be replaced.
   ![Question Icon]  
   There is a problem with the ink cartridge.

   • To check or print the ink cartridge model numbers, press (Back) to return to the [Maintenance] menu screen. Press [Ink Cartridge Model], and follow the instructions on the touchscreen.

2. Press .

   • You can also check the ink volume from your computer.

Pack and Ship Your Brother Machine

- When you transport the machine, use the packing materials that came with your machine. Do not tip or turn the product upside down. If you do not pack the machine correctly, any damage that may occur in transit may not be covered by your warranty.
- The machine should be adequately insured with the carrier.

IMPORTANT

It is important to allow the machine to “park” the print head after a print job. Listen carefully to the machine before unplugging it to make sure that all mechanical noises have stopped. Not allowing the machine to finish this parking process may lead to print problems and possible damage to the print head.

1. Unplug the machine from the AC power outlet.
2. Unplug the machine from the telephone wall jack and take the telephone line cord out of the machine.
3. Using both hands, use the finger holds on each side of the machine to lift the scanner cover into the open position.
4. Unplug the interface cable from the machine, if it is connected.
5. Gently close the scanner cover using the finger holds on each side.
6. Open the ink cartridge cover.
7. Press the ink release levers to release the ink cartridges and then take out the ink cartridges.
8. Wrap the machine in the bag.
9. Pack the machine in the original carton with the original packing material as shown below. Do not pack the used ink cartridge in the carton.

If you are returning your machine to Brother as part of the Exchange Service, pack only the machine. Keep all separate parts and printed materials to use with your “Exchange” machine.

10. Close the carton and tape it shut.

5. Press [Copy].
6. Press [Options].
7. Press or to display the available settings, and then press the setting you want to change.
8. Press or to display the available options for the setting, and then press the option you want. Repeat the previous and this steps until you have selected all the settings for this Shortcut. When finished, press [OK].
9. Press [Save as Shortcut].
10. Read and confirm the displayed list of settings you have selected, and then press [OK].
11. Enter a name for the Shortcut using the LCD, and then press [OK].

When adding Fax or Scan to Shortcuts, you will be asked if you want to make this a One Touch Shortcut. Follow the LCD instructions.

Related Information

- Save Your Favorite Settings as a Shortcut
Change or Delete Shortcuts

You can change the settings in a Shortcut.

You cannot change a Web Connect Shortcut or Apps Shortcut. If you need to change them, delete them, and then add a new Shortcut.

1. Press [Shortcuts].
2. Press ‹ or › to display the Shortcut you want to change.
3. Press and hold the Shortcut you want to change.
4. Press [Edit].
   
   To delete the Shortcut, press [Delete]. To edit the name of the Shortcut, press [Rename] and follow the LCD menus.
5. Change the settings for the Shortcut you selected.
6. Press [Save as Shortcut] when you have finished changing the settings.
7. Press [OK] to confirm.

When changing Fax or Scan Shortcuts, you will be asked if you want to make this a One Touch Shortcut. Follow the LCD instructions.

Assign a Shortcut to an IC Card

- Assign a Shortcut to an IC Card with IC Card Reader
Assign a Shortcut to an IC Card with IC Card Reader

Related Models: MFC-J995DW/MFC-J995DW_XL

You can assign one machine Shortcut to your IC card. When you touch your IC card to the IC card reader connected to your machine, your personal Shortcut will automatically appear on the touchscreen.

- You cannot use the same IC card for different Shortcuts.
- To use the IC card for another Shortcut, unregister the card first, and then register it with the new Shortcut.

Before assign a shortcut to an IC card, register an external IC card reader. Use Web Based Management to register the card reader. Your machine supports HID class driver supported external IC card reader.

1. Start your web browser.
   Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the IP address of the machine or the print server name). For example: https://192.168.1.2
   If the machine prompts you for a password, type it, and then click .
2. Click the Administrator tab.
3. Click the External Card Reader menu, and then enter the necessary information.
4. Click Submit.
5. Restart your Brother machine to activate the configuration.
6. Unplug the power code from the AC power outlet.
7. Connect the card reader to your machine, and then plug the machine's power cord into the AC power outlet.
8. Press [Shortcuts] on the LCD.
9. Press ◀ or ▶ to select the Shortcut screens that contains the Shortcut you want to assign to your IC card.
10. Press and hold the Shortcut until the options appear.
11. Press [Register Card/NFC].
12. Touch the IC card to the IC card reader connected to your machine.
13. Press [Register].
   The Shortcut is assigned to the IC Card.

Reports

The following reports are available:

Transmission Verification Report
The Transmission Verification Report prints the details of the last fax sent from your machine.

