If you have any question or concern about the operation of this endoscope, please contact us at following Email:

server@nadamoo.cn

You are suggested to write down the model & the specific scenario and consult us should you find the endoscope abnormal.

### General Safety Information

Failure to follow the all instructions listed below may result in electric shock, fire or serious personal injury.

- 1. If immersing camera in water, please install waterproof part avoiding moisture and store product on dry place. The lens and the tube are water-resistant when the unit is fully assembled, but the wireless transmitter and light switch is not.

- 2. Never spill liquid of any kind on the wireless transmitter and light switch. Liquid increase the risk of electrical shock and damage to the product.

- 3. The unit is not shock-resistant. Do not use it as a hammer and avoid high impact result from things such as dropping the unit from height.

- 4. Do not use the camera if condensation fogs inside the lens. Let the water evaporate before using again.

- 5. Turn off the system if it is not in use.

### Operation On Mac OS

1. Connect the endoscope to computer via **USB adapter**.

   **Note:** There is no need to use the wireless transmitter.

2. To use it on Mac OS, you do not need to install software “ViewPlay Cap”. Please take photos and record video with Mac’s own software below listed:

   - **Photo Booth**
   - **Quicktime player** to play the video.

### Important Notices

1. Green light will be flashing after turning on the power switch,

2. Charging the device with the power of the 5V, 2A / 1A / 500ma. Red light will be on when charging, and goes out when fully charged. It takes 2 hours to be fully charged.

3. Featuring IP68 waterproof camera probe and cable allows it to work in multiple environment, but please install waterproof part.

4. Please note, camera is featured with fixed focus, instead of zoom focus. Therefore, in order to get the best image quality, the best observation distance is about 1.2 inch-3.2 inch.
B: How to record a video on a computer?

1: Set the “file” in the PC first.
2: Click the “Capture” at the beginning and the end, then the video will be saved in the file you have set.

C: How to convert a PC camera to an endoscope camera?

- Choose the camera

Product Description

This product is a utility class equipment with the function of real-time video viewing, video recording, and picture capturing which is suitable for usage in narrow areas and areas that cannot be observed by sight such as: vehicle repair, sewer inspection maintenance etc.