Address Book
The Address Book report prints a list of names and numbers stored in the Address Book memory.

Fax Journal
The Fax Journal prints a list of information about your last 200 incoming and outgoing faxes. (TX means Transmit, RX means Receive.)

*(Windows®)*
You can view and print the Fax Journal report from your computer using the Fax Journal Report software. Go to your model's Downloads page on the Brother Solutions Center at support.brother.com to download the software.

User Settings
The User Settings report prints a list of your current settings.

Network Configuration (network models)
The Network Configuration report prints a list of your current network settings.

WLAN Report (wireless models)
The WLAN Report prints the wireless LAN connectivity diagnosis.

Caller ID history
The Caller ID history report prints a list of the available Caller ID information for the last 30 received faxes and telephone calls.

Change Machine Settings Using Web Based Management

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- What is Web Based Management?
- Access Web Based Management
- Set or Change a Login Password for Web Based Management
- Set Up Your Machine's Address Book Using Web Based Management
What is Web Based Management?

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS). Type your machine's IP address into your web browser to access and change your print server settings.

- We recommend Microsoft® Internet Explorer® 11/Microsoft Edge™ for Windows®, and Safari 10/11 for Mac. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- You must use the TCP/IP protocol on your network and have a valid IP address programmed into the print server and your computer.

- The actual screen may differ from the screen shown above.

Related Information

- Change Machine Settings Using Web Based Management
Access Web Based Management

- We recommend using the HTTPS security protocol when configuring settings using Web Based Management.
- When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box. To avoid displaying the warning dialog box, you can install a self-signed certificate to use SSL/TLS communication. For more detailed information, see Related Information.
- The default login password to manage machine settings is initpass. We recommend you change it to protect your machine from unauthorized access.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.
- For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. If the machine prompts you for a password, type it, and then click .
   You can now change the print server settings.
   If you change the protocol settings, you must restart the machine after clicking Submit to activate the configuration.
   Every time you access Web Based Management, type the password in the Login field, and then click . After configuring the settings, log out by clicking .

Set or Change a Login Password for Web Based Management

We recommend changing the default login password to prevent unauthorized access to Web Based Management.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. Do one of the following:

   • If you have previously set your own password, type it, and then click ✉️.
   • If you have not previously set your own password, type initpass, and then click ✉️.

4. Click the Administrator tab.
5. Type the password you want to use in the Enter New Password field (8 to 32 characters).
6. Retype the password in the Confirm New Password field.
7. Click Submit.

• Change Machine Settings Using Web Based Management
Set Up Your Machine's Address Book Using Web Based Management

- We recommend using the HTTPS security protocol when configuring settings using Web Based Management.
- When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.

   - For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. If the machine prompts you for a password, type it, and then click.
4. Click the Address Book tab.
5. Add or update the Address Book information as needed.
6. Click Submit.

Change the Machine Settings Using Remote Setup

The Remote Setup program lets you configure many of your Brother machine's settings from your computer. When you start Remote Setup, the settings on your Brother machine will be downloaded to your computer and displayed on your screen. If you change the settings on your computer, you can upload them directly to the machine.

- Remote Setup (Windows®)
- Remote Setup (Mac)
Remote Setup (Windows®)

- Set Up the Brother Machine from Your Computer (Windows®)
- Set Up the Brother Machine Using ControlCenter4 (Windows®)
- Set Up Your Machine's Address Book Using ControlCenter4 (Windows®)
If Secure Function Lock is set to On, you cannot use Remote Setup.

1. Do one of the following:
   • Windows® 7
     Click (Start) > All Programs > Brother > Brother Utilities.
     Click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Remote Setup.
   • Windows® 8 and Windows® 10
     Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Remote Setup.
     The Remote Setup Program window appears.

When your machine is connected via a Network, type the password if required.

2. Configure the settings as needed.
Export
Click to save the current configuration settings to a file.

Import
Click Export to save your address book or all settings for your machine.

Print
Click to print the selected items on the machine. You cannot print the data until it is uploaded to the machine. Click Apply to upload the new data to the machine, and then click Print.

OK
Click to start uploading data to the machine, and then exit the Remote Setup Program. If an error message appears, confirm that your data is correct, and then click OK.

Cancel
Click to exit the Remote Setup Program without uploading data to the machine.
Apply
Click to upload data to the machine without exiting the Remote Setup Program.

3. Click OK.

- If your computer is protected by a firewall and is unable to use Remote Setup, you may need to configure the firewall settings to allow communication through port numbers 137 and 161.
- If you are using Windows® Firewall and you installed the Brother software and drivers from the Brother installation disc, the necessary firewall settings have already been set.

Related Information
